Rules and Orders (other than those published in Parts I, I-A and I-L) made by the Government of Gujarat under the Central Acts.

LABOUR AND EMPLOYMENT DEPARTMENT

Notification

Sachivalaya, Gandhinagar, 2nd January, 1995.

CONSTITUTION OF INDIA.

No. GSH/1/SBE/1094/M-63/(1)/M(1).—In exercise of the powers conferred by the proviso to Article 309 of the Constitution of India, the Governor of Gujarat hereby makes the following rules further to amend the Chief Inspector of Steam Boilers and Smoke Nuisance Recruitment Rules, 1992, namely:—

1. These rules may be called the Chief Inspector of Steam Boilers and Smoke Nuisance Recruitment (Amendment) Rules, 1995.

2. In the Chief Inspector of Steam Boilers and Smoke Nuisance Recruitment Rules, 1992 (hereinafter referred to as "the said rules"), in rule 2, in clause (*a*), for sub-clause (*i*), the following shall be substituted, namely:—

"(*i*) have worked for not less than ten years in the cadre of Inspector of Steam Boilers and Smoke Nuisance, Class-II";

3. In the said rules, in rule 3, for clause (*c*), the following shall be substituted, namely:—

"(*c*) possess a degree in Mechanical Engineering or an equivalent qualification of a recognised university and also a certificate of proficiency of the first class or second class under the Gujarat Boiler Rules, 1966, or any other statutory rules made in this regard under any Central or Local Act; and

INDEX

4. In the said rules, to rule 4, the following provisos shall be inserted, namely:—

"Provided that the appointing authority may, if it thinks fit in any case, extend the period of probation for a further period not exceeding two years :

Provided further that if any case passing of a departmental examination during the period of probation is stipulated as a pre-requisite condition for completion of such probation period and where the probationer could not pass the same within the prescribed chances admissible to him under the rules for reasons beyond his control, the above ceiling on the period of probation shall not be applicable."

By order and in the name of the Governor of Gujarat,

V. R. RANA,
Deputy Secretary to Government,

GOVERNMENT CENTRAL PRESS, GANDHINAGAR.

Rules and Orders (other than those published in Parts I, I-A and I-L) made by the Government of Gujarat under the Central Acts.

LEGAL DEPARTMENT

Notification

Sachivalaya, Gandhinagar, 4th January, 1995.

No. GK/1/95/COI/1989/655-Vol-1-I.—WHEREAS by Government Notification, Legal Department No. GK/89/30/ /1989/665/D, dated 11th September, 1989 (hereafter referred to as the said notification) the Government of Gujarat has appointed a Commissions of Inquiry consisting of Hon'ble Justice Shri I. C. Bhatt, retired Judge of the High Court of Gujarat, Ahmedabad to inquire into the matters with regard to contracts of Government work entrusted to Contractor Jaiprakash Associates Pvt. Ltd. in Narmada Development Department and the water Resources Department and alleged favour shown to the Contractor by accepting his tenders, payment of quantity in excess of the tendered quantity not conforming the provisions of tender agreement and so-called unauthorised financial aid given to the said Contractor by executing quantitites of the work in excess of those indicated in the tenders and whereas for certain projects under Water Resources Department in respect of which various complaints regarding delay in execution of quantities in excess of those provided in tender and additional payment regarding other irrigation projects had been received;

AND WHEREAS, the Hon'ble Justice Shri J. P. Desai, retired Judge of the High Court of Gujarat is appointed on the Commissions of Inquiry in place of Hon'ble Justice Shri I. C. Bhatt vide Government Notification No. GK/50/93/COI/1989/665/I, dated 27th December, 1993.

AND WHEREAS, the Government of Gujarat amended the said Notification vide Goveernment Notification, Legal Department No. GK/7/94/COI/1989/665-Vol-1-I dated 26th April, 1994.

AND WHEREAS, the Commission was required to complete the inquiry and submit its report into the said matters;

AND WHEREAS, the Government of Gujarat is of opinion hat the Commission should complete the inquiry and submit its report to the State Government within nine months from the 1st January, 1995.

INDEX

NOW, THEREFORE, in exercise of powers conferred by section 3 of the Commission of Inquiry Act, 1952 (60 of 1952) the Government of Gujarat hereby amends the said Notification as follows namely :—

In the said Notification, in paragraph 3 for the words and figures "on or before 31st December, 1994" the words and figures "on or before 30th September, 1995" shall be substituted.

By order and in the name of the Governor of Gujarat,

V. B. GANDHI,
Deputy Secretary to Government.

PART IV—A

Rules and Orders (other than those published in Parts I, I-A and I-L) made by the Government of Gujarat under the Central Acts.

ગૃહ વિભાગ (વિશેષ)

જાહેરનામું

સચિવાલય, ગાંધીનગર, ૯મી જાન્યુઆરી, ૧૯૯૫.

ફોજદારી કાર્યરીતી અધિનિયમ, ૧૯૭૩.

ક્રમાંક જીજી-૯૫-૪-વિશેષ-૨-ક્રમપ-૨૪૮૦-૨૭૫૧-(ભાગ-૧).—સિધ્ધપુરના એકઝીકયુટીવ મેજીસ્ટ્રેટે ફોજદારી કાર્યરીતી અધિનિયમ, ૧૯૭૩ (સને ૧૯૭૪ના બીજા અધિનિયમ)ની કલમ-૧૪૪ હેઠળ કરેલા અને આ સાથેની અનુસૂચિમાં ફરી જણાવેલ તા. ૨૯મી ઓકટોબર, ૧૯૯૪ના હુકમ ક્રમાંક પીઓએલ-પ્રતિબંધ જેનો આમાં હવે પછી સદરહુ હુકમ તરીકે ઉલ્લેખ કર્યો છે. તેમાં નિર્દિષ્ટ કરેલા વિસ્તારોમાં હુલ્લડ અને બખેડો અટકાવવા માટે ગુજરાત સરકારે તેમ કરવું જરૂરી જણાય છે. તેથી, હવે સદરહુ અધિનિયમની કલમ-૧૪૪ની પેટા કલમ (૪)ના પરંતુકથી મળેલ સત્તાની રૂએ, ગુજરાત સરકાર આથી આદેશ કરે છે કે, સને ૧૯૯૫ના જાન્યુઆરી મહિનાની ચોથી તારીખે સદરહુ હુકમ જેની મુદત આ જાહેરનામું ન હોત તો પુરી થઈ ગઈ હોત, તે સને ૧૯૯૫ના જાન્યુઆરી મહિનાની ચોથી તારીખે અને તે તારીખથી વધુ છ મહિનાની મુદત માટે અમલમાં રહેશે.

અનુસૂચિ

નં. પી.ઓ.એલ-પ્રતિબંધ સિધ્ધપુરમાં ઐતિહાસિક સ્થળ રૂદ્રમહાલય આવેલ છે. તેની બાજુમાં એક મસ્જીદ આવેલ છે. જે જુમ્મા મસ્જિદ તરીકે ઓળખાય છે અને તે મિલ્કતો ભારત સરકારના પુરાતત્વ ખાતા તરફથી રક્ષીત ઈમારત તરીકે જાહેર કરાયેલ છે. અને તે ઈમારતોના ઉપયોગ સારૂં હિન્દુ તથા મુસલમાન કોમો વચ્ચે સિધ્ધપુરમાં ઘણી ભારે તંગ પરિસ્થિતિ પેદા થાય છે અને તે હાલ પ્રવર્તે છે. આ બાબતે નામ. ગુજરાત સરકારે અગાઉ, પ્રતિબંધ વિસ્તાર તરીકે બહાર પાડેલ જાહેરનામાની મુદત પુરી થાય છે. તેથી બન્ને કોમો તરફથી રૂદ્રમહાલય અને જુમ્મા મસ્જિદમાં પાક કરવા અને નમાઝ પઢવા જાય તેમ માનવાને કારણ છે. હાઈકોર્ટમાં કેસો ચાલે છે. તેના હજુ નિકાલ આવેલ નથી. બન્ને કોમો વચ્ચે ફરીથી તંગદીલી ઉભી થવા સંભવ છે. જેથી જાહેર સુલેહશાંતિનો ભંગ થતો અટકાવવાનું ઈષ્ટ જણાય છે. અને તેમ થતું તાત્કાલિક અટકાવવા તથા ઝડપી ઉપાય યોજવાનું ઈચ્છનીય છે.

તેથી, હું એન. ડી. પટેલ એકઝીકયુટીવ મેજીસ્ટ્રેટ, સિધ્ધપુર, મને મળેલ ખાસ સત્તાની રૂએ ફરમાવું છું કે, નીચે અનુસૂચિમાં જણાવેલ મિલ્કતોમાં તા. ૬ઠી નવેમ્બર, ૧૯૯૪ના રોજથી ૬૦ દિવસ સુધી સદર મિલ્કતોમાં અગર તેની અંદર આવેલ કોઈપણ સ્થળે કોઈપણ રીતે ઉપયોગ કરવો નહીં તેવા પ્રતિબંધ ફરમાવું છું.

INDEX

મિલ્કતોના વિસ્તારની ચતુ:સીમા

પૂર્વ દિશા : ઘર નં. ૧-૧૦-૮૪ની પછી નદીમાં જવાનો રસ્તો તથા ઘર નં. ૧-૧૦-૮૫નો કરો.

પશ્ચિમ દિશા : રૂદ્રમહાલય તથા મસ્જીદની હદથી રસ્તો દેસાઈના માઢ તરફ જવાનો તથા ત્યાંથી વહોરવાડ તરફ જવાનો રસ્તો મુકી.

ઘર નં. ૧-૧૦-૪૩, ૧-૧૦-૪૪ તથા ૧-૧૦-૪૫ની પછીત તથા બારણું.

ઉત્તર દિશા : રૂદ્રમહાલય તથા મહોલ્લામાં ઘર નં. ૧-૧૦-૭૨ થી ૧-૧૦-૭૬ના મકાનની પછીત તથા પશુવાદળની પોળ તરફ જવાનો રસ્તો જે દેસાઈના માઢ તરફ જાય છે તેની બીજી બાજુએ,

ઘર નં. ૧-૧૧-૯૫ થી ૧-૧૧-૧૦૦ના મકાનોનો આગળનો ભાગ.

દક્ષિણ દિશા : જુની વહોરવાડ તથા દેસાઈના માઢ તરફ જવાનો રસ્તો ઓળંગી ઘર નં. ૧-૫-૫ તથા ૧-૫-૬નો આગળનો ભાગ તથા બારણા તથા ત્યારબાદ રસ્તો મુકીને ઘર નં. ૧-૧૦-૪૭ના મકાનના કરાનો ભાગ.

સદરહુ હુકમનો ભંગ કરનાર ભારતના ફોજદારી અધિનિયમની કલમ-૧૮૮ મુજબની શિક્ષાનેપાત્ર થશે. આ ગુનો કોગ્નીઝેબ્રલ બિન-જામીન લાયક ગુનો છે. આ હુકમ જીલ્લા મેજીસ્ટ્રેટશ્રી, મહેસાણા, જીલ્લા પોલીસ વડાશ્રી, પાટણ તથા એકઝીકયુટીવ મેજીસ્ટ્રેટશ્રી, સિધ્ધપુર અથવા આ અર્થે તેમને અધિકૃત કરેલા અધિકારીઓ પાસેથી પરમીટ ધરાવનાર વ્યકિતઓને લાગુ પડશે નહીં અગર ફરજ ઉપર હાજર રહેનાર પુરાતત્વ ખાતાના તથા રાજય સરકારના અધિકારીઓ તથા નોકરોને લાગુ પડશે નહીં.

આજ તા. ૨૯મી ઓકટોબર, ૧૯૯૪ના રોજ મારી સહી તથા સિક્કો કરી આપેલ છે.

એન. ડી. પટેલ,
એકઝીકયુટીવ મેજીસ્ટ્રેટ, સિધ્ધપુર.

ગુજરાતના રાજયપાલશ્રીના હુકમથી અને તેમના નામે,

જે. આર. મોદી,
સરકારના ઉપસચિવ.

સરકારી મધ્યસ્થ પ્રેસ, ગાંધીનગર.

Sachivalaya, Gandhinagar, 10th January, 1995.

GUJARAT ESSENTIAL ARTICLES (LICENSING, CONTROL AND STOCK DECLARATION) ORDER, 1981.

No. GTH-95-6-SCA-1082-1876-B.–Whereas it is necessary in the public interest so to do;

NOW, THEREFORE, in exercise of the powers conferred by sub-clause (i) of clause 27 of the Gujarat Essential Articles (Licensing Control and Stock Declaration) Order, 1981, (hereinafter referred to as "the said order") the Government of Gujarat hereby exempts Gujarat State Co-operative Marketing Federation Limited, Ahmedabad. (hereinafter referred to as "the Federation") for a period begining from the 5th January, 1995 and ending on the 31st October, 1995 subject to the condition that it shall submit monthly return regularly to the Director of Food, Gandhinagar and Collector of the concerned district or the Food and Civil Supplies Controller, Ahmedabad City, as the case may be, showing therein opening balance, receipt during the month, sale during the month and closing stock in respect of each edible oil and edible oilseed. In case of contravention of the condition so mentioned in this para, exemption granted under this order shall be withdrawn forthwith without any notice;

(1) from the operation of the provisions of clause-3 of the said order in so far as the Federation deals in any essential article other than edible oils and edible oilseeds; and

(2) from the operation of the provisions of sub-clause (5) of the clause 5 of the said order in so far as the Federation deals in edible oils and edible oilseeds subject to the condition that the Federation shall obtain single licence indicating therein details of all the places where the Federation stores or keeps edible oils or as the case may be, edible oilseeds.

By order and in the name of the Governor of Gujarat,

P. M. ACHARYA,
Joint Secretary to Government.

LABOUR AND EMPLOYMENT DEPARTMENT
Notification
Sachivalaya, Gandhinagar\Date the 15th February,1995.

THE FACTORIES ACT, 1948 (NO. LXIII OF 1948)

No. GR/GUJ/40/FAC/1090/557-M-3.—In exercise of the powers conferred by sections 6,7-a, 10,13,17,21,23,29,31,35,38,40,41,41-A, 41-B, 41-C, 41-G, 45,46,50,64,66,87,88,88-A and 112 of the Factories Act, 1948 (hereinafter referred to as "the said Act"), the Government of Gujarat, after taking into consideration the objections and suggestions, hereby makes the following rules further to amend the Gujarat Factories Rules, 1963, namely :-

1. These rules may be called the Gujarat Factories (Amendment) Rules, 1995.

2. In the Gujarat Factories Rules, 1963 (hereinafter referred to as "the said rules"), after rule 2, the following shall be inserted, namely :-

"2-A-COMPETENT PERSON-(1) The Chief Inspector may recognise any person as a "competent person", for such area and for such period as may be specified,for the purpose of carrying out tests, examination and inspections of such buildings, dangerous machineries, hoists an lifts, lifting machines and lifting tackles, pressure plants, confined spaces, ventilation systems and such other processes or plants and equipments located in a factory, as stipulated in the Act and the rules,if such a person possess the qualifications experience and other requirements as set out in the Schedule annexed to this rule:

Provided that the Chief Inspector may relax the requirements of qualification (but not the requirements in respect of the facilities at the command of such a person)if such a person is exceptionally experienced and knowledgeable:

INDEX

Provided further that where it is proposed to recognise a person employed under the Chief Inspector as a "competent person", concurrence of the State Government shall be obtained and such a person after being so recognised, shall cease to have power of an "Inspector" :

Provided also that the "competent person" recognised under this provision shall not be above the age of 62 and shall be physically fit for the purpose of carrying out the tests, examinations and Inspections.

(2) The Chief Inspector may recognise as a "competent person" for such area and for such period as may be specified by him any of the reputed institutions having persons possessing qualifications and experience as set out in the Schedule referred to in sub-rule (1) of this rule for the purpose of carrying out tests, examinations and inspections of such building, dangerous machineries, hoists and lifts, lifting machines and lifting tackles, pressure plants, confined spaces, ventilation systems and such other processes or plants and equipments as stipulated in the Act and rules made thereunder.

(3) The Chief Inspector shall, on receipt of an application in the prescribed Form No. 26 or 27 from a person or institution respectively, intending to be recognised as a " competent person", register such application immediately and after having satisfied himself as regards competence and facilities available at the disposal of the applicant, either recognise the applicant as a "competent person " and issue a certificate of competency in the prescribed Form No. 4-A within a period of sixty days from the date of receipt of the application or reject the application specifying the reasons therefor.

(4) The Chief Inspector may, after giving an opportunity to the person of being heard, revoke the certificate of competency-

(i) if he has a reason/s to believe that a competent person—

(a) has violated any of the conditions stipulated in the certificate of competency or

(b) has carried out a test, examination and inspection or has acted in a manner inconsistent with the intent or the purpose of the Act and rules or has omitted to act as required under the Act and Rules; or

(ii) for any other reasons to be recorded in writing.

Explanation:—For the purpose of this rule, an institution includes an organisation.

(5) The Chief Inspector may, for reasons to be recorded in writing, require recertification of lifting machines, lifting tackles, pressure pl nts or ventilation systems, as the case may be, which has been or have been certified by a competent person of othe State.

INDEX

(1)	(2)	(3)	(4)	(5)
			(d) capable of identifying defects and arriving at a reliable conclusion with regard to the safety of lifting machinery, chains, ropes and lifting tackles.	
5.	Section 31 Pressure Plant	Degree in chemical or electrical or metallurgical or mechanical engineering or its equivalent.	(i) A minimum experience of 10 years in— (a) design or erection or maintenance; or (b) testing, examination and inspection of pressure plants. (ii) He shall be— (a) conversant with the relevant codes of practices and test procedures relating to the pressure vessels; (b) conversant with statutory requirements concerning the safety of unfired pressure vessels and equipment operating under pressure; (c) conversant with non-destructive testing techniques as are applicable to pressure vessels; (d) able to identify defects and arrive at a reliable conclusion with regard to the safety of pressure plants.	Facilities for carrying out hydraulic test, non-destructive test, guage equipment/ gadgets for measurement and any other equipment or gauges to determine the safety in the use of pressure vessels;
6.	(i) Section 36— Precautions against dangerous fumes.	Master's Degree in Chemistry or a degree in chemical engineering.	(i) A minimum experience of 7 years in collection and analysis of environmental samples and caliberation of monitoring equipment;	Meters, instruments and devices duly caliberated and certified for carrying out the tests and certification of safety in working in confined spaces.

(1)	(2)	(3)	(4)	(5)
	(ii) Rules made under sections 41 & 112 concerning ship building, ship repairs and ship breaking.			
7.	Ventilation system as required under various schedule framed under Sec. 87 such as schedules on—	Degree in mechanical or Electrical Engineering or equivalent.	(ii) He shall— (a) be conversant with the hazardous properties of chemicals and their permissible limit values; (b) be conversant with the current techniques of sampling and analysis of the environmental contaminants; and (c) be able to arrive at a reliable conclusion as regard the safety in respect of entering and carrying out hot work.	
	(i) Grinding or glazing of metals and processes incidental thereto,		(i) A minimum experience of 7 years in the design, fabrication, installation, testing of ventilation system and systems used for extraction and collection of dusts, fumes and vapours and ancillary equipments.	Facilities for testing the ventilation system instruments and guages for testing the effectiveness of the extraction systems for dusts, vapours and fumes, and any other equipment needs for determining the effeciency and adequacy of these systems. He shall have the assistance of suitable qualified technical persons who can come to a reasonable conclusion as to the adequacy of the system.
	(ii) cleaning or smoothening, roughning etc. of articles, by a jet sand, metal shot or grit or other abbresive propelled by a blast of compressed air or steam.		(ii) He shall be conversant with current relevant codes of practice and test procedures in respect of ventilation and extraction system for fumes and shall be able to arrive at a reliable conclusion with regard to effectiveness of the system.	
	(iii) handling and processing of asbestos			
	(iv) manufacture of Rayon by Viscose process.			
	(v) Foundry operations.			

3. In the said rules, after rule 3-A, the following rule shall be inserted, namely :—

"3B. The State Government may require, for the purpose of the Act, submission of plan of any factory which was either in existence on the date of commencement of the Act or which has not been constructed or extended since then. Such plans shall be drawn to scale showing :

(a) the site of the factory and immediate surroundings including adjacent buildings and other structures, roads, drainage, etc;

(b) the plan, elevation and necessary cross section of the factory buildings indicating all relevant details relating to natural lighting, ventilation and means of escape in case of fire and the position of the plant and machinery, aisles and passage ways, and

(c) such other particulars as the State Government may require".

4. In the said rules, for rule 3-C(1) and 3-E, the following shall be substituted, namely :--

"**3-C. Certificate of Stability :** No manufacturing process shall be carried out in any premises of a factory constructed, reconstructed or extended or in any premises which has been taken into use as a factory or part of the factory until a certificate of stability issued by a competent person in respect of every work of engineering construction in the Form of 1-A has been sent by the Occupier of the Factory to the Chief Inspector of Factories and accepted by him :

provided that for the factories which are in existence on the date of coming into force of these rules, the certificate of stability in Form 1-A may be sent to the Chief Inspector of Factories within three months from the date of publication of this Notification :

Provided further that no manufacturing process shall be carried out in any premises of a factory unless a fresh certificate of stability in Form 1-A is obtained from a competent person once in each period of five years or after every extension, alteration, repairs or addition of machinery, plants etc. and sent to the Chief Inspector of Factories :

Provided also that, the foregoing provisions are without prejudice to the provisions of Sections 39 and 40 of the Act.

"**Explanation :** Work of engineering construction" means any building-tank-silo, scaffold, platform ,chimney, bridge, supporting structural work, retaining wall or any similar structure."

5. In the said rules, after rule 12-A, the following shall be inserted, namely :-

"**12-B. Maintenance of records**

The occupier shall maintain records, in Form No. 37 in respect of monitoring of working environment in the factory..

12-C. Health and safety policy

(1) The occupier of every factory shall prepare except as provided in sub-rule(2), a written statement of his policy in respect of Health & Safety of workers at work.

INDEX

(2) All factories.—

(a) covered under section 2 (m) but employing less than 50 workers;

(b) covered under section 2(m) (ii) but employing less than 100 workers; are exempted from requirements of sub-rule (1).

(3) The Health and Safety Policy shall contain or deal with-

(a) declared intention and commitment of the top management to health, safety and environment and compliance with all the relevant statutory requirements;

(b) organisational set-up to carry out the declared policy clearly assigning the responsibility at different levels; and

(c) arrangements for making the policy effective.

(4) In particular, the policy shall specify the following:

(a) arrangements for involving the workers;

(b) intention of taking into account the health and safety performance of individuals at different levels while considering their career advancement;

(c) fixing the responsibility of the contractors, sub-contractors, transporters and other agencies entering the premises;

(d) providing a resume of health and safety performance of the factory in its Annual Report;

(e) relevant techniques and methods (such as safety audits and risk assessment) for periodical assessment at least once in every two years on the status of health, safety and environment and taking all the remedial measures.

(f) stating its intention to integrate health and safety, in all decisions including those dealing with purchase of plant, equipment, machinery and material as well as selection and placement of personnel.

(g) arrangements for informing, educating and retraining and retraining its own employees at different levels and the public, wherever required.

(5) A copy of the declared health and safety policy signed by the occupier shall be made available not only to the Inspector having jurisdiction over the factory but also to the Chief Inspector.

(6) The policy shall be made widely known by-

(a) making copies available to all workers including contract workers apprentices, transport workers, suppliers, etc.

(d) displaying copies of the policy at conspicuous places; and

(e) any other means of communication in a language understood by majority of workers.

INDEX

(7) The occupier shall revise the Safety policy as often as may be appropriate, but it shall necessarily be revised under the following circumstances :.

(a) whenever any expansion or modification having implications on safety and health of persons at work is made, or

(b) when new substances or articles are introduced in the manufacturing process having implications on health and safety of persons exposed to such substances."

6. In the said rules, in rule 15, for sub-rule (7), the following shall be substituted, namely :-

"(7) At such visits the certifying surgeon after examining a worker, shall issue a certificate of fitness in Form No.5. The record of examination and re-examinations carried out shall be kept in the custody of manager of the factory. The record of the each examination carried.out under sub-paragraph (1)& (2) including the nature and the results of the tests shall also be entered by the Certifying Surgeon in a Health Register in Form No 20."

7. In the said rules, after rule 18, the following rule shall be inserted, namely:-

"18-A : Ventilation and Tem perature :

(1) Limit of temperature and air movement.

In any factory, the maximum wet bulb temperature of air in a workroom at a height of 1.5 (meter) above the floor level shall not exceed 30^0 C (80 F) and adequate air movement of at least 30 metre per minute shall be provided, and in relation to dry bulb temperature the wet bulb temperature in the work-room at the said height shall not exceed that, shown in the following schedule, or as regards a dry-bulbreading- intermediate between the two dry-bulb reading that specified in relation to the higher of these two dry-bulb readings. :

SCHEDULE

Dry-Bulb Temperature	Wet-Bulb temperature
30^0 C to 34^0 C	29^0C
35^0 C to 39^0 C	28^0C
35^0 C to 47^0 C	28^0C
45^0 C to 47^0 C	27^0C

Provided that if the temperature measured with the thermometer inserted in the hollow glob of 15 cm. diameter coated mat black outside and kept in the environment for not less than 20 minutes exceeds the dry bulb temperature of air, the temperature so recorded by the glob thermometer shall be taken in place of the dry bulb temperature:

Provided further that when the reading of the wet-bulb temperature outside the shade exceeds 27^0 C (80^0 6^0 F), the value of wet bulb temperature allowed in the schedule for a given dry bulb temperature may be correspondingly increased to the same extent:

Provided also that this requirement shall not apply in respect of factories covered by section 15 and in respect of factories where the nature of work carried on involves production of excessively high temperature referred to in clause (ii) of sub-section (1) of section 13 to which workers are exposedfor short periods of time not exceeding one hour followed by an interval of sufficient duration in thermal environments not exceeding those otherwise laid down in this rule.

INDEX

(2) Provision of Thermometres

(i) if it appears to the Inspector that in any factory, the temperature of air in a workroom is sufficiently high or is likely to exceed the limits prescribed in sub-rule (1), he may serve, on the manager of the factory, an order requiring him to provide sufficient number of whiring hygrometers or any other types of hygrometers and direct that the dry bulb and wet bul breading in each such work-room shall be recorded at such position as approved by the Inspector twice during each working shift by a person especially nominated for the purpose by the manager and approved by the Inspector.

(ii) if the Inspector has a reason to believe that substantial amount of heat is added inside the environment of a workroom by radiation from walls roof of other solid surroundings, he may serve, on the manager of the factory, an order requiring him to provide one or more globe thermometers reffered to in the first provision in sub-rule (1) and further require him to place the globe thermometers at places specified by him and keep a record of the temperatures in the suitable registers.

(3) Ventilation

(i) In every factory, the amount of ventilating openings in a work-room below the caves shall, except where mechanical means of ventilation as required by clause (ii) below are provided, be of an aggregate area of not less than 15% of the floor area and so located as to afford a continued supply of fresh air:

Provided that this requirement shall not apply in respect of work-rooms of factories—

(a) covered by section 15; or

(b) in which temperature and humidity are controlled by refrigeration.

(ii) Wherein any factory owing to special circumstances such as situation with respect to adjacent building and height of the building with respect to floor space, the requirement of ventilation opening under clause (i) can not be complied with or in the opinion of the Inspector the temperature or air in a work-room is sufficient high and is likely to exceed the limits prescribed in sub-rule (1), he may serve, on the manager of the factory, an order requiring him to provide additional ventilation either by means of roof-ventilation or by mechanical means.

(iii) The amount of fresh air supplied by mechanical means of ventilation in an hour shall be equivalent to about six times the cubic capacity of the work-room and shall be distributed evenly throughout the work-room without dead air-pockets or undue draught caused by high inlet velocities.

(iv) In regions wherein summer (15th march to 15th July) dry-bulb temperature of outside air in the shade during most part of the day exceed 35^{0} C (95^{0} F) and simultaneous wet-bulb temperature are 25^{0} C (60^{0} F) or below and in the opinion of the Inspector the manufacturing process carried on in the work-room of a factory permits thermal environments with relative humidity 50% or more, the Inspector serve on the manager of the factory an order to have sufficient supply of outside air for ventilation cooled by passing it through water-sprays either by means of unit-type evaporative air-coolers (desert coolers) or, where supply of outside air is provided by mechanical means through ducts in a plenum system, by means of central air-washing plants."

8. In the said rules, in rule 54, for Schedule I, the following schedule shall be substituted, namely :—

INDEX

"SCHEDULE - I

Textile machinery except Machinery used in Jute Mills.

1. Application.--The requirement of this Schedule shall apply to machinery in factories engaged in the manufacture or processing of textile other than jute textiles. The Schedule shall not apply to machinery in factories engaged exclusively in the manufacture of synthetic fibres.

2. Definitions.—For the purpose of the Schedule—

(a) "Calender" means a set of heavy rollers mounted on vertical side farms and arranged to pass cloth between them. Calenders may have two to ten rollers, or bowls, some of which can be heated.

(b) "Embossing Calender" means a calender with two or more rolls, one of which is engaged for producing figures of various kinds of fabric,

(c) "Card" means a machine consisting of cylinders of various sizes and in certain cases flats-covered with card clothing and set in relation to each so that fibres in staple form may be seperated into individual relationship. The speed of the cylinders and their direction of rotation varies. The finished product is delivered as a sliver Cards of different types are the revolvingflat card, the roller and clear card, etc.

(d) "Card clothing" means the material with which the surfaces of the cylinder, doffer, flats etc. of a card are covered and consists of a thick foundation material made of , either textile fabrics through which are pressed many fine closed spaced, specially bent wires, or mounted raw toothed wire.

(e) "Comber" means a machine for combing fibres of cotton wool, etc. The essential parts are device for feeding forward a fringe of fibres at regular intervals and an arrangement of combs or pins, which, at the right time, pass through the fringe. All tangled fibres, short fibers, and nipe are removed and the long fibers are laid parallel.

(f) "Combing machinery" means a general classification of machinery including combers, silver lap machines, ribbon lap machines and gill boxes, but excluding cards.

(g) "Factory Staple cutter" means a machine consisting of one more rotary blades used for the purpose of cutting textile fibres into staple lengths.

(h) "Garnett machine" means any of a number of type of machines for opening hard twisted waste of wool, cotton, silk, etc. Essentially, such machines consist of a licker in one or more cylinder, each having a competent worker and stripper rolls and a fancy roll and deffer. The action of each machines is somewhat like that of a wool card, but it is much more severe in that the rolls are covered with garnett wire instead of card clothing.

(i) "Gill box" means a machine used in the woested system of manufacturing yarns. Its function is to arrange fibres in parallel order. Essentially, it consists of a pair of feed rools and a series of followers where the followers move at a faster surface speed and perform a combing action.

(j) "In-running rolls" means any pair of rolls or drums between which there is a "nip".

(k) "Interlocking arrangement" means a device that prevents the setting in motion of a dangerous part of a machine or the machine itself while the guard cover or door unlocked, and which will also hold the guard, cover or door closed and locked while the machine or the dangerous part is in motion.

(l) "kier" means a large metal vat, usually a pressure type, in which fabrics may be boiled out, bleached, etc.

INDEX

(m) "Ribbon lapper" means a machine or a part of machine used to prepare laps for feeding a cotton comb; its purpose is to provide a uniform lap in which the fibres have been strainghtened as much as possible.

(n) "Silver lapper" means a machine or a part of a machine in which a number of parallel card silvers are drafted slightly, laid side by side a compact sheet, and wound into a cylindrical package.

(o) "Loom" means a machine for affecting the interlocking of two series of yarns crossing one another at right angles. The warp yarns are wound on a warp beam and pass through headles and reeds. The filling is shot across in a shuttle and settled in place by reeds and slay, and the fabric is wound on a cloth beam.

(p) "Starch mangle" means a mangle that is used specifically for staching cotton goods. It commonly consists of two large rolls and a shallow open vat with several immersion rolls. The vat contains the starch solution.

(q) "Water mangle" means a calender having two or more rolls used for squeesing water from fabrics before drying. Water mangles also may be used in other ways during the finishing of various fabrics. Provided to safeguard against danger, is open or;

(r) "Mule" means a type of spinning frame having a head stock and a carriage as its two main sections. The head stock is stationery. The carriage is movable and it carries the spindles which draft and spin the roving into yarn. The carriage extends over the whole width of the machine and moves slowly towards and away from the head stock during the spinning operation.

(s) "Nip" is the danger zone between two rolls or drums which by virtue of their positioning and movement create a nipping hazard.

(t) "Openers and pickers" means a general classification of machinery which includes breaker pickers, Intermediate pickers, finishers pickers, single process pickers multiple pickers, willow machines, card and picker waste cleaners, thread extractors, shredding machines, roving waste openers, shoddy pickers, bais breakers feeders, vertical openers, lattice cleaners, horizontal cleaners, and any similar machinery equipped with either cylinders, screen section, calender section, rolls or baters used for the preparation of stock for further processing.

(u) "Paddler" means a trough for a solution and two or more squeeze rolls between which cloth passes after being passed through a mordant or dry bath.

(v) "Plating machine" means a machine used to lay cloth into folds of regular length for convenience of subsequent process or use.

(w) "Roller printing machine" means a machine consisting of a large central cylinder, or pressure bown, around the lower part of the perimeter of which is placed a series of engraved colour roller (each having a color through), a furnisher roller, doctor blades, etc. The machine is used for printing fabrics.

(x) "Continuous bleaching range" means a machine for bleaching of cloth in rope or open width form the following arrangement. The cloth, after wetting out, pass through a squeeze roll into a saturator containing a solution of caustic soda and then to an enclosed J-Box. A V-shaped arrangement is attached to the front part of the J-box for uniform and rapid saturation of the cloth with steam before it is packed down in the J-Box. The cloth, in a single strand rope form, passes over a guide roll down the first arm of the "V" and up the second. Steam is injected into the "V" at the upper end of the second arm so that the cloth is rapidly saturated with stream at this point. The J-Box capacity is such that cloth will remain hot for a sufficient time to complete the scouring action. It then passes a series of washers with a sqeeze roll in between. The cloth then passes through

INDEX

a second set of saturator, J-box and washer, where it is treated with the peroxide solution. By slight modification of the form of the unit, the same process can be applied to open-width cloth.

(v) "Mercerizing range" means a 3-bowl mangle, a tenter frame, and a number of boxes for washing and scouring. The whole set up is in a straight line and all parts operate continuously. The combination is used to saturate the cloth with sodium hydroxide, stretch it while saturated, and washing out most of the caustic before releasing tension.

(z) "Sanforizing machine" means a machine consisting of a large steam-heated cylinder, and endless, thick, woolen felt which is in close contact with the cylinder for most of its perimeter, and an electrically heated shoe which process the cloth against the blanket while the latter is in a stretched condition as it curves around feed-in-roll.

(aa) "Shearing machine" means a machine used for shearing cloth. Cutting action is provided by a number of steel blades spirally mounted on a roller. The roller rotates in close contact with a fixed lader blade. There may be from one to six such rollers on a machine.

(bb) "Singering machine" means a machine which comprises of a heated roller, plate, or an open gas flame. The cloth or yarn is rapidly passed over the roller or the place or through the open gas flame to remove fuzz or hairiness by burning.

(cc) "Slasher" means a machine used for applying a size mixture to warp yarns. Essentially, it consists of a stand for holding section beams, a size box, one or more cylindrical dryers or an enclosed hot air dryer, and a beaming end for winding the yarn on the loom beams.

(dd) "Tenter frame" means a machine for drying cloth under tension. It essentially consists of a pair of endless travelling chains fitted with clips of fine pins and carried on tracks. The cloth is firmly held at the salvages by the two chains which diverge as they move forward so that the cloth is brought to the desired width.

(ee) "Warper" means a machine for preparing and arranging the yarns intended for the warp of a fabric, specially, a beam warper.

3. **General Safety requirements.—(1) Every textile machine shall be provided with individual mechanical or electrical means for starting and stopping such machines. Belt-shifter on machines driven by belts and shafting should be provided with a belt shifter lock of an equivalent positive locking device.**

(2) Stopping and starting handles or other controls shall be of such design and so positioned as to prevent the operator's hand or fingers from striking against any moving part or any other part of the machine.

(3) All belts, pulleys, gears, chains, sprocket wheels, and other dangerous moving parts of machinery which either form part of the machinery or are used in association with it, shall be securely guarded.

4. **Openers and pickers.—(1)In all opening or picker machinery, beaters and other dangerous parts shall be securely fenced by suitable guards so as to prevent contact with them. Such guards and doors or covers or openings giving access to any dangerous part of the machinery shall be provided with interlocking arrangement :**

Provided that in the case of doors or covers of openings giving access to any dangerous part, other than beater covers, instead of the interlocking arrangement, such openings may be so fenced by guards which

INDEX

prevent access to any such dangerous part and which is either kept positively locked in position or fixed in such a manner that it cannot be removed without the use of hand tools.

(2) The feed rolls on all opening and picking machinery shall be coverd with a guard designed to prevent the operator from reaching the nip while the machinery is in operation.

(3) The lap-forming rollers shall be fitted with a guard or cover which shall prevent access to the nip at the intake of the lap roller and fluted as long as the weighted rack is down. The guard or cover shall be so locked that it cannot be raised until the machine is stopped, and the machine cannot be started until the cover or guard is closed :

Provided that the foregoing provision shall not apply to the machines equipped with automatic lap forming devices :

Provided further that any such machine equipped with an automatic lap-forming device shall not be used unless the automatic lap forming device is in efficient working order.

5. **Cotton cards.—(1) All cylinder doors shall be secured by interlocking arragement which shall prevent the door being opened until the cylinder has ceased to revolve and shall render it impossible to restart the machine until the door has been closed :**

Provided that the latter requirement in respect of the automatic locking device shall not apply while stripping or grinding operations are carried out :

Provided further that stripping or grinding operations shall be carried out only by specially trained adult workers wearing tight fitting clothing whose names have been recorded in the register prescribed in this behalf as required in sub-section (1) of section 22.

(2) The licker-in shall be guarded so as to prevent access to the dangerous parts.

(3) Every card shall be equipped with an arrangement that would enable the card cylinder to be driven by power during stripp ng/grinding operations without having to either shift the main belt to the fast pulley of the machine or to c smantle the interlocking mechanism. Such an arrangement shall be used only for stripping or grindin perations.

6. **Garnett Machines.**—(1) Garnett licker-ins shall be enclosed.

(2) Garnett fancy rolls s! ..ll be enclosed by guards. These shall be installed in a way that keeps worker rolls reasonably accessible for removal or adjustment.

(3) The under side of the garnett shall be guarded by a screen mesh or other form of enclosures to prevent access.

7. **Gill boxes.**—(1) The feed end shall be guarded so as to prevent fingers being caught in the pins of the intersecting fallers.

(2) all nips of in-running rolls shall be guarded by suitable nip guards conforming to the following specifications :

INDEX

Any opening which the guard may permit when fitted in position shall be so restricted with respect to the distance of the opening from any nip point through that opening and in any circumstances the maximum width of the opening shall not exceed the following ;

Distance of opening from the point	Maximum width of opening
0 to 38 mm	6 mm
39 to 63 mm	10 mm
64 to 88 mm	13 mm
89 to 140 mm	15 mm
141 to 165 mm	19 mm
166 to 190 mm	22 mm
191 to 215 mm	32 mm

8. **Silver and ribbon lappers (cotton).**—The calender drums and the lap spool shall be provided with a guard to prevent access to the nip between the in-running rolls.

9. **Speed frames.—Jack box wheels at the head stock shall be guarded and the guard shall have interlocking arrangement.**

10. **Spinning mules.**—Wheels on spinning mule carriages shall be provided with substantial wheel guards; extending to within 6 mm of the rails.

11. **Warpers.—Swivelved double-bar gates shall be installed on all warpers operating in excess of 410 meters/min. These gates shall have interlocking arramngement, except for the purpose of inching or jogging :**

Provided that the top and bottom bars of the gate shall be at least 1.05 and 0.53 meters high from the floor or working platform, and the gate shall be located 38 mm from the vertical tangement to the beam-head.

12. **Slashers. (1) Cylinder dryers.—**

(a) All open nips of in-running rolls shall be guarded by nip-guards conforming to the requirements in Paragraph 7.

(b) When slashers are operated by control levers, these levers shall be connected to a horizontal bar or treadle located not more than 170 cm above the floor to control the operation from any point.

(c) Slashers operated by push button control shall have stop and start buttons located at each end of the machine, and additional buttons located on both sides of the machine at the size box and the delivery end. If calendar rolls are used, additional buttons shall be provided at both sides of the machine at points near the nips, except when slashers are equipped with an enclosed dryer as in paragraph (b).

(2) Enclosed hot-air-dryer.—

(a) All open nips of the top squeezing rollers shall be guarded by nip guards conforming to the requirements in paragraph 7(2).

(b) When slashers are operated by control levers, these levers shall be connected to a horizontal bar or tredls located not more than 170 cm. above the floor to control the operation from any point.

(c) Slashers operated by Push-button control shall have stop and start buttons located at each end of the machine and additional stop and start buttons located on both sides of the machines at intrvals spaced not more than 1.83 meters on centers.

13. **Looms.—(1) Each loom shall be equipped with suitable guards designed to minimize the danger from flying shuttles.**

(2) Beam weights for tension in beam shall be of such construction so as to prevent it falling during its adjustment.

14. **Valves of kiers, tanks, and other containers.**--(1) Eqach valve controlling the flow of steam, injurious gase or liquids into a kier or any other tank or container into which a person is likely to enter in connection with a process, operation, maintenance or of any other purpose, shall be provided with a suitable locking arrangement to enable the said person to lock the valve securely in the closed position and retain the key with him before entering the kier, tank or container.

(2) Wherever boiling tanks, caustic tanks and any other containers from which liquids which are hot, corrosive or toxic may overflow or splash, are so located that the operator can not see the contents from the floor or working area emergency shut -off valves which can be controlled from a point not subject to danger of splash shall be provided to prevent danger.

15. **Shearing machines.—All revoving blades on shearing machines shall be guarded so that the opening between the cloth surface and the bottom of the guard shall not exceed 10 mm.**

16. **Continuous bleaching range (cotton and rayon).**--The nip of all in-running rolls on open-width bleaching machine rolls shall be protected with a guard to prevent the worker from being caught at the nip. The guard shall extend across the entire length of the nip.

17. **Mercerizing range (piece goods).**—(1) A stopping device shall be provided at each end of the machine.

(2) A guard shall be provided at each end of the frame between the in-running chain and the clip opener.

(3) A nip guard shall be provided for the in-running rolls of the mangle and washers and the guard shall conform to the requirements in paragraph 7(2).

18. **Tandet frames.**--(1) A stopping device shall be provided at each end of the machine.

(2) A guard shall be provided at each end of the machine frame at the in-running chain and clip opener.

19. **Paddlers.**--Suitable nip guards conforming to the requirement in paragraph 7(2) shall be provided to all dangerous in-running rolls.

20. **Centrifugal extractors.**--(1) Each extractor shall be provided with a guard for the basket, and the guard shall have interlocking arrangement.

(2) Each extractor shall be equipped with a mechanically or electrically operated brake to quickly stop the basket when the power driving the basket is shut off.

21. **Squeezer or wringer extractor, water mangle, starch mangle, back washer (worsted yarn), crabbing machines, and decating machines.**—All in-running rolls shall be guarded with nip guards conforming to the requirements in pragraph 7(2).

INDEX

22. **Sanforizing and palmer machine.**—(1) Nip guards shall be provided on all accessible in-rinning rolls and these shall conform to the requirements in paragraph 7(2).

(2) Access from the sides to the nips of in-running rolls shall be fenced by suitable side guards.

(3) A safety trip-rod, cable or wire-center cord shall be provided across the front and back of all palmer cylinders extending the length of the face of the cylinder. It shall operate readily whether pushed or pulled. The safety-trip shall not be more than 170 cm. above the level at which the operator stands and shall be readily accessible.

23. **Rope washers.—(1) Splash guards shall be installed on all rope washers unless the machine is so designed as to prevent the water or liquid from splashing the operator, the floor, or working surface.** (2) A safety trip-rod, cable or wire-centre cord shall be provided across the front and back of all rope washers extending the length of the face of the washer. It shall operate readily whether pushed or pulled. This safety trip shall be not more than 170 cm. above the level on which the operator stands and shall be readily accessible.

24. **Laundry washer tumbler or shaker.**--(1) Each drying tumbler, each double cylinder shaker or clothes tumbler and each washing machine shall be equippped with an inter-locking arrangement which shall prevent the power operation of the inside cylinder when the outer door on the case or shell is open and which shall from being opened without shutting off the power and the cylinder coming to a stop. This should not prevent the movement of the inner cylinder by means of a hand operated mechanism or in inching device.

(2) each closed barrel shall also be equipped with adequate means for holding open the doors or covers of the inner and outer cylinder or shells while it is being loaded or unloaded.

25. **Printing-machine (roller-type).**--(1) All in-running rolls shall be guarded by nip guards conforming to the requirements in pagraph 7(2).

(2) The ingrared rollers, gears and the large crown wheel shall be guarded.

26. **Calendrs.**--The nip at the in-running side of the rolls shall be provided with a guard extending across the entire length of the nip and arranged to prevent the fingers of the workers from being pulled in between the guard and the rolls; and so constructed that the cloth can be fed into the rolls easily.

27. **Rotary staple cutters.**-The cutter shall be protected by a guard to prevent hands reaching the cutting zone.

28. **Plating machines.**- Access to the trap between the knife and card bar shall be prevented by a guard.

29. **Hand-baling machine.**- An angle iron handle-stop guard shall be installed at right angle to the frame of the machine. The stop guard shall be so designed and so located that it shall prevent the handle from travelling beyond the vertical position should the handle slip from the operator's hand when the pawl has been released from the teeth of the take-up gear.

30. **Flat work ironer.** — Each flat work or collar ironer shall be equipped with a safety bar or the other guard across the entire front of the feed or first pressure rolls so arranged that the striking of the bar or guard by the hand of the operator or the other person shall stop the machine. The guard shall be such that the operator or the other person can not reach into the rolls without removing the guard. This may be either a vertical

INDEX

guard on all sides or a complete cover if a vertical guard is used, the distance from the floor or working platform to the top of guard shall be not less than 1.83 meters."

9. In the said rules, in rule 54, after schedule IV, the following three schedules viz. Schedule V, VI & VII shall be added namely:—

" SCHEDULE - V

Centrifugal machines.

1. **Definition.-** "Centrifugal machines" include centrifugal extractors, separators and driers.

2. Every part of centrifugal machine shall be—

(a) of good design and construction and of adequate strength;

(b) properly maintained; and

(c) examined thoroughly by a competent person at regular intervals.

3. **Interlocking guard for drum or basket.— (1) THe cage housing the rotating drum or basket of every centrifugal machine shall be provided with a strong lid. The design and construction of the cage as well as the lid should be such that no access is possible to the drum or basket when the lid is closed.**

(2) Every centrifugal machine shall be provided with an efficient interlocking device that shall effectively prevent the lid referred to in sub-paragraph (1) from being opened while the drum or basket is in motion and prevent the drum or basket being set in motion while the lid is in the open position.

4. **Breaking arrangement.**— Every centrifugal machine shall be provided with an effective braking arrangement capable of bringing the drum of basket to rest within as short a period of time as reasonably practicable after the power is cut off.

5. **Operating speed** – No centrifugal machine shall be operated at speed in excess of the manufacturer's rating which shall l legibly stamped at easily visible places both on the inside of the basket and on the outside of the machine casing.

6. **Exemptions.**—Sub-paragraph (2) of paragraph 3, paragraphs 4 and 5 shall not apply in case of top-lung machines or similar machines used in the sugar-manufacturing industry.

SCHEDULE - VI

Power-Press

1. **Application. — The schedule shall apply to all types of power- Presses including press brakes.except when used for working hot metal.**

2. **Definitions.**— For the Purpose of the schedule—

(a) "approved" means approved by the Chief Inspector;

INDEX

(b) "fixed fencing" means fencing provided for the tools of a power press being fencing which has no moving part associated with or dependent upon the mechanism of a power and includes that part of a closed tool which acts as a guard;

(c) "power press" means a machine used in metal or other industries for mounding, pressing, blanking, raising drawing and similar purposes;

(d) "safety device" means the fencing and any other safeguard provided for the tools of a power press.

3. **Starting and stopping mechanism.**— The starting and stopping mechanism shall be provided with a safety stop so as to prevent over running of the press or descent of the ram during tool setting , etc.

4. **Protection of tool and die.**— (1) Each press shall be provided with a fixed guard with a slip plate on the underside enclosing the front and all sides of the tool.

(2) Each die shall be provided with a fixed guard surrounding its front and sides, and extending to the back in the form of a tunnel through which the pressed article falls to the rear of the press.

(3) The design, construction and mutual position of the guards referred to in (1) and (2) shall be such as to preclude the possibility of the worker's hand or fingers reaching the danger zone.

(4) The machine shall be fed through a small aperture at the bottom of the die guard, but a wider aperture may be permitted for second or subsequent operations if feeding is done through a chuta.

(5) Notwithstanding anything contained in sub-clauses (1) and (2), an automatic or an inter-locked guard may be used in place of a fixed guard, but where such guards are used they shall be maintained in an efficient working condition and if any guard develops a defect, the power press shall not be operated unless the defect of the guard is removed.

5. Appointment of persons to prepare power presses for use:—

(1) Except as provided in sub-paragraph (4), no person shall set, adjust or try out the tools on a power press or install or adjust any safety device thereon, being installation or adjustment preparatory to production of die proving, or carryout an inspection and test of any safety device thereon required by paragraph 8 unless he—

(a) has attained the age of eighteen years;

(b) has been trained in accordance with sub paragraph (2), and

(c) has been appointed by the occupier of the factory to carrry out those duties in respect of the class or description of power press or the class or description of safety device to which the power press or the safety device (as the case may be) belongs; and the name of every such person shall be entered in a register in Form No. 8.

(2) The training shall include suitable and sufficient practical instruction in the matters relating to each type of power press and safety device in respect of which it is proposed to appoint the person being trained.

6. **Examination and testing of power presses and safety device.**— (1) No power press or safety device shall be taken into use in any factory for the first time on any power press,unless it has been thoroughly examined and tested, in the case of a power press, after installation in the factory, or in the case of safety device, when in position on the power press in connection with which it is to be used.

(2) No power press shall be used unlesss it has been thoroughly examined and tested by a competent person within the immediately preceeding period of twelve months.

(3) No power press shall be used unless every device (other than fixed fencing) thereon has within the immediately preceding period of six months when in position on that power press, been thoroughly examined and tested by competent person.

(4) The competent person carrying an examination and test under the foregoing provision shall make a report of the examination and test containing the following particulars and every such report shall be kept readily available for inspection :

(a) name of the occupier of the factory;

(b) address of the factory;

(c) identification number or mark sufficient to identify the power press or the safety device;

(d) date on which the power press or the safety device was first taken into use in the factory;

(e) the date of each periodical thorough examination carried out as per requirements of sub-paragraph (2) above;

(f) particulars of any defects effecting the safety of the power press or the safety device found at any such thorough examination and steps taken to remedy such defects.

7. **Defects disclosed during a thorough examination and test.**—(1) Where any defect is disclosed in any power press or in any safety device by any examination and test under paragraph 6 and in the opinion of the competent person carrying out the examination and test, either—

(a) the said defect is a cause of danger to workers and in consequence, the power press or safety device (as the case may be) ought not to be used until the said defect has been remedied; or

(b) the said defect may become a cause of danger to workers and in consequence the power press or safety device (as the case may be) ought not to be used after the expiration of a specified period unless the said defect has been remedied,

such defect shall, as soon as possible after the completion of the examination and test, be notified, in writing, by the competent person to the occupier of the factory and, in the case of a defect falling within clause (b) of this sub-paragraph, such notification shall include the period within which, in the opnion of the competent person, the defect ought to be remedied.

(2) In every case where notification has been given under this paragraph, a copy of the report made under paragraph 6 (4) shall be sent by the competent person to the Inspector of the area within fourteen days of the completion of the examination and test.

INDEX

(3) Where any such defect is notified to the occupier in accordance with the foregoing provisions of this paragraph, the power press or safety device (as the case may be) having the saiddefect shall not be used—

(a) in the case of defect falling within clause (a) of sub- paragraph (1), until the said defect has been remedied, and

(b) in the case of defect falling within clause (b) of sub- paragraph (1), after the expiration of the specified period unless the said defect has been remedied.

(4) As soon as is practicable after any defect of which notification has been given under sub-paragraph (1) has been remedied, a record shall be made by or on behalf of the occupier stating the measures by which and the date on which the defect was remedied.

8. **Inspection and test of safety device.**— (1) No power press shall be used after the setting resetting or adjustment of the tool thereon unless a person appointed or authorized for the purpose under paragraph 5 has inspected and tested every safety device thereon while it is in position on the said power press :

Provided that an inspection, test and certificate as aforesaid shall not be required where any adjustment of the tools has not caused of resulted in any alternation to or disturbance of any safety device on the power press and if, after the adjustment of the tools, the safety device remain, in the opinion of such a person as aforesaid, in effecient working order.

(2) Every power press and every safety device thereon while it is in position on the said power press shall be inspected and tested by a trained person every day.

9. **Defects disclosed during an inspection and test.**

(1) Where it appears to any person as a result of any inspection and test carried out by him under paragraph 8 that any necessary safety device is not in position or is not properly in position on a power press or that any safety device which is in position on a power press is not in his opinion suitable he shall notify the manager forthwith.

(2) Except as provided in sub-paragraph (3) where any defect is disclosed in a safety device by any inspection and test under paragraph 8, the person carrying out the inspection and test shall notify the manager forthwith.

(3) Where any defect in a safety device is the subject of a notification in writing under paragraph 7 by virtue of which the use of the safety device may be continued during a specified period without the said defect having been remedied, the requirement in sub-paragraph (2) of this paragraph shall not apply the said defect until the said period has expired.

10. **Identification of power presses and safety devices.—**

For the purpose of identification, every power press and every safety device provided for the same shall be distinctively and plainly marked.

11. **Training and instructions to operators.**— The operators shall be trained and instructed in the safe method of work before starting work on any power press.

INDEX

12. **Exemptions.-** (1) If in respect of any factory, the Chief Inspector is satisfied that owing to the circumstances or infrequency of the processes or for any other reason, all or any of the provisions of this schedule are not necessary for the protection of the workers employed on any power press or any class or description of power press or in the factory, the Chief Inspector may by a certificate in writing (Which he may in his discretion revoke at any time), exempt such factory from all, or any of such provisions subject to such conditions, if any, as he may specify therein.

(2) Where such exemption is granted, a legible copy of the certificate, showing the conditions (if any) subject to which it has been granted, shall be kept posted in the factory in a position where it may be conveniently read by the persons employed.

SCHEDULE-VII

Shears, slitters and Guillotine Machines.

1. **Definition.-** For the purpose of this schedule.

(a) " guillotine" means a machine ordinarly equipped with straight, bevel-edged blade operating vertically against a stationary resisting edge and used for cutting metallic or non- metallic substances;

(b) 'shears" or "shearing machine" means a machine ordinarily equipped with straight, bevel-edged blades operating vertically against resisting edges. or with rotary, over tapping cutting wheels, and used for shearing metals or non-metallic substances;

(c) "Slitters" or "slitting machines" means a machine ordinarily equipped with circular disc-typeknives, and used for trimming or cutting into metal or non-metallic or for slitting them into narrow strips; for the purpose of this schedule, this term includes bread or other food slicers equipped with rotary knives or cutting discs.

2. **Guillotine and Shears.-** (1) Wherever practicable a barrier metal guard of strength shall be provided at the front of the knife, fastened to the machine frame and shall be so fixed as would prevent any part of the operator's body to reach the descending blade from above, below or through the barrier quardoor from the sides :

Provided that in case of machines used in the paper printing and allied industries, where a fixed barrier metal guard is not suitable on account of the height and volume of the material being fed, there shall be provided suitable starting devices which require simultaneous action of both the hands of the operator or an automatic device which shall remove both the hands of the operator from the danger zone at every descant of the blade.

(2) At the back end of such machines, an inclined guard shall be provided over which the slitplaces would slide and be collected at a safe distance in a manner as would prevent a person at the back from reaching the descending blade.

(3) Power-driven guillctine cutters except continuous feed trimmers, shall be equipped with-

(a) Starting device which require the simultaneous action of both hands to start the cutting motion and of at least one hand on a control during the complete stoke of the knife; or

(b) an automatic quard which shall remove the hands of the operator from the danger zone at every descent of the blade used in conjuction with one-hand starting device which require two distincts of the device

INDEX

to start the cutting motion, and so designed as to return positively to the non-starting position each complete cycle of the knife.

(4) Where two or more workers are employed at the same time on the same power-driven guillotine cutter equipped with two-hand control the device shall be so arranged that each worker shall be required to use both hands simultaneously on the safety trip to start the cutting motion and at least one hand on a control to complete the cut.

(5) Power-driven guillotine cutters other than continuous trimmer shall be provided in addition to the brake or other stopping mechanism with an emergency device which shall prevent the machine from operating in the event of failures of the brake when starting mechanism is in the non-starting position.

3. **Slitting Machines.-** (1) Circular disctype knives on machines for cutting metal and leather.paper, rubber texiles or other non- metallic substances shall, if within reach of operators standing on the floor or working level be provided with guards enclosing the knife edges at all times as near as practicable to the surface of the material and which may either—

(a) automatically adjust thermselves to the thickness of the material; or

(b) be fixed or manually adjusted so that the space between the bottom of the guard and the material shall not exceed 6 mm (1/4 in) at any time.

(2) Portions of baldes underneath the tables or benches of slitting machines shall be covered with guards.

4. **Index cutters and vertical paper sloters.-** Index cutters, and other machines for cutting strips from the ends of books and for similar operations, shall be provided with fixed guards, so arranged that the fingers of the operators cannot come between the blades and the tables.

5. **Corner Cutters.-** Corner cutters, used in the manufacture of paper-boxes, shall be equipped with—

(a) suitable guard, fastened to the machines in front of the knives and provided with slots or perforations to afford visibility of the operations: or.

(b) other guards equally efficient for the protection of the fingers of the workers.

6. **Band knives.-** Band wheels on band knives, and all portions of the blades except the working side between the sliding guide and the table on vertical machines, or between the wheel guards on horizontal machines, shall be completely enclosed with hinged guards of sheet metal not less than 1 mm (0.04 in) in thickness or of other material of equal strength.

10. In the said rules, for rule 55-A, the following shall be substituted, namely:-

"**55-A. Tight fitting clothing.-** A worker required to wear tight fitting clothing under sub-section(1) of section 22 shall be provided by the occupier with such clothing which consist of at least a pair of closely fitting full pants and closely fitting half slaves shirt or vest. Such clothing shall be returned to the occupier on termination of service or when new clothing is provided Such workers shall be paid washing allowance which shall not be less than Rs. 10/- per month."

11: In the said rules, for rule 57, the following shall be substituted, namely :-

"**57. : Employment of Young persons on dangerous machines.**

The machines specified in sections 28, 29, 30 and the following machines shall be deemed to be of such dangerous character that Young persons shall not work on them unless the provisions of sub-section (1) of section 23 are complied with :

(i) Power presses other than hydraulic presses,

(ii) milling machines used in the metal trades,

(iii) Guillotine machines;

(iv) Circular saws;,

(v) platen printing machines;,

12. In the said rules, for rule 61, the following shall be substituted, name;y :-

"61. : Pressure vessels or plant.- (1) Interpretation:- In this rule—

(a) 'design pressure' means the maximum pressure that a pressure vessels or plant is designed to withstand safety when operating normally:

(b) "maximum permissible working pressure" means the maximum pressure at which a pressure vessel or plant is permitted to be operated or used under this rule and is determined by the technical requirement of the process.

(c) "plant" means a system of piping that is connected to a pressure vessel and so used to contain a gas vapour or liquid under pressure greater than the atmospheric pressure and includes the pressure vessels.

(d) "pressure vessel" means a vessel that may be used for containing, storing, distributing, transferring, distilling, precessing or otherwise handling any gas, vapour or liquid under pressure greater than the atmospheric pressure and includes any pipeline fitting or other equipment attached thereto or used in connection therewith.

(2) **Exception .**--Nothing in this rule shall apply to--

(a) Vessels made of ferrous materials having an internal operating pressure not exceeding 1 kilogram per square centimeter;

(b) steam boilers, steam and feed-pipes and their fittings coming under the purview of the Indian Boilers Act, 1923;

(c) Metal bottles or cylinders used for storage or transport of compressed gases or liquified or dissolved gases under pressure covered by the Gas Cylinder Rules, 1981 framed under the Indian Explosives Act, 1884;

(d) Vessels in which internal pressure is due solely to the static heat of liquid;

(e) Vessels with a nominal water capacity not exceeding 500 litres connected in a water-pumping system containing air that is compressed to serve as a cushion.

(f) Vessels for unclear energy application;

INDEX

(g) refrigeration plant having a capacity of 3 tons or less of refreigerations in 24 hours; and

(h) working cylinders of steam engines or prime movers and steam trapes; turbine casings; compressor cylinders; steam seperators or dryers; steam strainers; steam de-super-heaters; oil separators; air receivers for fire sprinkler installations; air receivers of monotype machines provided maximum working pressure of the air receiver does not exceed 1.33 kilogrames per square centimeter and the capacity of 85 litres; air receivers of electrical circuit breakers; air receivers of electrical relays; air vessels on pumps, pipe coils accessories of instruments and appliances such as cylinders and piston assemblies used for operating relays and interlocking type of guards; vessels with liquids subjected to static heat only; and hydraulically operating other than any cylinders communicating with an air loaded accumulator.

(3) **Design and construction.**--Every pressure vessels or plant used in a factory--

(a) shall be properly designed on sound engineering practice;

(b) shall be of good construction, sound material, adequate strength and free from any patent defects; and

(c) shall be properly maintained in a safe condition :

Provided that the pressure vessels or plant in respect of the design and construction of which there is an Indian standard or a standard of the country of manufacture or any other law or regulation in force, shall be designed and constructed in accordance with the said standard, law or regulation, as the case may be, and a certificate thereof shall be obtained from the manufacturer or from the competent person which shall be kept and produced on demand by an Inspector.

(4) **Safety Devices :** Every pressure vessel shall be fitted with-

(a) a suitable safety valve or other effective pressure relieving device of adequate capacity to ensure that the maximum permissible working pressure of the pressure vessels shallnot be exceeded. It shall be set to operate at a pressure not exceeding the maximum permissible working pressure and when more than one protective device is provided, only one of the devices need be set to operate at the maximum permissible working pressure and the additional device shall be set to discharge at a pressure not more than 5 per cent in excees of the maximum permissible working pressure.

(b) a suitable pressure guage with a dial range not less than 1.5 times the maximum permissible working pressure, easily visible and designed to show at all times the correct internal pressure and marked with a prominent red mark at the maximum permissible working pressure of the pressure vessel;

(c) a suitable nipple end globe valve connected for the exclusive purpose of attaching a test pressure gauge for checking the accuracy of the pressure gauge referred to in clause (b) of this sub-rule;

(d) a suitable stop or valves by which the pressure vessel may be isolated from other pressure vessels or plant or source of supply of pressure. Such a stop valve or valves shall be located as close to the pressure vessel as possible and shall be easily accessible;

(e) a suitable drain cock or valve at the lowest part of the pressure vessel for the discharge of the liquid or other substances that may collect in the pressure vessel :

Provided that it shall be sufficient for the purpose of this sub- rule if the safety valve or pressure relieving device, the pressure gauge and the stop valve are mounted on a pipe line immediately adjacent to the

INDEX

pressure vessel and where there is a range of two or more simliar pressure vessel served by the same pressure lead, only set of such mountaings need be fitted on the pressure lead immediately adjacent to the range of pressure vessels provided they can not be isolated.

(5) **Pressure reducing devices.-**

(a) Every pressure vessel which is designed for a working pressure less than the pressure at the source of supply; or less than the pressure which can be obtained in the pipe connecting the pressure vessel with any other source of supply, shall be fitted with a suitable pressure reducing valve or other suitable automatic device to prevent the maximum permissible working pressure of the pressure vessel exceeded.

(b) To further protect the pressure vessel in the event of failure of the reducing valve or device, at least one safety valve having a capacity sufficient to release all the steam, vapour or gas without undue pressure rise as determined by the pressure at the source of supply and the size of the pipe connecting the source of supply shall be fitted on the low pressure side of the reducing valve.

(6) **Pressure vessel or plant being taken into use.**

(a) No new pressure vessel or plant shall be taken into use in a factory after coming into force of this rule unless it has been hydrostatically tested by a competent at a pressure at least 1, 3 times the designed pressure, and no pressure vessel or plant which has been previously used or has remained isolated or idle for a period exceeding 2 months or which has undergone alterations or repairs shall be taken into use in a factory unless it has been thoroughly examined by a competent person externally and internally if practicable and has been hydrostatically tested by the competent person at a pressure which shall be 1.5 times the maximum permissible working pressure :

Provided, however, that the pressure vessel or plant which is so designed and constructed that it can not be safely fitted with water or liquid or is used in service when even some traces of water can not be tolerated, shall be pneumatically tested at a pressure not less than the design pressure or the maximum permissible working pressure as the case may be ;

Provided further that the pressure vessel or plant is lined with glass shall be tested hydrostatically or pneumatically as required at a pressure not less than the design pressure or maximum permissible working pressure as the case may be.

Design pressure shall be not less than the maximum permissible working pressure and shall take into account the possible fluctuations of pressure during actual operation.

(b) No pressure vessel or plant shall be used in a factory unless there has been obtained from the maker of the pressure vessel or plant or from the competent person a certificatespecifying the design pressure or maximum permissible working pressure thereof and stating the nature of tests to which the pressure vessel or plant and its fittings (if any) have been subjected, and every pressure vessel or plant so used in a factory shall be marked so as to enable it to be identified as to be the pressure vessel or plant to which the certificate relates and the certificate shall be kept available for perusal by the Inspector.

(c) No pressure vessel or plant shall be permitted to be operated or used at a pressure higher than its design pressure, or the maximum permissible working pressure as shown in the certificates.

INDEX

(7) **In-service test and examinations.**

(a) Every pressure vessel or plant in service shall be thoroughly examined by a competent person.—

(i) externally, once in every period of six months:

(ii) internally, once in every period of twelve months :

Provided that if by reason of the construction of a pressure vessel or plant, a thorough internal examination is not possible, this examination may be replaced by a hydrostatic test which shall be carried out once in every period of two years :
Provided further that for a pressure vessel or plant in continuous process which cannot be frequently opened, the period of internal examination may be extended to four years: and

(iii) hydrostatically tested once in every period of four years:

Provided that in respect of a pressure vessel or plant with thin walls such as sizing cylinder made of copper or any other non-ferrous metal, periodic test may be dispensed with subject to the condition that the requirements laid down in sub-rule (8) are fulfilled:

Provided further that when it is impracticable to carry out thorough external examination of any pressure vessel or plant every six months as required in sub-clause (i) of this clause or if owing to its construction and use a pressure vessel or plant cannot be hydrostatically tested as required in sub-clause (ii) and (iii) of this clause thorough external examination of the pressure vessel or plant shall be carried out at least once in every period of two years and at least once in every period of four years a thorough systematic non-destructive test like ultrasonic test for metal thickness or other defects of all parts the failure of which might lead to eventual rupture of the pressure vessel or plant shall be carried out.

(b) The pressure for the hydrostatic test to be carried out for the purpose of this sub-rule shall be 1-25 times the design pressure or 1.5 times the maximum permissible working pressure whichever is less.

(8) **Thin walled pressure vessel or plant.**

(a) In respect of any pressure vessel or plant of thinwalls such as saizing cylinder made of copper or any other non-ferrous metal, the maximum permissible working pressure for every year of use after the first five years and no such cylinder shall be allowed to continue to be used for more than twenty years after it was first taken into use.

(b) if any information as to the date of construction, thickness of walls or maximum permissible working pressure is not available the age of such pressure vessel or plant shall be determined by the competent person in consultation with the chief Inspector from the other particulars available with the manager.

(c) Every new and second hand pressure vessel or plant of thin walls to which repair is likely to effect its strength or safety have been carried out, shall be tested before use to at least 1.5 times its maximum permissible working pressure.

(9) **Report by competent person.**

(a) if during any examination any doubt arises as to the ability of the pressure vessel or plant to work safely untill the next prescribed examination, the competent person shall enter in the prescribed register his observations and conclusions with other relevant remarks with reasons and may authorise the pressure

INDEX

vessel or plant to be used and kept in operation subject to a lowering of maximum permissible working pressure, or to more frequent or special examination or test or subject to both of these conditions.

(b) A report of every examination or test carried out shall be completed in Form No. 11 and shall be signed by the person making the examination or test and shall be kept available for perusal by the Inspector at all hours when the factory or any part thereof is working.

(c) Where the report of any examination under this rule specifies any condition for securing the safe working of any pressure vessel or plant the pressure vessel or plant shall not be used unless the specified condition is fulfilled.

(d) The competent person making report of any examination under this rule shall within seven days of the completion of the examination send to the Inspector a copy of the report in every case where the maximum permissible working pressure is reduced or the examination shows that the pressure vessel or plant or any part thereof cannot continue to be used with safety unless certain repairs are carriedout or unless any other safety measure is taken

(10) **Application of other laws.**

(a) The requirements of this rule shall be in addition to and without any prejudice to and not in derogation of the requirements of any other law in force.

(b) Certificate or reports of any examination or test of any pressure vessel or plant to which sub-rule (7) to (9) do not apply, conducted or requited to be conducted under any other law in force and other relevant record relating to such pressure vessel or plant, shall be properly maintained as required under the said law and shall be produced on demand by the Inspector.

13. In the said rules, after rule 61A, the following rule shall be inserted namely—

"61.B Reaction vessels and kettles.

(1) This rule applies to reaction vessels and kettles (herein after referred to as "reaction vessels") which normally work at the pressure not above the atmospheric pressure but in which there is likelihood of pressure being created above the atmospheric pressure due to reaction getting out of control or any other circumstances.

(2) In the event of the vessel being heated by electrical means, a suitable control device shall be provided to prevent the temperature exceeding the safe limit.

(3) Where steam is used for heating purposes in reaction vessel, it shall be supplied through a suitable automaic device to prevent the maximum permissible steam pressure being exceeded unless the pressure of the steam in the supply line itself can not exceed the said maximum permissible pressure.

(4) A suitable safety valve or require disc, of adequate size and capacity shall be provided to effectively prevent the pressure being built up in the reaction vessel beyond the safelimit. Effective arrangements shall be made to ensure that the released gases, fumes, vapours, liquids or dusts, as the case may be, are lead away and disposed of through suitable pipes without casuing any hazard flammable gases or vapours are likely to be vented out from the vessel the discharge end shall be provided with a flame arrestor.

(5) Every reaction vessel shall be provided with a pressure gauge having an appropriate range.

INDEX

(6) in addition to the device as mentioned in the above clauses, means shall be provided for automatically stopping the feed into the vessel as soon as process condition deviates from the normal limit to an extent which can be consided as dangerous.

(7) Where necessary, an effective system for cooling, flooring or blanketting shall be Provided for the purpose of controlling the reaction and process conditions within the safe limits of temperature and pressures.

(8) An automatic auditory and visual warning devices shall be provided for clear warning whenever process conditions exceed the present limits. This device wherever possible shall be integrated with automatic process correction system.

(9) A notice pointing out the possible circumstances in which pressure above atmospheric pressure may be built up in the reaction vessel, the dangers involved and the precautions to be taken by the operators shall be displayed at the conspicuous place near the vessel.

14. In the said rules, in rule 63, for Schedule-I and Schedule- II, the following Schedule-I and Schedule- II shall be substituted, namely :-

SCHEDULE -I

(1) Breaking, cutting, dressing or carving of bricks, stone, concrets, stag or similar materials by means of a hammer, chisel, pick or similar hand tool, or by means of a portable tool driven by mechanical newer, and the dry grinding of surfaces of any such material by means of a wheel or disc driven by mechanical power, in any of the forgoing cases, particles or fragments are liable to be thrown off towards the face of the operator in the course of the process.

(2) Dry grinding of surface of metal by applying them by hand to a wheel, disc or driven by mechanical Power, and of surface of metal means of a portable tool driven by mechanical power.

(3) Dividing into separate parts of metal, bricks, stone. concrets or similar materials by means of a high speed saw driven by mechanical power or by means of an abrasive cutting off wheel or disc driven by mechanical power.

(4) Turning of metals or articles of metal, where particles or fragments are liable to be thrown off towards the face of the operator in the course of process

(5) Drilling by means of potable tools, where particles or fragments are liable to be thrown off towards the face of the operator in the course of the process.

(6) Welding and cutting of metals by means of an electric, oxy- aceaty lene or similar process.

(7) Hot felling of steel castings by means of a fluxinjected burner or air torch, and de-seaming of metal.

(8) Felling of metal castings involving the removal of metal- including runners, gates and risers, and removal of any other material during the course of such fetting.

(9) chipping of metal, and chipping, knocking out, cutting out or cutting off of cold rivets,bolts, nuts, lugs, pins, collars or similar articles from any structure or plant. or from part of any structure or plant, by means of a hammer, chisel, punch or similar hand tool, or by means of portable tool driven by mechanical power.

INDEX

(10) Chipping or scurfing of paint, scals, rust or other corrosion from the surface of metal and other hard materials by means of a hand tool or by a portable tool driven by mechanical power.

(11) Breaking of scrap metal by means of a hammer or by means of a tool driven by mechanical power.

(12) Rounding of metal, where particles or fragments are liable to be thrown off towards the face of the operator in the course of the process.

(13) Work with drop hammers and power hammers used in either case for the manufacture of forgings, and work by any person not workig with such hammers, whose work is carried on in such circumstances and in such a position that particles or fragments are liable to be thrown off towards his face during work with drop hammers or power hammers

(14) Work at a furnace where there is risk to the eyes from molten metal.

(15) Pouring or skimming of molten-metal.

(16) Work involving risk to the eyes from hot sand being thrown off.

(17) Truing or dressing of an abrasive wheel.

(18) Handling in open vessels or manipulation of strong acids or dangerous corrosive liquids or materials, and operation, maintenance or dismantling of plant or any part of plant, being plant or part of plant which contains or has contained such acids, liquids or materials, unless the plant or part of plant has been so prepared (by isolation, reduction of pressure, or otherwise). treated or designed and constructed as to prevent risk of injury.

(19) Any other process wherein there is a risk of injury to eyes from particles or fragments thown of during the course of the process.

SCHEDULE - II

(1) Welding or cutting of metals by means of an electrical, oxy- acetylene or similar process.

(2) All work on furnances where there is risk of exposure to excessive light or intra-red radiations.

(3) Process such as rolling casting or forging of metals, where there is risk of exposure to excessive light or intra-red radiations.

(4) Any other process wherein here is a risk of injury to eyes from exposure to excessive light or intra-red or ultraviolet radiations.

15. In the said rules, after rule 66, the following rule shall be inserted, namely :-

"66.A. Fire protection.—(1) Processes, equipment, plant, involving serious explosion and serious fire hazards,-

(a) All processes, storage, equipments, plants etc. involving serious explosion and flash fire hazard shall be located in segregated buildings where the equipment shall be so arranged that only a minimum number of employees are exposed to such hazards at any one time.

(b) All industrial processes involving serious fire hazard shall be located in buildings or work places separated from one another by walls of fire-resistant construction.

INDEX

(c) Equipment and plant involving serious fire or flash fire hazard shall, wherever possible, be so constructed and installed that in case of fire-they can be easily isolated.

(d) Ventilation ducks, pneumatic and similar equipment involving a serious fire risk should be provided with flame-arresting or automatic fire extinguishing appliances, or fire resisting dampers electrically inter locked with heat sensitive/smoke detectors and the air-conditioning plant system.

(e) In all work places having serious fire or flash fire hazards, passages between machines, installation or piles of material should be at least 90 cm wide for storage piles. The clearance between the ceilling and the top of the pile should not be less than 2m.

(2) Access for the fighting.-

(a) Buildings and plants shall be so laid out and roads, passage ways etc. so maintained as to permit unobstructed access for the fighting.

(b) Doors and window opening shall be located in suitable positions on all external walls of the building to provide easy access to the entire area within the building for the fighting.

(3) Protection against lightening.- Protection from lightening shall be provided for—

(a) building in which explosive or highly flammable substances are manufactured, used, handled or stored.

(b) storage tanks containing oils, paints, or other flammable liquids.

(c) grain elevators;

(d) buildings, tall chimneys or stacks where flammable gases, fumes, dust or plant are likely to be present;

(e) sub-station buildings and out-door transformers and switch-yards.

(4) Precautions against ignition.-Wherever there is danger of fire or explosion from accumulation of flammable or explosive substances in air—

(a) all electrical apparatus shall either be excluded from the area of risk or they shall be of such construction and so installed and maintained as to prevent the danger of their being a source of ignition;

(b) effective shall be adopted for prevention of accumulation of static charges to a dangerous extent:

(c) Workers shall wear shoes without iron or steel nails or any other exposed ferrous materials which is likely to cause sparks by friction:

(d) smoking, lighting or carrying of matches-lighters shall be prohibited:

(e) transmission belts with iron fasteners shall not be used; and

(f) all other precautions, as are reasonably practicable, shall be taken to prevent initiation of ignition from all other possible sources such as open flames frictional sparks, overheated surfaces of machinery or plant, chemical or physical-chemical reaction and radiant heat.

INDEX

(5) Spontaneous ignition.--Where materials are likely to induce spontaneous ignition, care shall be taken to avoid formation of air pocket and to ensure adequate ventilation. The material susceptible to spontaneous ignition should be stored in dry condition and should be in heaps of such capacity and separated by such passage which shall prevent fire. The materials susceptible to ignition and stored in the open shall be at a distance not less than 10 meters away from process or storage buildings.

(6) Cylinders containing compressed gas.--Cylinders containing compressed gas may only be stored in open if they are protected against excessive variation of temperature, direct rays of sun, or continuous dampness. Such cylinders shall never be stored near highly flammable substances, furnaces or hot processes. The room where such cylinders are stored shall have adequate ventilation.

(7) Storage of flammable liquids—

(a) The quantity of flammable liquids in any work room shall be minimum required for the process or processes carried on in such room. Flammable liquids shall be stored in suitable containers with close fitting covers :

Provided that not more than 20 litres of flammable liquids having a flash point or 210 C or less shall be kept por stored in any work room.

(b) Flammable liquids shall be stored in closed containers and in limited quantities in well ventilated rooms of fire resisting construction which are isolated from the reminder of the building by fire walls and self closing fire doors.

(c) Large quantities of such liquids shall be stored in isolated.adequately ventilated building of fire resisting construction or in storage tanks, preferably underground and at a distance from any building as required in the Petroleum Rules, 1976.

(d) Effective steps shall be taken to prevent leakage of such liquids into basements, sumpsor drains and to confine any escaping liquid within safe limits.

(8) Accumulation of flammable dust, gas, fume or vapour in air or flammable waste material on the floors.

(a) Effective steps shall be taken for removal or prevention of the accumulation in the air or flammable dust, gas, fume or vapour to an extent which is likely to be dangerous.

(b) No waste material of a flammable nature shall be permitted to accumulate on the floors and shall be removed at least once in a day or in every shift, and more often possible. Such material shall be placed in suitable metal containers with covers wherever possible.

(9) Fire exits :-

(a) In this rule .-

(i) "horizontal exit" means an arrangement which allows alternative egress from a floor area to another floor at or near the same level in an adjoining building or an adjoining part of the same building with adequate separation; and

(ii) "travel distance" means the distance an occupant has to reach an exit.

(b) An exit may be a doorway, corridor, passageway to an external stairway or to a verandah or to an internal stairway segregated from the rest of building by the fire resisting walls which shall provide continuous and protected means of egress to the exterior of a building or to an exterior open space. An exit may also include a horizontal exit leading to a adjoining building at the same level.

INDEX

(c) Lifts, escalators and revolving doors shall not be considered as exits for the purpose of this sub-rule.

(d) In every room of a factory exits sufficient to permit safe escape of the occupants in case of fire or other emergency shall be provided which shall be free of any obstruction.

(e) The exits shall be clearly visible and suitably illuminated with suitable arrangement, whatever artificial lighting is to be adopted for this purpose, to maintain the required illumination in case of failure of the normal source of electric supply.

(f) The exits shall be marked in a language understood by the majority of the workers.

(g) Iron rung ladders or spiral staircases shall not be used as staircases.

(h) Fire resisting doors or roller shutters shall be provided at appropriate places along the escape routes to prevent spread of fire and smoke, particularly at the entrance of lifts or stairs where funnel or flue effect may be created inducing an upward of fire.

(i) All exits shall provide continuous means of egress to the exterior of a building or to an exterior open space leading to a street.

(j) Exits shall be so located that the travel distance to reach at least one of them on the floor shall not exceed 30 metres.

(k) In case of those factories where high hazard materials are stored or used, the travel distance to the exit shall not exceed 22.5 metres and there shall be at least two ways of escape from every room, however small, except toilet rooms, so located that the points of access thereto are out of or suitably shielded from areas of high hazard.

(l) Wherever more than one exit is required for any room space or floors, exit shall be placed as remote from each other as possible and shall be arranged to provide direct access in separate directions from any point in the area served.

(m) The unit of exit width used to measure capacity of any exit shall be 50 cm. A clear width of 25 cm. shall be counted as an additional half unit. Clear width of less than 25 cm shall not be counted for exit width.

(n) Occupants per unit width shall be 50 for stairs and 75 for doors.

(o) For determining the exits required the occupant load shall be reckoned on the basis of actual number of occupants within any floor area or 10 square metres per person, whichever is more.

(p) There shall not be less than two exits serving every floor area above and below the ground floor, and at least one of them shall be internal enclosed stairway.

(q) For every building or structure used for storage only, and every section thereof considered separately, shall have access to at least one exit so arranged and located as to provide a suitable means of escape for any person employed therein, and in any such room wherein more than 10 persons may be normally present, at least two separate means of exit shall be available, as remote from each other as practicable.

(r) Every storage area shall have access to at least one means of exit which can be readily opened.

INDEX

(s) Every exit doorway shall open into an enclosed stairway, a horizontal exit on a corridor or passageway providing continuous and protected means of egress.

(t) No exit doorway shall be less than 100 cm. in width, doorways shall be not less than 200 cm. in height.

(u) Exit doorways shall open outwards, that is, away from the room but shall not obstruct the travel along any exit No door when opened, shall reduce the required width of stairway or landing to less than 90 cm. Over head or sliding doors shall not be installed for this purpose.

(v) An exit door shall not open immediately upon a flight of stairs. A landing at least 1,5 m X 1.5 m in size shall be provided in the stairway at each door way. The level of landing shall be the same as that of the floor which it serves.

(w) The exit doorways shall be openable from the side which they serve without the use of a key.

(x) Exit corridors and passageways shall be of a width not less than the aggregate required width of exit doorways leading from there in the direction of travel to the exterior.

(y) Where stairways discharge through corridors and passageways, the height of the corridors and passageways shall not be less than 2,4 metres.

(aa) A staircase shall not be arranged round a lift shaft unless, the latter is totally enclosed by a material having a fire- resistance rating not lower than that of the type of construction of the former.

(bb) Hollow combustible construction shall not be permitted.

(cc) The minimum width of an internal staircase shall be 100 cm.

(dd) The minimum width of treads without nossing shall be 25 cm. for an internal staircase. The treads shall be constructed and maintained in a manner to prevent slipping.

(ee) The maximum h ight of a riser shall be 19 cm and the number of risers shall be limited to 12 per flight.

(ff) Hand rails shall b provided with a minimum height of 100 cm and shall be firmly supported.

(gg) The use of spiral stair e shall be limited to low occupant load and to a building of height of 9 metres, unless they are connec d to platfroms such as balconies and terraces to allow escapes to pause. A spiral staircae shall be not l s 300 cm. in diameter and have adequate head room.

(hh) The width of a horizontal exit shall be same as for the exit doorways.

(ii) The horizontal exit shall be equipped with at least one fire door of self-closing type.

(jj) The floor area on the opposite or refuge side of a horizontal exit shall be sufficient to accommodate occupants of the floor area served, allowing not less than 0.3 square meter per person. The refuge area shall be provided with exits adequate to meet the requirements of this sub-rule. At least one of the exits shall lead directly to the exterior or street.

(kk) Where there is difference in level between connected areas for horizontal exit, ramps not more than 1 in 8 slop. shall be provided. For this purpose steps shall not be used.

INDEX

(ll) Doors in horizontal exits shall be openable at all times.

(mm) Ramps with a slope of not more than 1 in 10 be substituted for the requirements of staircase. For all slopes exceeding 1 in 10 and wherever the use is such as to involve danger of slipping, the ramp shall be surfaced with non-slipping material.

(nn) In any building not provided with automatic fire alarm a manual fire alarm system shall be provided if the total capacity of the building is over 500 persons, or if more than 25 persons are employed above or below the ground floor, except that no manual fire alarm shall be required in one-story buildings where the entire area is undivided and all parts thereof are clearly visible to all occupants.

(10) *First-aid, fire fighting arrangements* .—

(a) In every factory there shall be provided and maintained adequate and suitable fire fighting equipment for fighting fires in the early stages, those being referred to as first-aid fire fighting equipment in this rule.

(b)The types of first-aid fire fighting equipment to be provided shall be determined by considering the different types of fire risks which are classified as follows :--

(i)"Class A fire"--Fire due to combustible materials such as wood, textiles, paper, rubbish and the like.

1."Light hazard",--Occupancies like offices, assembly halls, canteens, rest-rooms, ambulance rooms and the like;

2."Ordinary hazard"--Occupancies like saw mills, carpentary shop, small timber yards, book binding shop, engineering workshop and the like;

3."Extra hazard"--Occupancies like large timber yards, godowns storing fibrous materials, flour mills, cotton mills, jute mills, large wood working factories and the like;

(ii)"Class B fire"--Fire in flammable liquids like oil, petroleum products, solvents, grease, paint, etc.

(iii)"Class C fire"--Fire arising out of gaseous substances.

(iv)"Class D fire"--Fire from reactive chemicals, active metals and the like.

(v)"Class F fire"--Fire involving electricalequipment and delicate machinery and the like.

(c)The number and type of first-aid fire fighting equipment to be provided for "light hazard" occupancy shall be as given in schedule 1. For "ordinary hazard or extra hazard" occupancies equipment as given in para 12 shall be provided in addition to that given in Schedule 1.

(d)The first-aid fire fighting equipment shall conform to the relevant Indian Standards.

(e)As far as possible the first-aid fire fighting equipment shall all be in similar in shape and appearance and shall have the same method of operation.

(f)All first-aid fire fighting equipment shall be placed in a conspicuous position and shall be readily and easily accessible for immediate use. Generally, these equipments shall be placed as near as possible to the exits or stair landing or normal routes of escape.

INDEX

(g) All water buckets and bucket pump type extinguishers shall be filled with clean water. All sand buckets shall be filled with clean dry and fine sand.

(h) All other extinguishers shall be charged appropriately in accordance with the instructions of the manufacturer.

(i) Each first-aid fire fighting equipment shall be allotted a serial number by which it shall be referred to in the records. The following details shall be painted in white paint on the body of each equipment.

1. Serial Number;

2. Date of last refilling; and

3. Date of last inspection.

(j) First-aid fire fighting equipment shall be placed on platforms or in cabinets in such a way that their botom is 750 mm above the floor level. Fire buckets shall be placed on hooks attached to a suitable stand or wall in such a way that their bottom is 750 mm above the floor level. Such equipment if placed outside the building, shall be under sheds or covers.

(k) All extinguishers shall be thoroughly cleaned and re-charged immediately after discharge. Sufficient refill material shall be kept readily available for this purpose at all times.

(l) All first-aid fire fighting equipment shall be subjected to routine maintenance, inspection and testing to be carried out by properly trained persons. Periodicity of the routine maintenance, inspection and test shall conform to the relevant Indian Standards.

(1-1) Other fire-fighting arrangements.--

(a) In every factory, adequate provision of water supply for the fire fighting shall be made and where the amount of water, required in litres pere minute, as calculated from the formula A+B+C+D divided by 20 is 550 or more, power driven trailer pumps of adequate capacity to meet the requirement of water as calculated above shall be provided and maintained. In the above formula--

A =the total area in square meters of all floors including galleries in all buildings of the factory;

B =the total area in square meters of all floors and galleries including open spacesin which combustible materials are handled or stored;

C =the total area in square meters of all floors over 15 meters above ground level; and

D =the total area in square meters of all floors of all building other than those of fire resisting construction:

Provided that in areas where the fire risk involved does not require use of water, such areas under B, C or D may, for the purpose of calculation be halved :

Provided further that where the area under B, C or D are permanent automatic fire fighting installations approved by any fire association or fire insurance company, such areas may, for the purpose of calculation, be halved :

INDEX

Provided also that where the factory is situated at not more than 3 kilometers from an established city or town fire service, the pumping capacity based on the amount of water arrived at by the formula above may be reduced by 25% but no account shall be taken of this reduction in calculating water supply required under clause (a).

(b)Each trailer pump shall be provided with equipment as per schedule II appended to this rule. Such equipment shall conform to the relevant Indian Standards.

(c)Trailer pumps shall be housed in a separate shed which shall be sited close to a principal source of water supplies in the vicinity of the main risk of the factory.

(d)In factories where the area is such as cannot be reached by man-hauling of trailer pumps within reasonable time, vehicles with towing attachment shall be provided at the scale of one every four trailer pumps with a minimum of one such vehicle kept available at all times.

(e) Water supply shall be provided to give flow of water as required under clause (a) for at least 100 minutes. At least 50% of this water supply or 450,000 litres whichever is less, shall be in the form of static tanks of adequate capacities (not less than 450,000 litres Each0 distributed round the factory with due regard to the potential fire risks in the factory. Where piped supply is provided, the size of the main shall not be less than 15 centimeters diameter and it shall be capable of supplying a minimum of 4500 litres per minute at a pressure of not less than 7 kilograms per square centimeter.

(f) All trailer pumps including the equipment provided with them and the vehicles for towing them shall be maintained in good condition and subjected to periodical inspection and testing as required.

(12) Personnel in charge of equipment and for fire-fighting fire- drills, etc.--

(a)The first-aid and other fire-fighting equipment to be provided as required in sub-rules (10) and (11) shall be in charge of a trained responsible person.

(b)Sufficient number of persons shall be trained in the proper handling of fire fighting equipment as referred to in clause (a) and their use against the type of fire for which they are intended to ensure that adequate number of persons are available for fire fighting both by means of first-aid fire fighting equipment and others. Such persons shall be provided with clothing and equipment including helmets, belts and boots, preferably gumboots. Wherever vehicles with towing attachments are to be provided as required in clause (d) of sub-rule (11), sufficient number of persons shall be trained in driving these vehicles to ensure that trained persons are available for driving them whenever the need arises.

(c)Fire fighting drills shall be held as often as necessary and atleast once in every period of 2 months.

(13) Automatic sprinklers and fire hydrants shall be in addition and not in substitution of the requirements in sub-rule (10) and (11).

SCHEDULE—I

First Aid Fire-Fighting Equipments

(1) The different types offires and first aid fire fighting equipments suitable for use on them are as under :

	Class of Fire	Suitable types of Appliances
A.	Fires in ordinary combustibles (wood, vegetable, fibres, paper & the like)	Chemical Extinguishers of soda acid, Gas/Expelled water and anti-freeze types, and water buckets.

INDEX

B.	Fires inflammable liquids, paints, grease, solvents and the likes.	Chemical Extinguishers of foam, Carbon dioxide and dry powder types an sand buckets.
C.	Fires in gaseous substances under pressure.	Chemical Extinguishers of carbon dioxide and dry powder types.
D.	Fires in Reactive Chemicals, active metals and the like.	Special type of dry powder extinguishers ans sand buckets.
E.	Fires in electrical equipment. carbon dioxide and dry powder type and sand buckets.	Chemical extinguishers of carbon dioxide and dry power type and sand buckets.

(2) One 9 litres water-bucket shall be provided for every 100Sq.m. of the floor area or part thereof and one 9 litres water type extinguishers shall be provided to six buckets or part thereof with a minimum of one extinguisher and two buckets per compartment of the building. Buckets may be dispensed with, provided supply of extinguishers is double than that indicated above.

(3) Acceptable replacement for water buckets and water type extinguishers in occupancies where class B fires are anticipated, are as under :

Acceptable Replacement	Buckets of Water			Water type extinguishers
	For one bucket		for three buckets	For each 9 ltrs. extinguishers.
1	2	3	4	5
Dry sand Carbon dioxide Extinguishers	1 bucket kg.		3 buckets 9 kg. (In not less than 2 exti-guishers).	— 9 kg.
Dry powder	2kg.		5kg. extinuishers)	5 kg.
Foam extin-guishers.	9 litre	9 litres	9 litres	9 litres

(4) The following provisions shall be complied with if class E fires are anticipated;

(a) For rooms containing electrical transformers, switchgears, motors and/or other electrical apparatus only, not less then (two) 2kg. Dry powder or Carban Dioxide type extinguishers shall be provided within 15 m. of the apparatus.

(b) Where motors and/or other electrical equipments are installed inrooms other then those containing such equipment only, one 5kg. Dry powder or Carban dioxide Extinguisher shall be installed within 15m. of such equipment in addition to the requirements mentioned at (3) and (4) above. For this purpose the same extinguisher may be dmmed to affoed protection to all apparatus within 15m. thereof.

INDEX

(c) where electrical motors are installed on platform, one 2 kg. Dry powder or Carbon Dioxide type extinguisher shall be provided on or below each platforms, In case of a long platform with a number of motors, one extinguisher shall be acceptable as adequate for every 3 months on the common platform. The above requirements shall be in addition to the requirements mentioned at item (3) & (4) above.

(5) The first-aid fire-fighting equipments shall be so distributed over the entire floor area that a person has to travel not more than 15m. to reach the nearest equipment.

(6) Selection of sites for the installation of first-aid fire- fighting equipment.—

(a) While selecting sites for first aid fire fighting equipment shall be given to the nature of the risk to be covered. The equipments shall be placed in conspicuous positions and shall be readily accessible for immediate use in all parts of the occupancy. It shall always be borne in mind while selecting sites that first aid fire fighting equipments are intended only for use on incipient fires and their valves may be negligible if the fire is not extinguished or brought under control in the early stages.

(b) Buckets and extinguisgers shall be placed at convenient and easily accessible locations either on hangers or on stands in such a way that their bottom is 750 mm above the floor level.

(7) The operating instructions of the extinguishers shall not be defaced or obliterated. In case the operating instructions are obliterated or have become illegible due to passage of time fresh transfers of the same shall be obtaines from the manufacturers of the equipment and affixed to the extinguishers.

SCHEDULE—II

Equipments to be provided with Trailer pump.

For light trailer pump of a capacity of 680 liters/minute

1	Armored suction house of 9 meters length, with wrenches
1	Metal suction strainers
1	Basket strainer
1	Two-way suction collection head
1	Suction adapter
10	Unlined or rubber lined 70 mm delivery hose of 25 meters length complete with quick-release couplings.
1	Divding breaching-piece
2	Branch-piece with 15 mm nozzies
1	Diffuser nozzle
1	Standpipe with blank cap
1	Hydrant key
4	Collapsible canvas buckets
1	Fire hook (preventor) with cutting edge
1	25 mm manlla rope of 30 meters length
1	Extension ladder of 9 meters length (where necessary)
1	Heavy axe
1	Spade
1	Pick axe
1	Crowbar
1	Saw
1	Hurricane lamp
1	Electric torch
1	Pair of rubber gloves

For large trailer pump of capacity of 1800 liters/minute

1	Armored suction hose of 9 meters length, with wrenches
1	Metal strainer
1	Baskes strainer
1	Three-way suction collecting-head
1	Section adapter
14	unlined or rubber lined 70 mm delivery hose of 25 meters length complete with quick-release couplings
1	Dividing breaching-piece
1	Collecting breaching-piece
4	Brench pipes with one 25 mm, two 20 mm and one diffuser nozzles
2	Standpipe with blank caps
2	Hydrant keys
6	Collapsible canvas buckets
1	Coiling hook (preventor) with cutting edge
1	50 mm manila rope of 30 meters length
1	Extension ladder of 9 meters length (where necessary)
1	Heavy axe
1	Spade
1	Plack axe
1	Crawbar
1	Hurricane lamp
1	Electric torch
1	Pair rubber gloves.

Note : if it appears to the Chief Inspector of Factories that in any factory the provision of breathing apparatus is necessary, he may, by order in writing, require the occupier to provide suitable breathing apparatus in addition to the equipments for light trailer pump or large traller pump, as the case may be".

16- In the said rules, after rule 68-A, the following rules shall be inserted, namely :-

"68-B : Quality of personal protective equipments.

All personal protective equipments provided to workers as required under any of the provisions of the Act or Rules shall conform to the relevant Indian Standards, if any.

68-C : Precautions and examination of machine :

(1) The following precautions shall be taken when fabrics are processed on polymerising or curing machine for fixing prints by Emulsion Technique, namely :

(i) printed fabrics shall be thoroughly dried by passing them over cylinders or thoroughly dried by other equally effective means, before the same are allowed to pass through the polymerising machine.

(ii) The exhaust flap or damper shall be provided with a hold or opening, so that at least 2/3rd of it is always open.

(iii) Infratred ray heaters of the machine shall be cut off while running the prints.

(iv) The electrical heater shall be connected to a separate circuit and shall be provided with an isolated switch so as to ensure that it is completely cut off in an emergency.

INDEX

(v) The electrical heater shall be so located that if there is any dropping of the solvent due to condensation, it does not directly come in contact with heaters.

(vi) The drive of the exhaust fan shall be interlocked with the main drive of the machine in such a way that if the exhaust motor stops, the machine including all heating devices, shall also stop.

(vii) The electrical heaters shall have themostates to regulate the temperature, so that the heaters shall be automatically cut off, if the temperature rises above the pre-set valve.

(viii) Adequate flaps shall be provided on top of the machine which can open and let off the fumes outside the work- room in case of an explosion or in case any pressure is built up.

(ix) Filter gauge shall be cleaned at least once a week.

(x) Exhaust dust shall be cleaned at least once a week.

(xi) Tension of the V-Belt drive of the fans shall be checked every week.

(2) The machine shall be examined under the direct supervision of a responsible person, designated by the occupier or Manager, who by his experience and knowledge of necessary precautions, against risk of explosion, is fit to supervise such work.

(3) A register shall be maintained in which the details of the various checks carried under sub-rule (2) shall be entered and every entry made therein shall be signed by the person making the checks.

68-D : Thermic fluid heaters.-

(1) All heaters shall be of such construction that coils are removable for periodic cleaning, visual inspection and hydraulic test.

(2) Suitable arrangements shall be made for cooling the furnace effectively in case of power failure.

(3) Before restarting the furnace, it shall be effectively purged.

(4) Velocity of flow of the themic fluid shall not be allowed to fall below the minimum recommended by the manufacturers while the heater is in operation.

(5) The thermic fluid shall be circulated in a closed circuit formation with an expansion cum-deaerator tank. The tank shall be located outside the shed where the heater is installed.

(6) Every heater shall be provided with a Photo-register actuated audio-visual alarm to indicate flame failure and automatic burner cut off.

(7) The stack temperature monitor-cum-controller with audio- visual alarm shall be provided so as to warm the operator in case the outlet temperature exceeds the specified minimum.

(8) Where inspection doors are provided on the furnace they shall be interlocked with the burner itself so that they cannot be opened until burner is shut off and furnace is colled sufficiently.

(9) All heaters shall also be provided with the following safety devices :–

(a) level control in the expansion tank;

INDEX

(b) temperature control of thermic fluid;

(c) differential pressure switch on the out-let line of the heater tubes; and

(d) temperature control device for the fuel oil supply to the burner.

(10) All devices mentioned in clause (9) shall have interlolocking arrangement with burner so that in case of any predetermined limits being crossed, the supply of fuel and air to burner shall automatically be cut-off.

(11) All safety interlocks when operated shall be indicated on the control panel of the heater by a suitable audio visual alarm.

(12) Every heater unit shall be provided as a standard accessory an arrangement for sniffing with low pressure stem or nitrogen for putting out the fire.

(13) Electronic panel for the heater shall be located near the heater but not so close as to be exposed to spilling or leaking oil.

(14) The heater shall be located in a place segregated from other manufacuring activities.

(15) Explosion vent shall be so installed that release takes place at safe location.

(16) The heater coil shall be subjected to pressure test by competent person once atleast in every 12 month The test pressure shall not be less than twice the operating pressure.

(17) If repairs are carried out to the coil it shall be tested before taking it into use.

(18) The thermic fuild shall confirm to the specifications prescribed by the manufacturers and shall be tested by competent person for suitability at least once in every three months period .Such test shall include test for acidity, suspended matter, ash viscosity and than point.

(19) Cleaning of the internal surface of the heater or soot and checkup of refractory surface on the inside shall be carriedout every month or as often as required depending upon workig conditions. The coils shall be removed and surface of the coils cleaned thoroughly once at least in a period of six months. The burner, nozzies, oil filters and pumps shall be cleaned once a week during the period of use.

(20) A separate register containing the following information shall be maintained :-

(a) weekly checks carried confirming the effectiveness of the interlock;

(b) weekly checks confirming that all accessories are in good state of repairs; and

(c) information regarding fuel oil temperature, pressure, themic fluid inlet/outlet pressure and temperature, fuel gas temperature, recorded at 4 hourly interval.

(21) The heater, when in operation shall always be kept in charge of a trained operator.

68-E : Fragile roots : Provision of crawling boards, etc.

In any factory, no person shall be required to stand or pass over or work on or near any roof or ceiling which is at a height of more than three meters covered with fragile materials through which he is liable to fall,in case it breaks or gives way unless :

(a) suitable and sufficient ladders, duck ladders or crawing boards, which shall be securely supported are provided and used, and

(b) a permit to work on the fragile roof is issued to him each time he is required to work thereon by a responsible person of the factory concerned.

68-F : Safety Committee :

(1) In every factory wherein 250 or more workers are ordinarily employed, there shall be a Safety Committee.

(2) The representatives of the management on Safety committee shall include-

(a) a senior official, who by his position in the organisation can contribute effectively to the functioning of the Committee, shall be the chairman;

(b) a safety officer and a Factory Medical officer wherever available and the safety officer in such a case shall be the secretary of the Committee;

(c) a representative each from the production, maintenance and purchase departments.

(3) The workers representatives on this Committee shall be elected by the workers.

(4) The tenure of the committee shall be two years.

(5) Safety Committee shall meet as often as necessary but at least once in every quarter, The minutes of the meeting shall be recorded and produced to the Inspector on demand.

(6) Safety Committee shall have the right to be adequately and suitably informed of-

(a) Potential safety and health hazards to which the workers may be exposed at workplace.

(b) data on accidents as well as data resulting from surveillance of the working environment and the health of workers exposed to substances So far as the factory is concerned, provided that the committee undertakes to use the data on a confidential basis and solely to provide guidance and device measures to improve the working environment and the health and safety of the workers.

(7) Functions and duties of the safety Committee shall include-

(a) assisting and co-operating with the management in achieving the aims and objectives outlined in the 'Health and safety policy ' of the occupier;

(b) dealing with all matters concerning health, safety and environment and to arrive at practicable solutions to problems encountered;

(c) creating safety awareness amongst all workers;

(d) undertaking educational, training and promotional activities;

(e) discussing reports on safety. environmental health surveys, safety audits, risk assessment, emergency and disaster management pints and Implementation of the recommendations made in the reports;

INDEX

(f) carrying out health and safety surveys and identifying causes of accidents;

(g) Looking into any complaint made on the likelihood of an imminent danger to the safety and health of the workers and suggesting corrective measures; and

(h) reviewing the implementation of the recommendations by it.

(8) Where owing to the size of the factory, or any other reason, the functions referred to in sub-rule (7) cannot be effectively carried out by the Safety Committee, it may establish sub-committee as may be required to assist it.

68-G: Ovens and Driers. (1) *Application.*—This rule shall apply to ovens and driers, except those used in laboratories or kitchens of any establishment and those which have a capacity below 325 litres.

(2) *Definition*—For the purpose of this Rule, oevn or drier means any enclosed structure,recaptacle, compartment or box which is used for backing, drying or otherwise processing of anyarticle or substance at a temperature higher than the amblient temperature of the air, in the room or space in which the oven or drier is situated, and in which a flammable or explosive mixture of air and a flammable substance is likely to be evolved within the enclosed structure, receiptacle, compartment or box or part thereof on account of the article or substance which is baked, dried or otherwise processed within it.

(3) *Separate electrical connection.*— Electrical power supplied to every oven or driershall be by means of a separate circuit provided with an isolation switch.

(4) *Design, construction, examination and testing.*—

(a) Every oven or drier shall be properly designed on sound engineering practice and be of good construction, sound materials and adequate strength, free from any patent defects and safe if properly used.

(b) No oven or drier shall be taken into use in a factory for the first time unless a competent person has thoroughly examined all its parts and carried out the tests as are required to establish that the necessary safe system and controls provided for safety in operation for the processes for which it is to be used and a certificate of such examination and tests signed by that competent person has been obtained and is kept available for inspection.

(c) All parts of an oven or drier which has undergone any alteration or repair which has the effect of modifying any of the design characteristics, shall not be used unless a thorough examination and tests as have been mentioned in clause (b) has been carried out by a competent person and a certificate of such examination and tests signed by that competent person has been obtained and is kept available for inspection.

(5) *Safety ventilation.*—

(a) Every oven or drier shall be provided with a positive and effective safety ventilation system using one or more motor- driven centrifugal fans so as to dilute any mixture of air and any flammable substance that may be formed within the oven or drier and maintain the concentration of the flammable substance in the air at a safe levl of dilution.

(b) The safe level of dilution referred to in sub-clause (a) shall be so as to achieve a concentration of the concarned flammable substance in air of not more than 25 percent of its lower explosive limit. :

Provided that a level of concentration in air upto 50 percent of the lower explosive limit of the concerned flammavie substance may be permitted to exist subject to installation and maintenance of an automatic device which-

(i) shows continuously the concentration of the flammable substances in air present in the oven or drier at any instant.

INDEX

(ii) sounds an alarm when the concentration of the flammable substance in air in any part of the oven or drier reaches a levl of 50 percent of its lower explosive limit; and

(iii) shuts down the heating system of the oven or drier automatically when the concentration in air of the flammable substance in any part of the oven or drier reaches a level of 60 percent of it lower explosive limits, is provided to the oven or drier and maintained in effecient working condition.

(c) No oven or drier shall be operated without its safety ventilation system working in an efficient manner.

(d) No oven or drier shall be operated with a level of dilution less than what is referred to in sub-clause (b).

(e) Exhaust ducts of safety ventilation systems should be so designed and placed that their ducts discharge the mixture of air and flammable substance away from the workrooms and not near windows or doors or other openings from where the mixture could re-enter the workrooms.

(f) The fresh air admitted into the oven or drier by means of the safety ventilation system shall be circulated adequately by means of circulating fan or fans through all parts of the oven or drier so as to ensure that there are no locations where the flammable substance can accumulate in the air or become-Dockeled to any dangerous degree.

(g) Throtting dampers in any safety vertilation system should be so designed by cutting away a portion of the damper or otherwise, that the system shall handle atleast the minimum ventilation rate required for safety when they are set in their maximum throtting position.

(6) Explosion panels.

(a) Every oven or drier having an internal total space of not less than half-cubicmetre shall be provided with suitably designed explosion panels so as to all allow release of the pressure of any possible explosion within the oven or drier through explosion vents. The area of openings to be provided by means of such vents together with the area of openings of any access doors which are provided with suitable arrangements for their release in case of an explosion, shall be not less than 2200 square centimetre for every-one cubic metre of volume of the oven or drier. The design of the explosion panels and doors as abovesaid shall be such as to secure their complete release under an internal pressure of 0.25 Kg. per square centimeter.

(b) The explosing releasing panels, shall as far as practicable, be situated at the roof of the oven or drier or at those portions of the walls where persons do not remain in connection with operation of the oven and drier.

(7) Interlocking arrangements.

(a) In each oven or drier efficient inter-locking arrangements shall be provided and maintained to ensure that—

(i) all ventilating fans and circulating fans whose failures would adversely effect the ventilation rate of flow pattern, are in operation before any mechanical conveyer that may be provided for feeding the articles or substances to be processed in the oven or drier is put into operation;

(ii) failure of any of the ventilating or circulating fans will automatically stop any conveyer as referred to in sub-clause (i) as may be provided as well as stop the fuel supply by closing the shut off valve and shut off the ignition in the case of gas or oil fired ovens, and in the case of electrical heated ovens switch off the electrical supply to the heaters;

(iii) the abovesaid mechanical conveyer is set in operation before the abovesaid shut off valve can be energized; and

INDEX

(iv) the failure of the abovesaid conveyer shall automatically close the abovesaid shut off valve in the case of ovens and driers heated by gas, oil or steam and dactivate the ignition system, or cut off the electrical heaters in the case of electrically heated ovens or furnaces.

(8) Automatic preventilation.--Every oven or drier heated by oil, gas, steam of electricity shall be provided with an efficient arrangement for automatic preventilation consisting of atleast 3 volume changes with fresh air by operation of safety ventilation fans and the circulating fans (if used) so as to effect purging of the oven or drier of any mixture of air and a flammable substance before the heating system can be activated and before the conveyer can be placed in position.

(9) Temperature control.--Every oven or drier shall be provided with an automatic arrangement to ensure that the temperature within does not exceed a safe upper present limit to be decided in respect of the particular proceeding being carried on.

(10) Multistage processes.--Whenever materials are to be processed in ovens or drier in successive operations, suitable arrangement shall be provided to ensure that the operating temperatures necessary for safe operation at each stage are maintained within the design limits.

(11) Combustible substances not to drip on electrical heaters or burners flame.--Effective arrangements shall be provided in every oven or drier to prevent dripping of combustible substances on electric heaters or burner flame used for heating.

(12) Periodical examination, testing and maintenance.--

(a) All parts of every oven and drier shall be properly maintained and thoroughly examined and the various controls as mentioned in this rule and the working of the oven or drier tested at frequent intervals to ensure its safe operation by a responsible person designated by the occupier or manager, who by his experience and knowledge of necessary precautions against risks of explosion, is fit to undertake such work.

(b) A register shall be maintained in which the details of the various tests carried out from time to time under clause (a) shall be entered and every entry made shall be signed by the person making the tests.

(13) Training of peratores : No person shall be assigned any task connected with operation of any oven or drier unle he has completed 18 years of age and he is properly trained.

(14) Polymerising mac hines.--

(a) printed fa ic shall be thoroughly drie by passing them over drying cans or through hot flue or other equally effective means, before the same is allowed to pass through polymerising machines.

(b) Infra-red ray heaters of polymerising shall be cut off while running the prints.

68-H. Ship building, ship-repairing and ship-breaking.

(1) *Application* :—This rule shall as respects work carried out in any of the operations as defined in sub-rule (2).

(2) *Definitions.*—In this rule, unless there is anything repugnant in the subject or context—

INDEX

(a) "certificate of entry" means a certificate which is given by a person who is a competent analyst and who is competent to give such certificates, and certifies that he has in an adequate and suitable manner tested the atmosphere in the oil-tank or oil- tanks specified in the certificate and found that regard to all the circumstances of the case, including the likelihood or otherwise of the atmosphere being or becoming dangerous, entry to the oil-tank or oil-tanks without wearing breathing apparatus may in his opinion be permitted;

(b) "hot work" means any work which involves--

(i) welding, cutting, burning, soldering, brazing, or chipping by spark, flame producing tools; or

(ii) use of non-flameproof electrical equipments with internal combustion engines;

and includes any other work which is likely to produce sufficient heat capable of igniting flammable gases or vapours;

(c) "naked light certificate" means a certificate which is given by a person who is a competent analyst and who is competent to give such certificates, and certifies that he has in an adequate and suitable manner tested for the presence of flammable vapour, oil in ship or vessel specified in the certificate and found it to be free therefrom and that having regard to all the circumstances of the case, including the likelihood of otherwise becoming flammable, the use of naked lights, fires, lamps or heated rivets or any hot work to be carried out may in his opinion be permitted in the oil-tank, compartment, space or other part of the vessel, ship specified in the certificates;

(d) "oil", means any liquid which has a flash point below 132 degrees centigrade and also includes lubricating oils, liquid methane, liquid butane and liquid propane;

Explanation : Flash point wherever it occurs in this rule shall be flash point as determined by Aback Closed Cap or Pensky-Marten Closed Cup procedures as described in I.S. 1448-1960.

(e) "oil-tank" means any tank or compartment in which oil is or has been carried;

(f) "the operations" means—

construction, reconstruction, or breaking up of any ship or vessel, repairing, refiting, painting and finishing;

(g) "ship and vessel" have the same meanings as given in the Merchant Shipping Act, 1958;

(h) "shipyard" means any yard or dry dock (including the precincts thereof) in which ships or vessels are constructed, reconstructed, repaired, refitted, finished or broken.

(f) "stage" means any temporary platform on or from which person employed perform work in connection with the operations, but does not include a boatswain's chair;

(f) "staging" includes any stage, and any upright, thwart, thwart pin, wedge, distance place, belt or other appliance or material, not being part of the structure of the vessel, which is used in connection with the support of any stage, and any guard-rails connected with a stage; and

(k) "tanker" means a vessel constructed or adopted for carrying a cargo of oil in bulk.

INDEX

(3) Access to vessels in dry dock.

(a) If a ship is lying in a dock for the purpose of undergoing any of the operations, there shall be provided as means of access for use of workers at such times as they have to pass to, or from, the ship or dry dock--

(i) where reasonably practicable, one or more ship's accommodation ladders; or

(ii) one or more soundly constructed gangways or similar constructions.

(b) The means so provided shall be not less than 55 centimeters wide, properly secured and fenced throughout on each side to a clear height of 90 centimeters by means of upper and lower rails, taut ropes or chains or by any other safe means, except that in the case of the ship's accommodation ladder, such fencing shall be necessary on one side only provided that the other side is properly protected by the ship's side.

(c) Where at any dry dock, there is a gangway giving access from an alter of the dock to a vessel which is in the dock for the purpose of undergoing any of the operations, and the edge of the alter is unfenced, adequate hand-holds shall be available for any length of the alter which workers commonly use when passing between the gangway and the nearest flight of steps which gives access to ground level.

(4) Ladders.—

(a) Subject to clauses (b) and (c) of this sub-rule, every ladder which affords a means of access, communication or support to a person shall-

(i) be soundly constructed and properly maintained; and

(ii) be of adequate strength for the purpose for which it is used; and

(iii) be securely fixed either--

(aa) as near its upper resting place as possible, or

(bb) where this is impracticable, at its base, or where such fixing is impracticable a person shall be stationed at the base of the ladder when in use to prevent it from slipping; and

(iv) unless there is other adequate hand-hold, extend to a height of at least 75 centimeters above the place of landing or the highest ruing to be reached by the foot of any person working on the ladder, as the case may be, or, if this is impracticable, to the greatest practicable height.

(b) Provision contained in sub-clauses (iii) and (iv) of clause (4) of this sub-rule shall not apply to fixed ladders of a ship or to rope ladders. Effective measures by means of ropping off or other similar means shall be taken to prevent the use of fixed ladders of a ship which od not comply with requirements (i) and (ii) of that clause.

(c) Any worker who removes any ladder and sets it up in a new position shall, as regards that ladder, comply with sub-clause (iii) of clause (a) of this sub-rule.

(d) Rope ladders shall provide foot-hold of a depth including any space behind the ladder of not lass than 12 centimeters and, so far as is reasonably practicable, suitable provision shall be made for preventing such ladders from twisting.

INDEX

(5) Lashing of ladders.—

(a) A fibre-rope, or a rope made with strands consisting of wire covered with fibre, shall not be used to secure a ladder used for the purpose of the operations.

(b) A wire-rope shall not be used to secure any such ladders unless its ends are females, but this provision shall not apply in the case of an end which is so situated or protected that a person using the ladder is not liable to come into contact with it so as to suffer injury.

(6) Boatswain's chairs.—

(a) Boatswains' chairs and chains, ropes or other gear used for their suspension shall be of sound materials, adequate strength and suitable quantity and the chains, ropes or other gear shall be securely attached.

(b) Suitable measures shall be taken to prevent where possible the spinning of a boatswain's chair to prevent the tipping of a boatwain's chair and to prevent any occupant falling therefrom.

(7) Throwing down materials and articles—

(a) Subject to the provisions of clause (b) of this sub-rule, parts of staging tools and other articles and materials shall not be thrown down from a height where they are liable to cause injury to workers, but shall be properly lowered.

(b) When the work to be done necessarily involves the throwing down, from a height, of articles or materials, conspicuous notice shall be posted to warn persons from working or passing underneath the place from which articles or materials may fall, or the work shall be done under the direct supervision of a competent person in authority.

(c) No person shall throw down any articles or materials from a height except in accordance with the requirements of this sub- rule.

(8) Loose articles or materials.--So far as practicable, steps shall be taken to minimise the risk arising from loose articles or materials being left lying about in any place from which they may fall on workers or person passing underneath.

Precautions against asphyxiation, injurious furnes, explosions or fire :--

(9) Certification for entry into confined spaces likely to contain dangerous.--A space shall not be certified under Section 36(2)(a) of the Act unless any flammable liquids or refrigerant gases by proper purging.

(a) effective steps have been taken to prevent any ingress of dangerous fumes;

(b) any sludge or other deposit liable to give off dangerous fumes has been removed and the space contains no other materials liable to give off dangerous fumes; and

(c) the space has been adequately ventilated and tested for dangerous fumes and has a supply of air adequate for respiration.

(10) Precaution against shortage of oxygen : No person shall enter or remain in any confined space in a vessel, being a confined space in which there is a reason to apprehend that the proportion of oxygen in the air is so low as to involve risk of persons being overcomes, unless either.

INDEX

(a) the space has been and remain adequately ventilated and responsible person has tested it and certified that it is safe for entry without breathing apparatus; or

(b) he is wearing a suitable breathing apparatus and a safety belt securely to a rope, the free end of which is held by a person standing outside the confined space.

(11) Construction of plant for cutting, welding or heating metal.

(a) Pipes or hoses for the supply of oxygen or any flammable gas or vapour to any apparatus for cutting, welding or heating metal shall be of good construction and sound material and be properly maintained.

(b) Such pipes or hoses shall be securely attached to the apparatus and other connections by means of suitable clips or other equally effective appliances.

(c) Efficient reducing and regulating valves for reducing the pressure of the gases shall be provided and maintained in connection with all cylinders containing oxygen or any flammable gas or vapour at a pressure above atmospheric pressure while the gases or vapours from such cylinders are being used in any process of cutting, welding or heating metal.

(d) Where acetylene gas is used for cutting, welding or heating metal .--(i) a properly constructed and efficient back-pressure valve and flame arrester shall be provided and maintained in the acetylene supply pipe between each burner or blow-pipe and the acetylene generator, cylinder or container from which it is supplied, and shall be placed as near as practicable to the burner or blow-pipe, except that these requirements shall not apply where an acetylene cylinder serves only one burner or blow- pipe; and (ii) any hydraulic valve provided in pursuance of the preceding sub-clause shall be inspected on each day by every person who uses the burner or blow-pipe on that day and it shall be the duty of every worker who used the burner or blow-pipe to inspect the hydraulic valves accordingly.

(e) The operating valves of burners or blow-pipe to which oxygen or any flammable gas or vapour is supplied for the purpose of cutting, welding or heating metal shall be so constructed, or operating mechanism shall be so protected, that the valves cannot open accidentally.

(12) Precautions after use of apparatus for cutting, welding or heating metal.

(a) In the case of apparatus on board or vessel is used for cutting, welding, or heating metal with the aid of oxygen or any flammable gas or vapour supplied at a pressure above atmospheric pressure, the precautions specified in the following clauses of this Sub-rule shall be taken when such use ceases for the day or for a substantial period and the apparatus is to be left on board, but need not be taken when such use is discontinued merely during short interruptions of work. The provision of clause (c) and (d) of this sub-rule shall not apply during a meal interval, provided that a responsible person is placed in charge of the plant and equipment referred to therein.

(b) Supply valves of cylinders, generators and gas mains shall be securely closed and the valve key shall be kept in the custody of a responsible person.

(c) Movable pipes or hoses used for conveying oxygen or flammable gas or vapour and the welding and cutting torches shall, in the case of a vessel undergoing construction, be brought to the top most completed deck, or in the case of a vassel undergoing repair, to a weather deck or in the either case

INDEX

to some other place of safety which is adequately ventilated to prevent any dangerous concentration of gas or fumes :

Provided that where owing to the nature of the work, it is impracticable to comply with the foregoing requirements of this clause, the pipes or hoses shall be disconnected from cylinders, generators or gas mains, as the case may be.

(13) Naked light and hot work on oil-carrying vessels.

(a) Subject to the provisions of clause (b) of this sub- rule and without prejudice to the provision of sub-rule (17) no naked light, fire or lamp (other than a safety lamp of a type approved for the purpose of this sub-rule)--

(i) shall be permitted to, or to be in, or any hot work permitted to be carried out in any part of a tanker, unless, since oil was last carried in that tanker, a naked light certificate has been obtained and is in force in respect of those parts of the tanker for which, in the opinion of a competent analyst, a naked light certificate is necessary :

Provided that a naked light, fire or lamp of a kind specified in writing by a competent analyst may be applied to, or be in, or any hot work of a type specified by him carried on, any part of the tanker so specified.

(ii) shall be permitted--

(aa) to be in any oil-tank on board or in a vessel in which oil-tank the ol last carried was oil having a flash point of less than 23 degrees centigrade or was liquid buttons, nor any ht work permitted tó be carried out in any such oil tank or vessel, unless a naked light certificate has previously been obtained on the same day and is in force in respect of that oil-tank and of any oil-tank, compartment or space adjacent thereto;

(bb) to be applied to the outer surface of any oil-tank on board or in a vesel in which oil-tank the oil last carried was as aforeasid nor any work of such a nature which is likely to produce sufficient heat capable of igniting flammable gases or vapours permitted to be carried out on the outer surface of such oil-tank or vesel, unless a naked light certificate has previously been obtained on the same day and is in force in respect of that oil tank;

(cc) to be applied to the outer surface of, or to be in, any compartment or space adjacent to an oil-tank on board or in a vessel in which oil-tank the oil last carried was such oil as aforesaid, nor any work permitted to be carried out in such compartment or space as aforesaid, nor any work of such nature which is likely to produce sufficient heat capable of igniting flammable gases or vapours, permitted to be carried out on the outer surfac of such compartment or space, unless a naked light certificate has previously been obtained on the same day ans is in force in respect of that compartment or space :

Provided that where in any such case referred to ib paragraphs (aa), (bb) or (cc) of this sub-clause a competent analyst has certified that daily nake dlight certificates are unnecessary or are necessary only to a specified extent, such daily certificate need not be obtained or, as the case may be, need only be obtained to the specified extent;

(iii) shall be permitted to be applied to the outer surface of, or to be in, any oil-tank on board or in vessel nor any hot work permitted to be carried out in any such oil-tank or vessel; nor any work of such nature which is likely to produce sufficient heat capable of igniting flammable gases or vapours,

INDEX

permitted to be carried out on the outer surface of the oil tank or vessel, since oil was last carried in that oil-tank, a naked light certificate has been obtained and is in force in respect of that oil-tank;

(iv) shall be prmitted to be applied to the outer surface of, or to be in, any compartment or space adjacent to an oil-tank on board or in a vessel nor any hot work permitted to be carried out in any such compartment or space, nor any work of such nature which is likely to be produce sufficient heat capable of ogniting inflammable gases or vapours, permitted to be carried out on the outer surface of any such compartment or space, unless, since oil was last carried as cargo in that oil-tank, a naked light certificate has been obtained and is in force in respect of that compartment or space.

(b) No person shall introduce, have or apply naked light, fire or lamp (other than safety lamp of a type approved for the purpose of igniting flammable gases of this sub-rule) into, in or to any place where they are prohibited by this sub-rule.

(c) No person shall carry out hot work of such nature which is likely to produce sufficient heat capable of igniting flammable gases or vapours, in any place or any surface where thay are prohibited by this sub-rule.

(d) In this sub-rule, the expression "competent analyst" means an analyst who is competent to give a naked light certificate.

(14) Entering oil-tanks.

(a) No person (other than an analyst entering with a view to issuing of entry) shall, unless he is wearing a breathing apparatus of a type approved for the purpose of this sub-rule, enter or remain in an oil-tank on board or in a vessel unless, since the oil-tank last contained oil, a certificate of entry has been obtained and is in force in respect of the tank.

(b) Without prejudice to clause (a) of this sub-rule, no person (other than an analyst entering as aforesaid) shall be allowed or required to enter or remain in an oil-tank on board or in a vessel in which oil-tank the oil last carried was oil having a flash point of less than 23 degrees centigrade unless, since the oil-tank last contained oil, an analyst has certified that the atmosphere is sufficiently free from flammable mixture.

(c) The provisions of this sub-rule are without prejudice to the provisions of sub-rule (10).

(15) Posting of certificates.--Every occupier for whom a naked light certificate or a certificate of entry is obtained shall ensure that the certificate or a duplicate thereof is posted as soon as may be and remains posted in a position where it may be conveniently read by all persons concerned.

(16) Cleaning of oil-tanks.

(a) Before a test for flammable vapour is carried out with a view to the issue of a naked light certificate for the purposes of sub-rule (13) in respect of an oil-tank on board or in a vessel, that oil-tank shall, since oil was last introduced into the tank, be cleaned and ventilated in accordance with clause (b) of this sub-rule.

(b) The said cleaning ventilation shall be carried out by the following methods :--

(i) The oil-tank shall be treated in such manner and for such period as shall ensure the vaporation of all volatile oil;

(ii) all residual and any sludge or other deposit in the oil-tank shall be removed therefrom; and

(iii) after the oil-tank has been so cleaned,--

(aa) all covers of manholes and other operatings therein shall be removed and it shall be thoroughly ventilated by mechanical or other efficient means with a view to the removal of all oil vapour; and then

INDEX

(bb) the interior surfaces, shall be washed or scrapped down, if any deposit remains thereon.

(17) Provisions as to work in other compartments or spaces.—

(a) Without prejudice to the other provisions of this rule, if the presence of oil is in such quality and in such position as to be likely to give rise to fire or explosion is detected in any part of a vessel, being a part to which this sub-rule applies and in which repairs of the following kind are to be or are being undertaken, that is to say repairs involving the use of a naked light, fire or lamp (other than a safety of a type approved for the purpose of sub-rule (23 or involving hot work, such repairs shall not be started or continued until a naked light certificate has been issued or, as the case may, be issued in respect of that part of the vessel.

(b) This sub-rule shall apply to bilges, shaft-tunnels, pump- rooms, lamp-rooms, and to compartments and spaces other than those to which clause (a) (iv) of sub-rule (13) applies.

(18) Hand protection : Adequate protection for the hands shall be available for all workers when using, cutting or welding apparatus to which oxygen or any flammable gas or vapour is supplied at a pressure greater than atmospheric pressure or when engaged in machine caulking or machine riveting or in transporting or stacking plates or in handling plates at machines.

(19) Protection in connection with cutting or welding :

(a) Suitable goggles fitted with tinted eye-pieces shall be provided and maintained for all persons employed when using cutting or welding apparatus to which oxygen or any flammable gas or vapour is supplied at pressure above atmospheric pressure.

(b) There shall be provided and maintained for the use of all persons employed when engaged in the process of electric welding.-

(i) Suitable helmets or suitable head-shields to protect the eyes and face from hot metal and from rays likely to be injurious.

(ii) Suitable gauntletes to protect the hands and forearms from hot metal and from-rays likely to be injunions.

(c) When electric welding is in progress at any place and persons other than those engaged in that process are employed in a position where the rays are likely to be injurious to their eyes, screens shall, where practicable, be provided at that place for the protection of these persons. Where it is not practicable to provide effective protection of those persons by screening, suitable goggles shall be provided for their use.

(20) Head protection : When workers are employed in areas where there is danger of falling objects they shall be provided with suitable safety helmets.

(21) Safety-belts and life-lines :—

(a) Whenever any worker is engaged on work at a place from which he is liable to fall more than 2 meters, he shall be provided with safety belts equuipped with life-lines which are secured with a minimum of stakes, to a fixed structure unless any other effectie means such as provision of guard-rails or guard-ropes are taken to prevent his falling.

(b) All safety-belts and life-lines shall be examined at frequent intervals by a competent person to ensure that no belt or life- line which is not in good condition is used.

INDEX

(22) HEALTH AND WELFARE :

Prohibition of employment of young persons in certain processes.:- No young person shall be employed in.—

(a) the application of asbestos by means of spray;

(b) the breaking down for removal of asbestos lagging;

(c) the cleaning of sacks or other containers which have contained asbestos :

(d) the cutting of material containing asbestos by means of portable power driven saws; or

(e) the scaling, scurting or cleaning of boilers, combustion chambers or smoke boxes, where his work exposes him to dust of such a character and to such an extent as to be likely to be injurious or offensive to persons employed in such work.

(23) SAFETY SUPERVISION : In the case of every shipyard, a person experienced in the work of such yards shall be appointed and employed exclusively to exercise general supervision of the observance of these rules and to promote the safe conduct of the work generally."

17 In the said rules, after rule 68-H, the following chapter shall be inserted, namely :-

"CHAPTER - IV-A"

68-I : Site Appraisal Committee :

The following provisions shall govern the functioning of the State Appraisal Committee.

(1) No member, unless required to do so by a Court of Law, shall disclose otherwise than in connection with the purpose of the Act, any information relating to manufacturing or commercial business or any working process which may come to his knowledge during his tenure as a Member of this Committee.

(2) (a) Application for appraisal of sites in respect of the factories covered under section 2 (eb) of the Act shall be submitted to the Chairman of the Site Appraisal Committee.

(b) The application for site appraisal alongwith 15 copies thereof shall be submitted in Form No. 1-B. The Committee may dispense with furnishing the information on any particular item in the Application Form if it considers the same to be not relevant to the application under consideration.

(3) (a) The Secretary shall arrange to register the applications received for appraisal of site in a separate register and acknowledge the same within a period of seven days.

(b) The Secretary shall fix up meeting in such a manner that all the applications received and registered are referred to the Committee within a period of one month from the date of their receipt.

(c) The Committee may adopt a procedure for its working keeping in view the need for expeditious disposal of applications.

(d) The Committee shall examine the application for apprasal of site with reference to the prohibition and restrictions on the location of industry and the carrying on of processes and operations in different areas as per the provisions of rule 5 of the Environment (Protection) Rules, 1986 frame under the Environment Protection Act, 1986.

INDEX

(e) The Committee may call for the documets, examine exports, inspect the site if necessary and take other steps for formulating its views in regard to the suitability of the site.

(f) Wherever the proposed site requires clearance by the Ministry of Industry or the Ministry of Environment and Forests, the application for site Appraisal shall be considered by the site Appraisal Committee only after sucj clearance has been received.

68-J-(1) Definitions : In this chapter, unless the context otherwise requires,—

(a) "hazardous chemical" means,—

(i) any chemical which is of the criteria specified in part I of Schedule 1 and is included in the list in column (2) of part II of that Schedule. or
(ii) any chemical included in the list in Column 2 of Schedule 2; or
(iii) any chemical included in the list in Column 2 of Schedule 3;

(b) "Industrial activity" means,-

(i) an operation or process carried out in an industrial installation referred to in Schedule 4 involving or likely to involve one or more hazardous chemicals and includes on-site storage or on-site transport which is associated with taht operation or process as the case may be; or
(ii) isolated storage;

(c) "isolated storage" means storage where no other manufacturing process other than pumping of hazardous chemical is carried out and that storage involves at least the quantity of that chemical set out in Schedule 2, but does not include storage associated with an installation specified in Schedule 4 on the same site,

(d) "major accident" means an occurrence (including in particular a major emission, fire or explosion) involving one or more hazardous chemicals and resulting from uncontrolled developments in the course of an industrial activity or owing to natural events, leading to a serious danger to persons, with immediate or delayed, inside or outside the installation or damage to property or adverse effects on the environment;

(e) "pipeline" means a pipe (together with any apparatus and works associated there with), or system of pipes (together with any apparaus and works associated therewith), for the conveyance of a hazardous chemical, other than a flammable gas as set out in Column 2 of Part II of Schedule 3 at a pressure of less that 8 bars absolute;

(f) "schedule" means a Schedule appended to these rules :

(g) "site" means any location where hazardous chemicals are manufactured or processed, stored, handled, used, disposed of and includes the whole of an area under the control of occupier;

(h) words and expressions used but not defined in this chapter but defined or used in the Factories Act, 1948 and these rules shall have the same meaning as assigned therein.

(2) Collection, development and dissemination of information-

(1) This sub-rule shall apply to an industrial activity in which a hazardous chemical which is of the criteria specified in part I of Schedule 1 and is included in the list in Column-2 of Part II of that Schedule is or may be involved.

INDEX

(2) The occupier of every factory involving an industrial activity in terms of clause (1) shall arrange to obtain or develop detailed information on hazardous chemical in the form of a material safety data sheet as specified in Schedule- 5. The information shall be accessible to workers upon request for reference.

(3) The occupier while obtaining or developing a material safety data sheet as specified in Schedule 5 in respect of a hazardous chemical handled by him shall ensure that the information is recorded accurately and reflects the scientific evidence used in making the hazard determination. In case, any significant information regarding hazard of a chemical is available it shall be added to the material safety data sheet as specified in schedule 5 as soon as possible.

(4) Every container of a hazardous chemical shall be clearly labeled or marked to identify-

a) the contents of the container;
b) the name and address of the manufacturer or importer of the hazardous chemical; and
c) the physical and toxicological of the hazardous chemical.

(5) In terms of clause (4) where it is impractical to label a chemical in view of the size of the container or the nature of the package, provision shall be made for other effective means like tagging or accompanying documents.

(3) General responsibility of the Occupiers -

1) This sub- rule shall apply to,-

(a) an industrial activity, other than isolated storage, in which a hazardous chemical which is of the criteria specified in Part I of schedule 1 and is included in the list of the Column 2 of Part II of that Schedule is or may be involved, and (b) isolated storage in which there is involved a quantity of a hazardous chemical include in the list in column 2 of Schedule 2 which is equal to or more than the quantity specified in the Schedule fir that chemical in Column 3 thereof.

2) The occupier of every factory including an industrial activity in terms of clause (1) shall provide evidence to show that he has—

(a) identified the major accident hazards; and
(b) taken adequate steps to—

(i) prevent such major accidents and to limit their consequences to persons and the environment; and
(ii) provide the persons working on the site with the information, training and equipment including antidotes necessary to ensure their safety.

(4) Notification of major accidents —

(1) Where a major accident occurs on site, the occupier shall forthwith intimate and report to the Inspector and the Chief Inspector about the accident, and furnish thereafter to the Chief Inspector a report relating to the accident in installments, if necessary, in Schedule 6.

(2) The chief inspector shall on receipt of the report under clause (1) shall u;ndertake a full analysis of the major accident and send the requisite information to the Directorate General Factory Advice Service and Labour Institute (DGFASLI) and the Ministry of Labour through appropriate channel.

INDEX

(5) Industrial activities to which sub-rule (6) to (12) apply.

(1) (a) subrule (6) to (8) both inclusive and (12) shall apply to an industrial activity, other than isolated storage, involving of a hazardous chemical included in the list in the Column 2 of Schedule 3 which is equal to or more than the quantity specified in the entry for that chemical in column 3 of that schedule.

(b) Subrule 9 to 11 (both inclusive) to an industrial activity, other than isolated storage, including a quantity of a hazardous chemical included in the list in column 2 of Schedule 3 which is equal to or more than the quantity in the entry for that chemical in column 4 of that schedule.

(c) Subrule 6 to 8 (both inclusive) shall apply to an isolated storage including a quantity of a hazardous chemical included in the, list of column 2 of Schedule 2 which is equal to or more than, the quantity specified in the entry for that chemical in Column 3 of that Schedule, and

(d) Sub rules (9) to (12) (both inclusive) shall apply to an isolated storage including involving a quantity of a hazardous chemical included in the list in Column 2 of Schedule 2 which is equal to or more than the quantity specified in the entry for that chemical in Column 4 of that schedule.

(2) For the purpose of sub- rules (6) to (12)—

(a) "New industrial activity" means an industrial activity which.—

(i) was commenced after the date of coming into operation of these rules; or

(ii) if commenced before that date, is an industrial activity in which there has been sice that data a modification which would be likely to have imprtant implications for major accident, and that activity shall be deemed to have been commenced on the date on which the modification was made; and

(b) "existing industrial activity" means an industrial activity which is not a new industrial activity.

(6) Notification of industrial activities-

(1) An occupier shall not undertaken any industrial activity unless he has submitted a written report to the Chief Inspector containing the particulars specified in Schedule 7 atleast 3 months before commencing that activity or before such shorter time as the Chief inspector may agree and for the purpose of this clause an activity in which subsequently there is or is likely to be a quantity involving of a hazardous chemical included in the list in Column 3 of Schedules 2 and 3 or more of an additional hazardous chemecial shall be notified accordingly.

(2) No report under clause (1) shall be necessary to be submitted by the occupier, if he submits a report under Clause (1) of sub-rule (9).

(7) Updating of the notification under sub-rule (e) :

Where an activity has been reported in accordance with clause (1) of sub rule (6) and the occupier makes a change in it (including an increase or decrease in the maximum quantity of a hazardous chemical to which this sub-rule applies which is or is liable to be at the site or in the pipelines or the cessation of the activity) which affects the particulars specified in that report or any subsequent report made under this sub-rule, the occupier shall forthwith, furnish a further report to the Chief Inspector.

INDEX

(8) Transitional provision.

Where.-

(a) on the date of coming into force of these rules, an occupier who is engaged in existing industrial activity which is required to be reported under clause (1) of sub- rule (6).or

(b) within 6 months after that date an occupier commences any such new industrial activities :

it shall be a sufficient compliance of that subrule if he reports to the Chief Inspector with the particulars specified in Schedule 7 within 3 months from the date of coming into force of these rules or within such longer time as the Chief inspector may agree in writing.

(9) Safety reports.

(1) Subject to clause (2) and (3) of this sub-Rule, an Occupier shall not undertake any industrial acticivity to which this subrule applies, unless he has prepared a safety report on that indústrial activity containing the information specified in Schedule I and has sent a copy of that report to the Chief Inspector at least 3 months before commencing that activity.

(2) In the case of a new industrial activity which an occupier commences, or by virtue of clause (2) (a) (ii) of subrule (5) is deemed to commence, within 6 months after coming into force of these rules, it shall be sufficient compliance with clause (1) of this subrule if the occupier sends to the Chief Inspector a copy of the report required in accordance with that clause within 3 months from the date of coming into force of these rules.

(3) In the case of an existing industrial activity, until five years from the date of coming into force of these rules, it shall be a sufficient compliance with clause (1) of this subrule, if the occupier on or before 3 months from the date of the coming into force of these rules sends to the Chief Inspector the information specified in Schedule 7 relating to that activity.

(10) Updating of reports under sub-rule (9)

(1) Where an occupier has made a safety report in accordance with clause (1) of subrule 9 he shall not make any modification to the industrial activity to which that safety report relates which could materially, affect the particulars in that report, unless he has made a further report to take account of those modifications and has sent a copy of that report to the Chief Inspector at least 3 months before making those modifications.

(2) Where an occupier has made a report in accordance with this sub-rule (9) and clause (1) of this rule and that industrial activity is continuing, the occupier shall within three years of the date of the last such report, make a further report, which shall have regards in particular to new technical knowledge which has affected the particulars in the previous report relating to safety and hazard assessment, and shall within one month or in such longer time as the Chief Inspector may agree in writing send a copy of the report to the Chief Inspecor.

(11) Requirements for further information.

Where in accordance with clause (1) of sub-rule (9), an occupier has sent safety report relating to an industrial activity to the Chief Inspector, the Chief Inspector may, by a notice served on the occupier, require him to provide such additional information as may be specified in the notice and the occupier shall send that information to the Chief Inspector within such time as may be specified in the notice or within such extended time as the Chief Inspector may subsequently specify.

INDEX

(12) Preparation of on-site emergency by the Occupier.—

(1) An Occupier who has control of an industrial activity to which this subrule applies shall prepare in consultation with the chief Inspector, keep up-to-date and furnish to the Chief Inspector, and the Inspector an on-site emergency plan detailing how major accidents shall be dealt with on the site on which the industrial activity is carried on and that plan shall include the name of the person who is responsible for safety on the site and the names of those who are authorized to take action in accordance with the plan in case of an emergency.

(2) The occupier shall ensure that the emergency plan prepared in accordance with clause (1) of this subrule, takes into account any modification made in the industrial activity and that every person on the site who is affected by the plan is informed of its relevant provisions.

(3) The occupier shall prepare the emergency plan required under clause (1) of this sub-rule.-

(a) in the case of a new industrial activity, before that activity is commenced; excep that, in the case of a new industrial activity which is commenced or is deemed to have been commenced before a date of three months after the coming into force of these rules, by that date or

(b) in the case of an existing Industrial activity within three months of coming into force of these rules.

(13) Improvement notice.

(1) If an Inspector is of the opinion that an Occupier-

(a) is contravening one or more of these rules; or

(b) has contravened one or more of these rules in such a way which make it likely that the contravention shall continue or be repeated,

he may serve on him a notice (In this sub- rule referred to as " an improvement notice)" stating that he is of that opinion, specifying the rule or rules as to which he is of that opinion, giving particulars of the reasons why he is of that opinion, and requiring that occupier to remedy the contravention or, as the case may be, the matters occasioning it within such period as may be specified in the notice.

(2) A notice served under clause (1) of this sub-rule may include directions as to the matters to be taken by the occupier to remedy and contravention or matter to which the notice relates.

INDEX

SCHEDULE 1

(SEE RULE 68-j (1) (a) (i) (2)(1), (3)(1)(a),

Indicative Criteria and List of Chemicals

Part I - INDICATIVE CRITERIA

(a) Toxic Chemicals :

Chemicals having the following values of acute toxicity and which, owing to their physical and chemical properties , are capable of producing major accident hazards.

Sr. no.	Degree of Toxicity	LD50 absorbed orally in rats mg/kg body weight	LD50 by cutaneous absorption in rats or rabbits mg/kg body weight	LC50 adsorbed by inhalation (4 hours) in rats mg/litre
1.	Extremely toxic	<= - 50	<= – 200	0.1 - 0.5
2.	Highly toxic	51 - 500	201 – 20000.	0.5 - 2.0

(b) Flammable chemicals :

(i) Flammable gasses :- Chemicals which in the gaseous state at normal pressure and mixed with air become flammable and the boiling point of which at normal pressure is 20 degree C or below;

(ii) highly flammable liquids :- Chemicals which have a flash point lower than 23 degree C and the boiling point of which at normal pressure is above 20 degree C;

(iii) Flammable liquids :- Chemicals which have a flash point lower than 65 degree C and which remainliquid under pressure, where particular processing conditions, such as high pressure and high temperature, may create major accident hazards.

(c) Explosive :

Chemicals which may explode under the effect of flame, heat or photo-chemical condition, orwhich are more sensitive to shocks or friction than dinitrobenzene.

INDEX

SCHEDULE I (continued)

PART - II LIST OF HAZARDOUS CHEMICALS

Sr.No. (Column 1)	Name of the chemical (Column 2)
1.	ACETONE
2.	ACETONE CYANOHYDRING
3.	ACETYL CHLORIDE
4.	ACETYLENE (ETHYNE)
5.	ACROKEIN (2. PROPENAL)
6.	ACRYLONITRILE
7.	ALDICARB
8.	ALDRINE
9.	ALKYL PHTHALATE
10.	ALLYL ALCOHOL
11.	ALLYLAMINE
12.	ALPHA NAPHTHYL THIOUREA (ANTU)
13.	4 - AMINODIPHENYL
14.	2 - AMINOPHENOL
15.	AMITON
16.	AMMONIA
17.	AMMONIUM NITRATE
18.	AMMONIUM NITRATE in fertilizers
19.	AMMONIUM SULFAMATE
20.	ANABASINE
21.	ANIKINE
22.	P-ANISIDINE
23.	ANTIMONY and COMPOUNDS
24.	ANTIMONY HYDRIDE (STIBINE)
25.	ARSENIC HYDRIDE (ARSINE)
26.	ARSENIC PENTOXIDE,ARSENIC (V) ACID and SALTS
27.	ARSENIC TRIOXIDE, ARSENIOUS (iii) ACIDS and SALTS
28.	ASBESTOS
29.	AZINPHOS ETHYL
30.	AZINPHOS - METHYL
31.	BARIUM AZIDE
32.	BENZENE
33.	BENZIDINE
34.	BENZIDINE SALTS
35.	BENZOQUINONE
36.	BENZOYL CHLORIDE
37.	BENZOYL PEROXIDE
38.	BENZYL CHLORIDE
39.	BENZYL CYANIDE
40.	BERYLLIUM (POWDERS, COMPUNDS)
41.	BIPHENYL
42.	BIS (2-CHLOROMETHYL) KETONE
43.	NITROPHENYL) AMINE

INDEX

Sr.No. (Column 1)	Name of the chemical (Column 2)
44.	BIS (2-CHLOROETHYL) SULPHINE
45.	BIS (CHLOROMETHYL) ETHER
46.	2,2-BIS (TERT-BUTYLPEROXY) BUTANE
47.	1,1 -BIS (TERT - BUTYLPEROXY) CYCLOHEXANE
48.	BIS - 1,2 (TRIBROMOOHENOXY) - ETHANE
49.	BISPHENOL
50.	BORON and COMPOUNDS
51.	BROMINE
52.	BFROMINE PENTAFLUORIDE
53.	BROMOFORM
54.	1,3 - BUTADIENE
55.	BUTANE
56.	N - BUTANETHIOL
57.	2 - BUTANONE
58.	BUTOXY ETHANOL
59.	BUTYL GLYCIDAL ETHER
60.	tert - BUTYL PEROXYACETATE
61.	tert - BUTYL PEROXYISOBUTYRATE
62.	tert - BUTYL PEROXYISOPROPYL CARBONATE
63.	tert - BUTYL PEROXYMALEATE
64.	tert - BUTYL PEROXYPIVALATE
65.	BUTYL VINYL ETHER
66.	BUTYLAMINE
67.	C9 - AROMATIC HYDROCARBON FRACTION
68.	CADMIUM and COMPOUNDS
69.	CADMIUM OXIDE (fumes)
70.	CALCIUM CYANIDE
71.	CAPTAN
72.	CAPTOFOL
73.	CARBARYL (SEVIN)
74.	CARBOFURAN
75.	CARBON DISULPHIDE
76.	CARBON MONOXIDE
77.	CARBON TETRACHLORIDE
78.	CARBOPHENOTHION
79.	CELLULOSE NITRATE
80.	CHLORATES (use in explosives)
81.	CHLORADANE
82.	CHLORFENVINPHOS
83.	CHLORINATED BENZENES
84.	CHLORINE
85.	CHLORINE DIOXIDE
86.	CHLORINE OXIDE
87.	CHLORINE TRIFLUORIDE
88.	CHLORMEQUATE CHLORIDE
89.	CHLOROACETAL CHLORIDE
90.	CHLOROCETALDEHYDE

Sr.No. (Column 1)	Name of the chemical (Column 2)
91.	2--CHLOROANILINE
92.	4--CGLOROANLINE
93.	CHLORROBENZENE
94.	CHLORODIPHENYL
95.	CHLORODEPXYPROPOPANE
96.	CHLOROETHANOL
97.	CHLOROETHYL CHLOROFORMATE
98.	CHLOROFLUOROCARBONS
99.	CHLOROFORM
100.	4--(CHLOROFORMYL), MORPHOLINE
101.	CHLOROMETHANE
102.	CHLOROMETHYL ETHER
103.	CHLORONITROBENZENE
104.	CHLOROPRENE
105.	CHLOROSULPHONIC ACID
106.	CHLORONITROBENZENE
107.	CHLOROXURON
108.	CHROMIUM and COMPOUNDS
109.	COBALT and COMPOUNDS
110.	COBALT and COMPOUNDS
111.	COPPER and COMPOUNDS
112.	COUMAPHOS
113.	COUMATETRALYL
114.	CRESOLS
115.	CRIMINIDE
116.	CUMENE
117.	CYANOPHOS
118.	CYANOTHOTATE
119.	CYANURIC FLUORIDE
120.	CYCLOHEXANE
121.	CYCLOHEXANOL
122.	CYCLOHEXANONE
123.	CYCLOHEXAMIDE
124.	CYCLOPENTADIENE
125.	CYCLOPENTANE
126.	CYCLOTETRAMETHLENETETRANITRAMINE
127.	CYCLOTRIMETHYLENETRINITRAMINE
128.	DDT
129.	DECABROMODIPHENYL OXIDE
130.	DEMETON
131.	DI-ISOBUTYRYL PEROXIDE
132.	DI-n-PROPYL PEROXYDICARBONATE
133.	DI-sec-BUTYL PEROXYDICARBONATE
134.	DIALIFOS
135.	DIAZODINITROPHENOL
136.	DIAZOMETHANE
137.	DIBENZYL PEROXYDICARBONATE

INDEX

Sr.No. (Column 1)	Name of the chemical (Column 2)
138.	DICHLOROACETYLENE
139.	o-DICHLOROBENZENE
140.	p-DICHLOROBENZENE
141.	DICHLOROETHANE
142.	DICHLOROETHYL ETHER
143.	2.4-DICHLOROPHENOL

SCHEDULE 2.

(See rule 68-J 1(a) (ii), 1 (c), (3) (1) (b) and (5) (1) (c) and (d), 6 (1)

Isolated storage of Installation other than those covered by Schedule 4.

(a) The quantities set out below relate to each installation or group of installations belonging to the occupier where the distance between installations is not sufficient to avoid, in foreseeable circumstances any aggravation of major accident hazards. These quantities apply in any case of each of the installations belonging to the same occupier where the distance between the installations is less than 500 metres.

(b) For the purpose of determining the quantity of a hazardous chemical at an isolated storage, account shall also be taken of any hazardous chemical which is :-

(i) in that part of any pipeline under the control of the occupier having control of the site. Which is within 500 meters of that site and connected to it.

(ii) at any other site under the control of the occupier any part of the boundary of which is 500 metres of the said site, and

(iii) in any vehicle, vessel, aircraft or hovercraft under the control of the same occupier which is used for storage purpose either at the site or within 500 metres of it.

but no account shall be taken of any hazardous chemical which is in a vehicle, vessel, aircarft or hovercraft for transporting it.

Sr. No.	Chemical or groups of chemicals	Quantity (tonnes)	
		For application of Sub-Rules 3, 5 and 6 to 8	For application of Sub-Rule 6
(col. 1)	(col. 2)	(col. 3)	(col. 4)
1.	Acryionitrile	350	5,000
2.	Ammonia	60	600
3.	Ammonium nitrate	350*	2 500*
4.	Ammonium nitrate fertilizers	1 250	10,000
5.	Chlorine	10	25
6.	Flammable gases as defined in Schedule 1, paragraph 1, paragraph (b)	50	300
7.	Highly flammable liquids as defined in Schedule 1, paragraph (b)	10,000	10,000
8.	Liquid oxygen	200	2000
9.	Sodium chlorate	25	250
10.	Sulphur dioxide	20	500
11.	Sulphur trioxide	15	100

* Where this chemical is in a state which gives it, properties capable of creating a major accident hazard.

INDEX

Footnotes

(a) This applies to ammonium nitrate and mixture of ammonium nitrate where the nitrogen content derived from the ammonium nitrate is greater than 28 per cent by weight and to aqueoussolutions of ammonium nitrate where the concentration of ammonium nitrate is greater than 90 per cent by weight.

(b) This applies to straight ammonium nitrate fertilisers and to compound fertilisers where the nitrogen content derived from the ammonium nitrate is greater than 28 per cent by weight (a compound fertiliser contains ammonium nitrate together with phosphate and/or potash.)

SCHEDULE 3

(See Rues 68-J 1 (a) (iii), 1 (e) and (5) (1) (a) and (b), 6 (1)

List of Hazardous Chemicals for application of Sub-Rules 5 and 7 to 13

(a) The quantities set out below relate to each installation or group of installations belonging to the game occupies where the distance between the instalatios is not sufficient to avoid in foreseeablecircumstances, any aggravation of major accident hazards. These quantitles apply in any case to each group of installations belonging to the same occupier where the distance between the istallations is less than 500 metres.

(b) For the purpose of dtermining the quantity of a hazardous chemical in an idustrial installation, account shall also be taken of any hazardous chemical which is :-

(i) in that part of any pipeline under the control of the occupier having control of the site, which is within 500 metres of that site and connected to it :-

(ii) at any other site under the control of the same occupier any part of the boundary of which is within 500 metres of the said site; and

(iii) in any vehicle, vessel, aircraft or hovercraft under the control of the same occupier which is used for storage purpose either at the site or within 500 metres of it :

but no account shall be taken of any hazardous chemical which is in a vehicle, vessel, aircarft or hovercraft used for transporting it.

174.	2, 4, 6-Trinitroanisole	50 t		606-35-9
175.	Trinitrobenzene	50 t		25377-32-6
176.	Trinitrobenzoic acid	50 t		35860-50-5
177.	Trinitrocresol	50 t		28905-71-7
178.	2, 4, 6-Trinitrophenetole	50 t		4732-14-3
179.	2, 4, 6-Trinitrotoluene	50 t	50 t	118-96-7

INDEX

SCHEDULE-3 (Continued)

PART-II CLASSES OF CHEMICALS NOT SPECIFICALLY NAMED IN PART-I

Sr. No.	Classes of Chemicals	Quantity	
		For application of Sub- rules (4), (6) to (8) & (12)	For application of sub- rules (9) to 11
(1)	(2)	(3)	(4)
	Group--5 Flammable Chemicals		
1.	Flammable Gases : Chemicals which in gaseous state at normal pressure and mixed with air become flammable and the boiling point of which at normal pressure is 20 degree C or below:	15 t	200 t
2.	Highly flammable liquids : Chemicals which have a flash point lower than 23 degree C and the boiling point of which at normal pressure is above 20 degree C;	1000 t	50000 t
3.	Flammable liquids : Chemicals which have a flash point lower than 65 degree C and which remain liquid under pressure, where particular processing conditions, such as high pressure and high temperature, amy create major accident hazards.	25 t	200 t

Footnotes :

1. This applies to ammonium nitrate and mixture of ammonium nitrate where the nitrogen content derived from the ammonium nitrate is greater than 20% by weight and aqueous solutions of ammonium nitrate where the concentration of ammonium nitrate is greater than 90% by weight.

2. This applies to straight ammonium fertilisers and to compound fertilisers where the nitrogen content derived from the ammonium nitrate is greater than 28% by weight (a compound fertiliser contains ammonium nitate together with phosphate and/or potash).

* CAS number (Chemical abstracts Service Number) means the number assigned to the chemical by the Chemical Abstracts Service.

INDEX

SCHEDULE 4

(See rule 68-J (1) (b)(i),1 (c))

Industrial Installation within the meaing of sub-rule 1(b)(i)

1. Installation for the production, Processing for treatment of organic or Inorganic chemicals using for this purpose, among others :

   a. alkylation
   b. amination by amonolysis
   c. carbonylation
   d. condensation
   e. dehydrogenation
   f. esterification
   g. halogenation & manufacture of halogens
   h. hydrogenation
   i. hydrolysis
   j. oxidation
   k. Poly marization
   l. sulphonation
   m. desulphurization, manufacture and transformation of sulpher containing compounds
   n. nitration and manufacture of nitrogen containing compounds
   o. manufacture of phosphorous conttaing compounds
   p. formulation of pesticides and of phamacetial products
   q. distillation
   r. extracting
   s. solvation
   t. mixing

2. Installations for distillation, refining or other processing of petroleum or petroleum- products.

3. Installations for the total or partial disposal of solid or liquid chemicals by incheration or chemical decomposition.

4. Installations for the production, processing, or treatment of energy goses for example, LPG, LNG, SNG.

5. Installations for the dry distillation of coal or lignite.

6. Installations for the production of metals or non-metals by a wet process or by means of electrical energy.

	Tremcard Detail/Ref.
	Others.

10. DISCLAIMER

Information contained in this material data sheet is believed to be reliable but no representation, guarantee or warranties of any kind are made as to its accuracy, suitability for a particular application or results to be obtained from them. It is upto the manufacturer/seller to ensure that the information contained in the material safety data sheet is relevant to the product manufactured/handled or sold by him as the case may be. The Government makes no warranties, expressed or implied, in respect of the adequacy of this document for any particular purpose.

INDEX

SCHEDULE-6

(See rule 68-J (4) (1))

Iformation to be furnished Regarding Notification of a Major Accident.

Report number.....

of the Particular accident

1. General data

(a) Name of the site

(b) Name and address of the occupier
(Also state the telephone/telex number)

(c) (i) Registration number

(ii) Licence Number

(As may have been allotted under any statute) applicable to the site. e.g. the Factories Act)

(d) (i) Nature of industrial activity (Mention what is actually manufactured, stored etc.)

(ii) National Industrial Classification, 1987 at the four digit level. | | | | |

2. Type of major accident

Explosion [ ] Fire [ ] Emission of Hazardous Chemical [ ]

3. Description of the major accident

a. Date, Shift and hour of the accident

b. Department/Section and exact Place where the accident look place.

c. The process/operation undertaken in the Department/Section where the accident took place. (Attach a flow chart, if necessary.)

INDEX

SCHEDULE-6 (Continued)

(d) The circumstances of the accident and the hazardous chemical involved.

4. Emergency measures taken and measures envisaged to be taken to alleviate short-term effects of the accident.

5. Cause of the major accident

known (to be specified) ☐

Not known ☐

Information will be supplied as soon as possible. ☐

6. Nature and extent of damage

a. Within the establishment

— casualties

_____ killed

_____ injured

_____ Poisoned

— persons exposed to the major accident _____

— material damage ☐

— damage is still present ☐

— danger no loger exists ☐

SCHEDULE-6 (Continued)

(b) Outside the establishment
— casualties

_____ killed
_____ injured
_____ Poisoned

— persons exposed to the major accident _____

— material damage

— damge to environment

—damage in still present

—danger no longer exists

7. Data available for assessing the effects of the accident on persons and environment.

8. Steps already taken or envisaged

a. to alleviate medium or longterm effects of the accident.

b. to prevent recurrent of similar major accident

c. Any other relevant information.

INDEX

SCHEDULE-7

(See Rule 68-J, (6) (1), 8(b), 9(3))

Information to be furnished for the Notification of Activities/sites

Particulars to be included in a notification of site.

1. The Name and address of the occupier making.

2. The full Postal address of the site where the notifiable industrial activity will be carried on.

3. The area of the site covered by the notification and of any adjacent site which is required to be taken into account by virtue of schedule 2 (b) and schedule 3 (b).

4. The date on which it is anticipated that the notifiable industrial activity will commence or if it has already commenced a statement to that effect.

5. The name and maximum quantity liable to be on the site of each hazardous chemical for which notification is being made.

6. Organisation structure, namely organisation diagram for the proposed industrial activity and set up for ensuring safety and health.

7. Information relating to the potential for major accidents namely—
   a. identification of major accident hazards;
   b. the condition of events which could be significant in brining one about;
   c. a brief description of the measures taken.

8. Information relating to the site namely—
   a. a map of the site and its surrounding area to a scale large enough to show any features that may be significant in the assessment of the hazard or risk associated with the sits;
      (i) area likely to be affected by the major accident
      (ii) population distribution in the vicinity.
   b. a scale plan of the site showing the location and quantity of all significant inventories of the hazardous chemicals;
   c. a description of the processes or storages involving the hazardous chemicals, the maximum amount of such a hazardous ouschemical in the given process or storage and an indication of the conditions under which it is normally held;
   d. the maximum number of persons likely to be present on site.

9. the arrangement for training of workers and equipment necessary to ensure safety of such workers.

INDEX

SCHEDULE 8

(SEE RULE 68-J (9) (1))

Information to be furnished in a safety Report

1. The name and address of the person furnishing the information.

2. Description of the industrial activity namely. —

   a. site.
   b. construction design.
   c. protection zones (explosion protection, separation distances)
   d. accessibility of plant,
   e. maximum number of person working on the site and particularly of those persons exposed to the hazard.

3. Description of the processes, namely-

   a. technical purpose of the Industrial activity.
   b. basic principles of the technological process.
   c. Process and safety - related data for the individual process stages.
   d. Process description,
   e. safety-related types of utillities.

4. Description of the hazardous chemicals, namely-

   a. Chemical (Quantities substance data on physical and chemical properties, safety related) data on explosive limits, flash-point thermal stability, texicological data and threshold limit values, lethal concentrations),
   b. the form in which the chemicals may occur or into which they may be transformed in the event of abnormal conditions,
   c. the degree of purity of the hazardous chemical.

5. Information on the Preliminary Hazard Analysis namely -

   a. type of accident,
   b. system elements or forseen events that can lead to a major accident
   c. hazards.
   d. safety-relevent components.

6. Description of safety-relevent units, among others;

   a. special design criteria,
   b. controls and alarms,
   c. pressure relief systems
   d. quick acting valves,
   e. collecting tanks/dump tanks,
   f. sprinkler systems
   g. fire protection.

INDEX

7. Information on the hazard assessment, namely-

a. Identification of hazards,
b. the causes of accidents,
c. assessment of hazards according to their occurrence frequency,
d. assessment of accident consequences,
e. safety systems,
f. known accident history.

8. Description of information on organisational systems used to carry on industrial activity safely, namely -

a. maintenance and inspection schedules,
b. guidelines for the training of personnel,
c. allocation and delegation of responsibility for plant safety,
d. Implementation of safety procedures.

9. Information on assessment of the consequences of major accidents, namely-

a. assessment of the possible release of hazardous chemical or of energy,
b. possible dispertion of released chemicals;
c. assessement of the effects of the releases (size of the affected area, health effects, property damage)

10. Information on the mitigation of major accidents namely-

a. fire brigade;
b. alarm systems;
c. emergency plan containing system of organisation used to fight the emergency, the alarm and the communication routes, guidelines for fighting the emergency, examples of possible accident sequences,
d. co-ordination with the District Collector or the District Emergency Authority and its off site emergency plan,
e. notification of the nature and scope of the hazard in the event of an accident
f. antidotes in the event of a release of a hazardous chemical.

17. In the said rules, after rule 68-J, the following new rule shall be inserted namely :

"68-K : Disclosure of information to workers.

1. The occupier of a factory involving a 'hazardous process' shall supply to all workers the following information in relation to handling of hazardous materials or substances in the manufactures. transportation, storage and other processes.

a. requirements of section 41B, 41C and 41H of the Act;
b. a list of 'Hazardous Processes' carried on in the factory;
c. location and availability of all material data sheet as per rule 68-G.

INDEX

d. physical and health hazards arising from the exposure to or handling of substances;
e. measures taken by the occupier to ensure safety and control of physical and health hazards;
f. measures to be taken by the workers to ensure safe handling storage and transportation of hazardous substances;
g. personal Protective equipment required to be used by workers employed in 'hazardous process' or 'dangerous Operations' ;
h. meaning of various labels and marketings used on the contaners of hazardous oussubstances as provided under rule 68-Q ;
i. sings or any symptoms likely to be mainifasted on exposure to hazardous substances and to whom to report;
j. measures to be taken by the workers in case of any spilage or leakage of a hazardous substance,
k. role of workers vis-a-vis the emergancy plan of the factory, in particular and the avacuation procedures;
l. any other information considered necessary by the occupier to ensure safety and health of workers.

2. The information required by sub-rule (1) shall be complied and made known to workers individually through supply of booklets or leaflets and display of cautionary notices at the work places.

3. The booklets, leaflets and the cautionary notice of displayed in the factory shall be in the language understood by the majority of the workers and also explain to them.

4. The chief Inspector may direct the occupier to supply further information to the workers as deemed necessary.

68-L : Disclosure of information to the Chief Inspector.

1. The occupier of every factory involving a hazardous process' shall furnish, in weiting, to the chief inspector, a copy of all the information furnished to the workers.

2. A copy of compilation of material safety data sheets in respect of hazardous substances used, produced or stored in the factory shall be furnished to the chief Inspector, and the local Inspector.

3. The Occupier shall also furnish any other information asked for by the chief inspector from time to time for the purpose of this Act and rules made thereunder.

68-M : Review of the information furnished to workers, etc.

1. The occupier shall review once in every calender year and modify if necessary, the information furnished under rule 68-K to 68-L to the workers, and the Chief Inspector,

2. In the event of any change in the process or operation or methods of work or when any new substance is introduced in the process or in the event of a serious accident taking place, the information so furnished shall be reviewed and modified to the extent necessary.

68-N Confidentiality of information

The occupier of a factory involving a 'hazardous shall disclose all information needed for protecting safety and health of the workers to —

INDEX

a. his workers;
b. Chief Inspector,

as required under rule 68-K and 68-L if the occupier is of the opinion that the disclosure of details regarding the process and formulations shall adversely effect his business interests he may make a representation to the chief inspector stating the reasons for with holding such information The Chief Inspector shall give an opportunity to the occupier of being heard and pass an order on the representation.

68- O : Health and Safety Policy,

1. The occupier of every factory covered under the first schedule under section 2 (cb) or carrying out processes or operations declared to be dengerous under section 87 of the act shall prepare a written statement of his policy in respect of health and safety of workers at work.

2. Notwithstanding anything contained in sub-rule (1) the chief inspector may requires the occuplers of any of the factories or class or description of factories to comply with the requirements of sub-rule (1), if, in his opnion , it is expedient to do so.

3. The Health and safety should contain or deal with:

   a. declared intension and commitment of the top management to health, safety and environment and compliance with all the relevant statutory requirements;
   b. Organisational set up to carry out the declared policy assigning the responsibility at different levels; and
   c. Arrangements for making the policy effective.

4. In particular, the policy shall specify the following:

   a. arrangements for involving the workers.
   b. intention of taking account the health and safety performance of individuals at different levels while considering their career advancement;
   c. fixing the responsilility of the contractors, sub-contractors, transporters and other agencies entering the premises:
   d. Providing a resume of health and safety performance of the factory in its annual report;
   e. Relevent techniques and methods such as safety audits and risk assessment for periodical assessement at least once in every two years of the status on health, safety and environment and taking all the remedial measures;
   f. Statings its intention to integrate health and safety, in all decisions including these dealing with purchase of plant, equipment, machinery and material as well as selection and placement of personnel:
   g. Arrangements for informing educating and trainig and retraining its own employees at different levels and the public, wherever required.

5. A copy of the declared Health and safety policy signed by the occupier shall be made available to the inspector having jurisdiction over the factory and to the chief inspector;

6. The policy shall be made widely known by-

   a. making copies available to all workers including contract workers, apprentices, transport workers suppliers, etc.

   b. displaying copies of the policy at conspicuous places, and

   c. any other means of communication;

INDEX

in a language understood by majority of workers.

7. The occupier shall revise the Safety Policy as often as may be appropriate, but it shall necessarily be revised under the following circumstances :

a. Whenever any expansion or modification having implications on safety and health of persons at work is made; or
b. Whenever new substances(s) or articles are introduced in the manufacturing process having implications on health and safety of persons exposed to such substances.

68-P : Information on industrial wastes ;-

1. The information furnished under rule 68-K and 68-L shall include the quantity of the solid and liquid wastes generated per day, their charactaristics and the method of treatment such as incineration of solid wastes, chemical and biological treatment of liquid wastes, and arrangements for their final disposal.

2. It shall also include information on the quality and quantity of gaseous waste discharged through the stacks or other openings and arrangements such as provision of scrubbers, cyclone separates, electrostatic pracipitators or simllar such arrangements made for controlling pollution of the environment.

3. The occupier shall also furnish the information prescribed in the sub-rules (1) and (2) to the State Pollution Control Board.

68-Q : Collection, development and dissemination of information :-

1. The occupier of every factory involving a 'hazardous' shall arrange to obtain to develop information in the form of Material Safety Data Sheet (MSDS) in respect of every hazardous substance or material handled in the manufacture, transportation and storage in the factory. It shall be accessible upon request to a worker for references.

a. Every such Material Safety Data Sheet shall include the following information :

i. the identity used on the table;
ii. hazardous ingredients of the substance;
iii. physical and chemical characteristics of the hazardous substances;
iv. the physicalhazards of the hazardous substances, including the potential for fire, explosion and reactivity;
v. the health hazards of the hazardous substance, including signs and symptoms of exposure, and any medical conditions which are generally recognised as being aggravated by exposure to the substance;
vi. the primary route (s) of entry;
vii. the permissible limits of exposure prescribed in the Second schedule under Section 41-F of the Act, and in respect of a chemical not covered by the said Schedule, any exposure limit used or recommended by the manufacturer, importer or occupier,
viii. any generally applicable precautions for safe handling and use of the hazardous substance, which are known including appropriate hygienic proctictive measures during repairs and maintenance of contaminated equipment, procedures for clean-up of spills and leaks;

INDEX

ix. any generally applicable control measures, such as appropriate engineering controls, work practices or use of personal protective equipments;

x. emergency and first aid procedures;

xi. the date of preparation of the Material Safety Data Sheet, or the last change to it; and

xii. the name address and telephone number of the manufacturer, importer, occupier or other responsible party preparing or distributing the Material Safety Data Sheet, who can provide additional information on the hazardous substance and appropriate emergency procedures, if necessary.

b. The occupier while obtaining or developing a Material Safety Data Sheet in respect of a hazardous substance shall ensure that the information recorded accurately reflects the scientific evidence used in making the hazard determination. If he becomes newly aware of any significant information regarding the hazards of a substance, or ways to protect against the hazards this new information shall be added to the Material Safety Data Sheet as soon as practicable..

c. The Material Safety Data Sheet be in format given in the Schedule-V under rule 68-J and the Manufacture, Storage and Import of Hazardous Chemicals Rules, 1989 under the Environment (Protection) Act, 1986.

Labelling :

2. Every container of a hazardous substance shall be clearly labelled or marked to identify :

a. the contents of the container;
b. the name and address of the manufacturer or importer of the hazardous substances;
c. the physical and health hazards; and
d. the recommended personal protective equipment needed to work safely with the hazardous substance.

68-R : Making available Health Records to workers :-

1. The occupier of every factory involving a "hazardous process' shall make accessible the health records including the record of worker's exposure to hazardous process or as the case be, the medical records of any worker for his perusal under the following conditions :

a. once in every six months or immediately after the medical examination whichever is earlier;
b. if the Factory Medical Officer or the Certifying Surgeon as the case may be, is of the opnion that the worker has manifested signs and symptoms of any notifiable-disease as specified in the Third Schedule of the Act;
c. if the worker leaves the employment;
d. if any one of the following authorities so direct :—

— The Chief Inspector of Factories;

— The Health Authority of the Central or State Government;

— Commissioner of Workmen's Compensation;

— The Director General, Employees State Insurance Corporation;

— The Director, Employees State Insurance Corporation (Medical Benefits); and

INDEX

— The Director General, Factory Advice Service and Labour Institutes.

2. A copy of the uptodate health records including the record of worker's exposure to hazardous process or, as the case may, the medical records shall be supplied to the worker on receipt of an application from him. X-ray plates and other medical diagnostic reports may also be made available for reference to his medical practitioner.

68-S : Qualifications, etc. of Supervisors :—

1. All persons who are required to supervise the handling of hazardous substances shall possess the following qualifications and experience :

   a. i. A degree in chemistry or Diploma in Chemical Engineering or Technology with 5 years experience; or

   ii. A Master's Degree in Chemistry or a Degree in Chemical Engineering or Technology with 2 years experience.

   The experience stipulated above shall be in process operation and maintenance in the Chemical Industry.

   b. The Chief Inspector may require the Supervisor to undergo training in Health and Safety.

2. The syllabus and duration of the above training and the organisation conducting the training shall be approved by the DGFASLI or the State Government in accordance with the guidelines issued by the DGFASLI.

68-T : Medical Examination :-

1. Workers employed in a 'hazardous process' shall be medically examined by a qualified medical practitioner hereinafter referred to as Factory Medical Officer, in the following manner :

   a. Once before employment, to ascertain physical fitness of the person to do the particular job;

   b. Once in a period of 6 months, to ascertain the health status of all the workers in respect of occupational health hazards to which they are exposed; and in cases where in the opinion of the Factory Medical Officer it is necessary to do so at a shorter interval in respect of any workers;

   c. The details of pre-employment and periodical medical examinations carried out as aforesaid shall be recorded in the Register in Form No. 32.

2. No person shall be employed for the first time without a certificate of fitness in Form No. 33 granted by the Factory Medical Officer. If the Factory Medical Officer declares a person unfit for being employed in any process covered under sub-rule (1), such a person shall have the right to appeal to the Inspector who shall refer the matter to the Certifying Surgeon whose opinion shall be final in this regard. If the Inspector is also a Certifying Surgeon, he may dispose of the application himself.

3. Any Findings of the Factory Medical Officer revealing any abnormality or unsuitability of any person employed in the process shall immediately be reported to the certifying Surgeon who shall in turn, examine the concerned worker and communicate his findings to the occupier within 30 days. If the Certifying Surgeon is of the opinion that the worker so examined is required to be taken away from the process for health protection, he will direct the occupier accordingly, who shall not employ the said workers in the same process. However, the worker so taken away shall be provided with alternate placement unless he is in the opinion of the Cerifying Surgeon, fully incapacitated in which case the worker affected shall be suitably rehabilitated.

INDEX

4. A certifying Surgeon on his own motion or on a reference from an Inspector may conduct medical examination of a worker to ascertain the suitability of his employment in a hazardous process or for ascertaining his health status the opinion of the Certifying Surgeon in such a case shall be final. The fee required for this medical examination shall be paid by the occupier.

5. The worker taken away from employment in any process under sub-rule (2) may be employed again in the same process only after obtaining the Fitness Certificate from the Certifying Surgeon and after making entry to that effect in the Health Register.

6. The worker required to undergo Medical Examination under these rules and for any Medical Survey conducted by or on behalf of the Central or the State Government shall not refuse to undergo such medical examination.

Rule 68-U : Occupational Health Centres

1. In respect of any Factory carring on 'hazardous process' there shall be provided and maintained in good order an Occupational Health Centre with the services and facilties as per scale laid down hereunder :

a. For factories employing upto 50 workers —

i. the services of a Factory Medical Officer on retainer- ship basis, in his clinic to be notified by the occupier. He will carryout the pre-employment and periodical medical examination as stipulated in Rule 68-T and render medical assistance during any emergency.

ii. a minimum of 5 persons trained in first-aid procedures amongst whom at least one shall always be available during the working period;

iii. a fully equipped first-aid box.

b. For factories employing 51 to 200 workers -

i. An occupational Health Centre having a room with a minimum floor area of 15 sq.m. with and walls made of smooth and impervious surface and with adequate illumination and ventilation as wall as equipment as per the schedule annexed to this Rule;

ii. a part-time Factory Medical Officer shall be in over-all charge of the Centre who shall visit the factory at least twice in a week and whose services shall be readily available during medical emergecies;

iii. one qualified and trained dresser-cum-compounder on duty throughout the working period;

iv. a fully equipped first aid box in all the departments;

c. For factories employing above 200 Workers —

i. one full-time Factory Medical Officer for factories employing up to 500 workers and one more Medical Officer for every additional 1000 workers or part thereof;

ii. an Occupational Health Centre having at least 2 rooms each with a minimum floor area of 15 sq. metre with floors and walls made of smooth and impervious surface and adequate illimination and ventilation as well as equipment as per the schedule annexed to this rule.

iii. there shall be one nurse, one dresser cum compounder and one sweeper cum ward boy throughout the working period;

iv. the occupational Health Centre shall be suitably equipped to manage Medical emergencies.

INDEX

2. The Factory Medical Officer required to be appointed under sub-rule (1) shall have qualification included in schedules to the Indian Medical Degrees Act of 1916 or in the Schedule to the Indian Medical Council Act, 1956 and possess a Certificate of Training in Industrial Health of minimum three months duration recognised by the State Government:

Provided that —

i. a person possessing a Diploma in Industrial/or equivalent shall not be required to possess the certificate of training as aforesaid;

ii. the Chief Inspector may, subject to such conditions as he may specify, grant exemption from the requirement of this sub-rule, if in his opnion a suitable person possessing the necessary qualification is not available for appointment;

iii. in case of a person who has been working as a Factory Medical Officer for a period of not less than three years on the date of commencement of this rule, the Chief Inspector may, subject to the condition that the said person shall obtain the aforesaid certificate of training within a period of three years, relax the qualification.

3. The syllabus of the course leading to the above certificate, and the organisations coducting the course shall be approved by the Directorate General Factory Advice Service and LabourInstitutes or the State Government in accordance with the guidelines issued by the DGFASLI.

4. Within one month of the appointment of Factory Medical Officer, the occupier of the Factory shall furnish to the Chief Inspector, the following particulars—

a. Name and address of the Factory Medical Officer;
b. Qualifications;
c. Experience, if any, and
d. The sub-rule under which appointed.

SCHEDULE (Rule 68-U (b) (i))

Equipment for Occupational Health Centre in Factories

1. A glazed sink with hot and cold water always available.
2. A table with a smooth top at least 180 cm. x 105 cm.
3. Means for sterilzing Instruments.
4. A couch.
5. Two Buckets or containers with close fitting lids.
6. A kettle and spirit stove or other suitable means of boiling water..
7. One bottle of spiritus ammoniac aromatious (120 ml.)
8. Two medium size sponges.
9.
10. Four cakes of toilet, preferably antiseotic soap.
11. Two glass tumblers and two wine glasses.
12. Two clinical thermometres.
13. Two tea spoons.
14. Two graduated (120 m.l.) measuring glasses.
15. One wash bottle (1000 cc) for washing eyes.
16. Onebottle (one litre) carbolic lotion 1 in 20.

INDEX

17. Three chairs
18. One screen.
19. One electric hand torch.
20. An adequate supply of tetanus toxied.
21. Cora,one liquid (60 ml.)
22. Tablets - anthistaminic, antispamedic (25 each 0.)
23. Syringes with needles - 2 cc. 5 cc and 10 cc.
24. Two eedle holders, big and small.
25. Suturing needles and
25. One dissecting forceps.
27. One dressing forceps.
28. One Scapals.
29. One stethoscope.
30. Rubber bandage - pressure bandage.
31. Oxygen cyclinder with necessary attachments.
32. One Blood Pressure apparatus.
33. One patellar Hammer.
34. One Peak-flow meter for lung function measurement.
35. One stomach wash set.
36. Any other equipment recommended by the Factory Medical Officer according to specific need relating to manufacturing process.
37. In addition —

1. For Factories employing 51 to 200 workers.

i. Four plain wooden splints 900mm x 100mm x 6mm.
ii. Four plain wooden splints 350mm x 75mm x 6mm.
iii. Two plain wooden splints 250 mm x 50 mm x 12mm.
iv. One pair artory forceps.
v. Injection- morphia, pethidins, atropine, adrenaline, coramine, novocan (2 each).
vi. One surgical scissors.

2. For factories employing above 200 workers

i. Eight plain wooden splaint 900mm x 100 mm x 6 mm.
ii. Eight plain wooden splints 350 mm x 75mm x 6mm.
iii. Four plain wooden splints 250 mm x 50mm x 12mm.
iv. Two pair artory forceps.
v. Injection morphia, pathidins, atroplns, adrenaline, coramine, novocan (4 each)
vi. Two surgical scissors.

68-V Ambulance Van :— 1. In any factory carrying on 'hazardous Process' there shall be provided and maintained in good conditions, a suitably constructed ambulance van equipped with items as per sub-rule (2) and menned by a full-time Driver-cum- Mechanic and a Helper and a Helper trained in first-aid, for the purpose of transportation of serious cases of accidents or sickness. The ambulance van shall not be used for any purpose other than the purpose stipulated herein and will normally be stationed at or near to the Occupational Health Centre:

Provided that a factory employing less than 200 workers may make arrangements—

Ambulance shall have the following equipments :

INDEX

a. General :
   — A wheeled stretcher with folding and adjusting devices; with the head of the stretcher capable of being tilted upward;
   — Fixed suction unit with equipment;
   — Fixed oxygen supply with equipment;
   — Pillow with case; sheets; Blankets; Towels; Enlesis bag; Bed pan; Urinal; Glass.

b. Safety equipment :
   — Flares with life of 30 minutes; flood lights;
   — Flash lights; Fire extingulsher dry powder type;
   — Insulated gauntlets

c. Emergency Care Equipment
   i. Resuscitation
      — Portable suction unit; portable oxygen units;
      — Bag Valve-mask, hand operated artificial ventilation unit;
      — Airways; Mouth gags; Tracheestomy adaptors;
      — Short spine board; I. V. Fluide with administration unit;
      — B. P. Manometer; - Cugg; Stethoscope
   ii. Immobilization
      — Long and short padded boards; Wire ladder spilints;
      — Triangular bandage :—Long and short spine boards.
   iii. Dressings
      — Gauze Pads 100 mm x 100 mm - Universal dressing 250 mm x 900 mm
      — Roll of aluminlum foils - Soft roller bandages 15 cm x 5 Mts.; - Adhesivetape in 75 mm; - safety pins;
      — Bandage sheets; - Burn sheet.
   iv. Polsoning
      — Syrup of Ipecac - Activated Charcoal pre packeted in dozes : - Snake - Snake-bite kit;
      — Deinkig water
   v. Emergency Medicines
      — As per requirement (under the advice of Medical Officer only).

68-W : Decontamination facilities :

In every factory carrying out 'hazardous', process', the following provisions shall be made to meet emergency:

a. Fully equipped first aid box;
b. reaadily accessible means of water for washing by workers as well as for dranching clothing of workers who have been contaminated with hazardous and corrosive substance ; and such means shall be as per the scale shown in the table below :

TABLE

No. of persons employed at any time.	**No. of drenching showers.**
(i) up to 50 workers	2
(ii) Between 51 to 200 workers.	2 + 1 for every additional 50 or part thereof.
(iii) Between 201 to 500 workers.	6 + 1 for every additional 100 or part thereof.
(iv) 501 workers and above	8 + 1 for every additional 200 or part thereof.

INDEX

(c) a sufficent number of eye wash bottles filled with distilled water or suitable liquids, kept in boxes or cupboards conveniently situated and dearly idicated by a distinctive sign which shall be visible at all times.

68-X : Issue of guidelines :

For the purpose of compliance with the requirements of sub-sections (1), (4) and (7) of Section 41-Bor 41-C the Chief Inspector may, if deemed necessary, issue guidelines from time to time to the occupiers of factories carrying on 'hazardous process': Such guidelines may be based on National Standards, Codes of Practice or recommendations of international Bodies such as IKO and WHO,

68-Y : Safety Committee : For every factory-

(1) (a) which carries on any process or operation declared to be dangerous under section 87 of the Act; or
(b) which carries on 'hazardous process' as defined under section 2 (cb) of the Act;

There shall be a Safety Committee.

(2) The representatives of the management on Safety Committee shall include--

(a) A senior official, who by his position in the organisation can contribute effectively to the functioning of the committee, shall be the Chairman;
(b) ASafety Officer and a Factory Medical Officer wherever avalable and the Safety Officer in such a case shall be the Secretary of the Committee.
(c) A representative each from the production, maintenance and purchase departments.

(3) The workers' representatives on this Committee shall be elected by the workers.

(4) The tenure of the Committee shall be two years.

(5) Safety Committee shall meet as often as necessary but atleast once in every quarter. The minutes of the meeting shall be recorded and produced before the Inspector on demand.

(6) Safety Committee shall have the right to be adquately and suitably informed of—

(a) potential safety and health hazards to which the workers may be exposed at work place.
(b) data on accidents as well as data resulting from surveillance of the working environment and of the health of workers exposed to hazardous substances so for as the factory is concerned, provided that the Committee under takes to use the data on a confidential basis and solely to provide guidance and advice on measures to improve the working environment and the health and safety of the workers.

(7) The functions and duties of the safety committee shall include—
(a) assisting and co-operating with the management in achieving the aims and objectives outlined in the 'Health and Safety Policy' of the occupier;
(b) dealing with all matters concerning health, safety and environment and to arrive at practicable solutions to problems encountered;
(c) creating safety awareness amongst all workers;
(d) undertaking educational, training and promotional activities;
(e) discussing reports on safety, environmental and occupational health surveys, safety audits, risk assessment. emergency and disaster management plans and implementation of the recommendations made in the reports;

INDEX

(f) carrying out health and safety surveys and identifying causes of accidents;
(g) looking into any complaint made on the likelihood of an imminent danger to the safety and health of the workers and suggesting corrective measures; and
(h) reviewing the implementation of the recommendations made by it.

(8) Where owing to the size of the factory, or any other reason, the functions referred to in sub-rule (7) cannot be effectively carried out by the Safety Committee, it may establish sub-committees as may be required to assist it.

18 In the said rules, in rule 78, in sub-rule (2), after clause (e), the following clauses shall be inserted, namely :
"(f) the cost of fuel required for cooking or heating food stuffs or water; and
(g) the wages of the employees serving in the canteen and the cost of uniforms, if any, provided to them."

19 In the said rules, rule 83-b shall be deleted.

20 In the said rules, in rule 91, in the schedule in column number-4 against entry at serial number 58, after the words "work on hot air sizing machine" "and work on multicylinder high speed sizing machine" shall be inserted.

21 In the said rules, after rule 91, the following rule shall be inserted, namely :--

91-A : Exemption to women workers working in fish-curing and fish canning factories :

All women working in fish-curing and fish-canning factories shall be exempted from the restrictions set out in sub-section (1) of section 66 subject to the following conditions :

1. No women shall be employed before 6-00 a.m. or after 7-00 p.m. for more than fifteen days in any calendar month. The number of days on which a woman may be so employed shall not exceed hundred in a year.

2. Women may be employed after 11-00 p.m. only if the occupier of the factory provides free transport facilities to the women workers to reach their home after night work.

3. A period of uninterrupted rest of at least 9 hours shall intervene between the cessation of a period of work after 7-00 p.m. on any day and the beginning of a fresh period of work on the following day.

22 In the said rules, in rule 102, in sub-rule (1)—
(a) for the word "operations" wherever it occurs, the words "manufacturing process or operations" shall be substituted;

(b) for Schedule-II, the following shall be substituted, namely :—

SCHEDULE -- II

Electrolytic plating or oxidation of metal articles by use of an electrlyte containing acids, bases or salts of metals such as chromium, nickel, cadmium, zinc, copper, silver, gold, etc.

1. Definitions.—For the purposes of this Schedule--
(a) "electrlytic process" means the electrolytic plating or oxidation of metal articles by the use of an electrlyte containing acids, bases or salts of metals such as chromium, nickel, cadmium, zinc, copper, silver, gold, etc;
(b) "bath" means any vessel used for an electrolytic process or for any subseequent process; and
(c) "employed" means employed in any process involving contact with liquid from a bath.

INDEX

2. **Exhaust draught.**—An efficient exhaust draught shall be applied to every vessel in which an electrolytic process is carried on. such draught shall be provided by mechanical means and shal operate on the vapour or spray given off in the process as near as may be at the point of origin. The exhaust draught appliance shall be so constructed, arranged and maintained as to prevent the vapour or spray entering into any room or place in which work is carried on.

3. **Prohibition relating to women and young persons**—No women, adolescent or child shall be employed or permitted to work at a bath.

4. **Floor of workrooms.**—The floor of every workroom containing a bath shall be imprevious to water. The floor shall be maintained in good and level condition and shall be washed down at least once a day.

5. **Protective devices.—**

(1) The occupier shall provide and maintain in good and clean condition the following articles of protective devices for the use of all persons employed on any process at which they are liable to come in contact with liquid from a bath and such devices shall be worn by the persons concerned--

(a) waterpfoof aprons and bibs; and

(b) for persons actually working at a bath, loos fitting, rubber gloves and rubber boots or other footwear, and chemical goggles,

(2) The occupier shall provide and maintain for the use of all persons employed suitable accommodation for the storage and drying of protective devices.

6. **Water facilities.—**

(1) There shall be provided and maintained in good repairs for the use of all persons employed in electrolytic process and processes incidental to it--

(a) a wash place undercover, with either--

(i) a trough with a smooth impervious surface fitted with a waste pipe, and of sufficient length to allow at least 60 cms. for every 5 persons employed at any one time, and having a constant supply of water from taps or jobs above the trough at intervals of not more than 60 cms. or

(ii) at least one wash basin for every five such persons employed at any one time, fitted with a waste pipe and having a constant supply of water laid on.

(b) a sufficient supply of clean towels renewed daily, and soap or other suiatable cleaning material.

(2) In addition to the facility in sub-paragraph 1, an approved type of emergency shower with eye fountain shall be provided and maintained in good working order. Wherever necessary, in order to ensure continuous water supply, storage tank of 1500 litres capacity shall be provided as a source of clean water for emergency use.

7. Cautionary placard.--A cautionary placard in the form specified below and printed in the language of the majority of the workers employed shal be affixed in a prominent place in the factory where it can be easily and conveniently read by the workers.

CAUTIONARY NOTICE

Electrolytic plating

1. Chemicals handled in this plant are corrosive and poisonous.
2. Smoking, chewing tobacco, eating food or drinking, in this area is prohibited. No food stuff or drink shall be brought in this area.
3. Some of thesechemicals may be absorbed through the skin and may cause poisoning.

INDEX

4. A good wash shall be taken before meals.
5. Protective devices supplied shall be used while working in this area.
6. Spillage of the chemicals on any part of the body or on the floor shall be immediately washed away with water.
7. All workers shall report for the prescribed medical test regularly to protect their own health.

8. **Medical facilities and record of examinations and tests.--**

(1) The occupier of every afctory in which eletrolytic processes are carried on shall--
(a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose appointment shall be subject to the appoval of the Chief Inspector of Factories;
(b) provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a); and
(c) maintain a sufficient supply of suitable barrier cream, ointment and impermeable water proof plaster in a separate box readily accessible to the workers and used solely for the purpose of keeping these substances. In case cyanides are used in the bath, the box shall also contain an emergency cyanide kit.
(2) The medical practioner shall examine all workers before they are employed in electrolytic processes. Such examination in case of chromeplating shall include inspection of hands, forearms, and nose, and shall be carriedout once at least once in every fort night.
(3) The trecord of the examinations referred to in sub-paregraph (2) shall be maintained in a separate register approved by chief Inspector of Factories which shall be kept readily available for inspection by the Inspector.

9. **Medical examination by the Certifying Surgeon.--**
(1) Every worker employed in the electrolytic processes shall be examined by a Certifying Surgeon before his first employment. Such examination shall include X-ray of the chest and--
(a) in case of chromium plating include examination for nasal septum perforation and test for chromium in urine;
(b) in case of nickel plating, test for nickel in urine; and
(c) in case of cadmium plating, test for cadmium in urine and -2 microglobulin in urine.
(2) No worker shall be employed in any electrolytic process unless certified fit for such employment by the certifying surgeon.
(3) Every worker employed in the electrolytic processes shall be re-examined by a certifying surgeon at least once in every year, except in case of the workers employed in cadmium, chromium and nickel plating processes for whom this examination shall be carried out once in every six months, such re-examination shall, wherever the Certifying Surgeon considers appropriate, include tests as specified under sub-paragraph (1) excluding the X-ray of the chest which shall not be required to be carried out earlier than once in three years.
(4) the Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form 27-A. the record of Examinations carried out shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraph (1) and (2), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form No. 20.
(5) the Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.
(6) If at any time the Certifying Surgeon is of the opinion that a worker is no longer fir for employment in the electrolytic processes on the ground that continuous therein would involve danger to the health of the worker, he shall make a recoird of his findings in the said certificate and the health register. the entry of his findings in those documents shall also include the period for which he considers that the said person is unfit for work in the said processes. The person declared unfit in such circumstances shall be provided with alternate placement facility unless he is fully incapiciated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated.

INDEX

(7) No person who has been found unfit to work as specified in sub-paragraph (6) shall be re-employed or pwermitted to work in the said processe unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

(c) For schedule-xi, the following shall be substituted, namely :–

"SCHEDULE - XI

Manufacture or manipulation of carcinogenic dye Intermediates

1. Application.—The schedule shall apply in respect of all factories or any part thereof where processes in which the substances, mentioned in paragraph 3 and 4 are formed, manufactured, handled or used and the processes incidental in this paragraph shall be referred to here in ofter as "the processes" and such a reference shall mean any or all the processes described in this paragraph.

2. **Definition.**–For the purpose of this schedule the following definitions shall apply, unless the context otherwise requires.–

(a) "controlled trolledsubstances" means chemical substances mentioned in paragraph 4 of this schedule;

(b) "efficient exhaust draught" means localised ventilation effected by mechanical means for the removeal of gas, vapour, dust or fume so as to prevent them from escaping into the air of amny place in which work is carried on. No draught, shall be deemed to be efficient which fails to remove smoke generated at the point where such gas, vapour, fume or dust originates; and

(c) "prohibited substances" means chemical substances mentioned in paragraph 3 of this schedule.

(d) "first Employment means first employment in the said processes and also re-employment in such processes following any cessation of employment for a continuous period exceeding three calendar months.

3. Prohibited substances.—For the purpose of this Schedule, the following chemical substances shall be classified as "prohibited substances" except when these substances are present or are formed as a by-product of a chemical reaction in a total concentration not exceeding one present :-

(a) beta-naphthylamine and its salts;

(b) benzidine and its salts;

(c) 4-amino diphenyl and its salts;

(d) 4-nitro diphenyl and its salts; and

(e) any substance containing any of these compounds.

4. **Controlled substances.**—For the purpose of this Schedule, the following chemical substances shall be classified as "controlled substances" :

(a) alpha-naphthatamine or alpha-naphthylaming containing not more than one persent of beta-naphthylamine either as a by-product of chemical reaction or otherwise, and its salts;

(b) ortho-tolidine and its salts:

(c) dianisidine and its salts;

(d) dichioro benzidine and its salts;

(e) auramine; and

(f) mageuta.

5. **Prohibition of employment.**—No person shall be employed in the said processes in any factory in which any prohibited substance is formed, manufactured, processed, handled or used except as exempted by the Chief Inspector as stipulated in paragraph 23.

INDEX

6. **Requirements for processing or handling controlled substances.—**

(1) wherever any of the controlled substances referred to in paragraph 4 are formed, manufactured, processed, handled, or used, all practical steps shall be taken to prevent inhalation, ingestion or absorption of the said controlled substance by the working while engaged in processinh that substance, and its storage or transport within the plant, or in cleaning or maintenance of the concerned equipment, plant, machinery and storage areas.

(2) As far as possible all operations shall be carried out in a totally enclosed system. Wherever such enclosure is not possible, efficient exhaust draught shall be applied at the point where the controlled rolledsubstances are likely to escape into atmosphere during the process.

(3) The controlled subatances shall be received in the factory in tightly closed containers and shall be kept so except when these substances are in process or in use. The controlled substances shall leave the factory only in tightly closed containers of appropriate type. All the containers shall be plainly labelled to indicate the contents.

7. **Personal Protective Equipment.—**

(1) The following Items of personal protective equipment shall be provided and issued to every worker employed in the said processes :–

(a) long trousers and shirts or overalls with full sleeves and head coverings. The shirt or overall shall cover the neck completely; and
(b) rubber gum-boots.

(2) The following items of personal protective equipment shall be provided in sufficient numbers for use by workers employed in the said processes when there is danger of injury during the performance of normal duties or in event of emergency :

(a) rubber hand-gloves;
(b) rubber aprons; and
(c) airline respirators or other suitable respiratory protective equipment.

(3) It shall be the responsibility of the manager to maintain all items of personal protective equipment in a clean and hygienic condition and in good repair.

8. **Prohibition relating to employment of women and yound persons.-** No woman or ypung person shall be employed or permitted to work in any room in which the said processes are carried on.

9. **Floore of workroom.-**The floor of every workroom in which the said processes are carried on shall be (a) smooth and impervions to water provided that asphalt or tar shall not be used in the composition of the floor, (b) maintained in a state of good repair ,(c) with a suitable slope for easy draining and provided with gutters and (d) thoroughly washed daily with the drain water being led into a sewer through a closed channel.

10. **Disposal of empty containers.-** Empty containers used for holding controlled substances shall be thoroughly cleaned of their contents and treated with an inactivating agent before being discarded.

11. **Manual handling. -** Controlled substances shall not be allowed to be mixed, filled, emptied or handled except by means of a scoop with a handle Such scoop shall be thoroughly cleaned daily.

INDEX

12. **Instructions regarding risk.** —Every worker on his first employment in the said processes shall be fully Instructed on the properties of the toxic chemicals to which he is likely to be exposed to, of the dangers involved and the precautions to be taken. Workers shall also be instructed on the measures to be taken to deal with an emergency.

13. **Cautionary Placards.**— Cautionary placards in the specified in appendix attached to this Schedule and printed in the language of the majority of the workers employed in the said processes shall be affixed in prominent places frequented by them in the factory, where the placards can be easily and conveniently read. Arrangements shall be made by the manager to instruct periodically all such workers regardig the precautions contained in the cautionary placards.

14. **Obligations of the workers.**—It shall be the duty of the persons employed in the processes to submit themselves for the medical examination including exfoliative cytology of urine by the Certifying - Surgeon or the qualified medical practitioner as provided for, under these rules.

15. **Washing and bathing facilities.** — (1) The following washing and bathing gfacilities shall be provided and maintained in a clean state and in good repair for the use of all workers employed in the said processes :

(a) a wash place under cover having constant supply of water and provided with clean towels, soap and all nail brushes and with at least one stand pipe for every five such workers;
(b) 50 percent of the stand pipes provided under clause (a) shall be located in bathrooms where both hot and cold water shall be made available during the working hours of the factory and for one hour thereafter;
(c) the washing and bathing facilities shall be in close proximily of the area housing the said processes;
(d) clean towels shall be provided individually to each worker; and
(e) in addition to the taps mentioned under clause (a), one stand pipe, in which water is made available, shall be provided on each floor,

(2) Arrangement shall be made to wash factory uniforms and other work clothes everyday.

16. **Food, drinks, etc. prohibited i workroom.**—No worker shall consume food, drink, pan, supari or tobacco or shall smoke in any workroom in which the said processes are carried on and no worker shall remain in any such room during intervals for meals of rest.

17. **Clock room.** — There shall be provided and maintained in a clean state and in good repair for the use of the workers employed in the said processes (a) a cloakroom with lockers having two compartments - one for strest clothes and the other for work clothes, and (b) a place separate from the locker room and the messroom, for the storage of protective eqipment provided under paragraph 7. The accommodation so provided shall be under the care of a responsible person and shall be kept clean.

18. **Maseroom.**— There shall be provided and maintained for the use of workers employed in the said processes who remain on the premises during the meal intervals, a messroom which shall be furnished with tabie and benches and provided with suitable means for warming food.

19. **Time allowed for washing.**— Before the end of each shift 30 minutes shall be allowed for bathing for each worker who is employed in the processes. further, atleast to minutes shall be allowed for washing before each meal in addition to the regular time allowed for meals.

20. **Restriction on age of persons employed.**—No worker under the age of 40 years shall be engaged in the factory in the said processes for the first time after the date on which the schedule comes into force.

INDEX

21. **Medical facilities and records of examination and tests.—**

(1) The occupier of every factory to which the Schedule applies, shall—

(a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories; and

(b) provided to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a).

(2) The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate register approved by the Chief Inspector of Factories which shall be kept readlly available for inspection by the Inspector.

22. **Me lical examination by the Certifying Surgeon ._**

(1) Every workers employed in the said processes shall be examined by a Certifying Surgeon within 15 days of his first employment. such examination shall include tests for detection of methemoglobin in blood (hematological tests0, paranitrophenol in urine, pulmonary function tests and Central Nervous System tests. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.)

(2) Every worker employed in the said processes shall be re- examined by a Certifying surgeon at least once in every six calandar months and such re-examination shall, wherever the Certifying Surgeon considrs appropriate icludes all the tests specified in sub-paragraph (1).

(3) The certifying Surgeon after examining worker, shall issue a certificate of Fitness in Form 30. The record of examination and re-examinations carried out shall be entered in the Certificate and the certificate shall be lept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraph (1) and (2), including the nature and the results of these tests, shall also be entered by the Certifying Surgeon in a health register in Form 20.

(4) The certificate of fitness and the health register shall be kept readily available for inspection by the Inspector.

(5) if at any time the certifying Surgeon is of the opnion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of this findings in the said certificate and the health register. The entry of his findings in those documents shall also include the period for which he considers that the said person is unfit to work in the said processes. The person so suspended from the provided with alternate placement facilities unless he is fully incapaciated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitable rehabilitated.

(6) No person who has been found until to work as said in sub- paragraph (5) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

23. **Exemptions.— Prohibited substances.—**

(1) The Chief Inspector may by a certificate in writing (which he may at his discretion revoke at any time), subject to such conditions, if any, as may be specified therein, exempt any process in the course of which any of the prohibited substances is formed, processed, manufactured, or used, from the provisions of paragraph 5 if he is satisfied that the process is carried out in a totally enclosed and hermetically sealed system in such a manner that the prohibited substance is not removed from the system except in quantities no greater than that required for the purpose of control of the process or such purposes as is necessary to ensure that the product is free from any of the prohibited substances.

INDEX

(2) The Chief Inspector may allow the manufacture, handling or use of benzidine hydrochloride provided that all the processes in connection with it are carried out in a totally enclosed system in such a manner that no prohibited substance other than benezidine hydrochloride is removed therefrom except in quantities no greater than that required for the purpose of control of the processes or such purposes as is substances and that adequate steps are taken to ensure that benezidine hydrochloride is, except, while not in a totally enclosed system, kept wet with not less than one part of water to two parts of benezidine hydrochloride at all times.

APPENDIX

CAUTIONARY PLACARD/NOTICE

Carcinogenic dye intermediates.

1. Dye intermediates which are nitro amino derivates or aromatic hydro carbons are toxis. You have to handle these chemicals frequently in this factory.

2. Use the various items of protective wear to safeguard your own health.

3. Maintain scrupulous cleanlines at all time. Thoroughly wash hands and feet before taking meals. I t is essential to take a bath before leaving the factory.

4. Wash off any chemical falling on your body with soap and water. If splashed with a solution of the chemical, remove the contaminated clothing immediately. These chemicals are known to produce cyanosis. Contact the medical officer or appointed doctor immediately and get his advice.

5. Handle the dye intermediates only with long handled ascopes, never with bare hands.

6. Alcoholic drinks should be avoided as they enhance the risk of poisoning by the chemicals.

7. Keep your food and drinks away from work place. Consuming food, drinks or tobacco in any form at the place of work is prohibited.

8. Serious effects from work with toxic chemicals may follow after many years. Great care must be taken to maintain absolute cleanliness of body, clothes, machinery and equipment".

(d) For schedule XVII, the following shall be substituted, namely :-

SCHEDULE -XVII

Handling and processing of Asbestos, Manufacture of any Article of Asbestos and any other process of Manufacture or otherwise in which Asbestos is used in any form.

1. **Application.-** This schedule shall apply to all factories or parts of factories in which any of the following processes is carried on :

(a) breaking, crushing, disintegrating, opening, grinding, mixing or sieving of asbestos and any other processes involving handling and manipulation of asbestos incidental thereto;
(b) all processes in the manufacture of asbestos textiles including preparatory and finishing processes;
(c) making of insulation slabs or sections, composed wholly or partly of asbestos, and processes incidental thereto;
(d) making or repairing of, insulating mattresses, composed wholly or partly of asbestos, and processes incidental thereto;

INDEX

(e) manufacture of asbestos cardboard and paper;
(f) manufacture of asbestos cement goods;
(g) application of asbestos by spray method;
(h) sewing, grinding, turning, abrading and polishing in dry state of articles composed wholly or partly of asbestos;
(i) cleaning of any room, vessel, chamber, fixture or appliance for the collection of asbestos dust, and
(j) any other processes in which asbestos dust is given off into the work environment.

2. **Definitions.-** For the purpose of this schedule-

(a) "asbestos" means any fibrous silicate mineral and any admixture containing actionlife, amesite, anthophylite dhrysotile or any mixture thereof, crude, crushed or opened;

(1) the term "asbestos dust" means airborne particles of asbestos or settled particles of asbestos which are liable to become airborne in the working environment;
(2) the term "airborne asbestos dust" means, for purposes of measurement, dust particles measured by gravimetric assessment of other equivalent method;
(3) the term " respirable asoestos fibers" means asbestos fibers having a diameter of less than 3 cm, and a length-to-diameter ratio greater than 3 : 1. Only fibers of a length greater than 5 cm shall be taken into account for the purpose of measurement.
(4) the term "exposure to asbestos" means exposure at work to airbore respirable asbestos fibers or asbestos dust, whether originating from asbestos or from minerals, materials or products containing asbestos;

(b) "asbestos textile means yarn or cloth composed of asbestos or asbestos mixed with any other material;
(c) "approved" means approved for the time being in writing by the Chief Inspector;
(d) "breathing apparatus" means a helmet or face piece with necessary connections by means of which a person using it breathes air free from dust, or any other approved apparatus;
(e) "efficient exhaust draught" means localised ventilation by mechanical means for the removal of dust so as to prevent dust from escaping into air of any place in which work is carried on. No drought shall be deemed to be efficient which fails to control dust produced at the point where such dust originates.
(f) "preparing" means crushing, disintegrating , and any other processes in or incidental to the opening of asbestos;
(g) "protective clothing" means overalls and head convering which (in either case) shall when worn exclude asbestos dust.

3. Tools and Equipment : (1) Any tools or equipment used in processes to which this Schedule applies shall be such that they do not create asbestos dust above the permissible limit or are equipped with efficient exhaust draught.

(2) (a) prohibition : Every process or equipment related to the milling of asbestos are or processing of asbestos fiber, release dust beyond the permissible limit, such process or use of such equipment shall be prohibited;
(b) the use of crocidolite and products containing this fibre shall be prohibited;
(c) spaying of all forms of asbestos shall be prohibited;
(d) the installation of friable asbestos insulation materials shall be prohibited.

(3) Substitution. - asbestos shall be used only when its risks can be prevented or controlled, otherwise, it shall be replaced, when technically feasible, by other materials or the use of alternative technologies, scientifically evaluated as harmless or less harmful;

(4) Exposure to the workers._ The number of persons assigned to work involving exposure to asbestos and the duration of their exposure shall be kept to the minimum required for the safe performance of the task;

INDEX

(5) Demarcation of area. - The areas of activity which involve exposure to asbestos shall be clearly demarcated and indicated by warning signs restricting unauthorised aecess.

4. **Exhaust drought.** - (1) An efficient exhaust drought shall be provided and maintained to control dust from the following processes and machines :

(a) manufacture and conveying machinery namely .-

(i) preparing, grinding or dry mixing machines;

(ii) guarding, card waste and ring spinning machines, and looms;

(iii) machines or other plant fed with asbestos; and

(iv) machines used for the sewing, grinding, turning drilling, abrading or polishing; in the dry state, of articles composed wholly or partly of astestos;

(b) cleaning and grinding of the cylinders or other parts of a carding machines;

(c) chambers, hoppers or other structures into which loose asbestos is delivered or passes;

(d) work-benches for estestos waste sorting or for other manipulation of asbestos by hand;

(e) workplaces at which the filling or employing of sacks, skips or other portable containers,weighing or other process incidental which is effected by hand, is carried on;

(f) sack cleaning machines;

(g) mixing and blending of asbestos by hand; and

(h) any other process in which dust is given off into the work environment.

(2) Exhaust ventilation equipment provided in accordance with sub-paragraph (1) shall, while any work of maintainance or repair to the machinery, apparatus or other plant or equipment in connection with which it is provided is being carried on, be kept in use so as to produce an exhaust draught which prevents entry of asbestos dust into the air of any work place.

(3) Arrangements shall be made to prevent asbestos dust discharged from exhaust apparatus being drawn into the air of any work room.

(4) The asbestos bearing dust removed from any workroom by the exhaust system shall be collected in suitable recepticles or fitter bags which shall be isolated from all work areas.

5. **Testing and examination of ventilating system. -**

(1) All ventilating system used for the purpose of extracting or suppressing dust as required by this schedule shall be examined and inspected once every week by a responsible person. It shall be thoroughly examined and tested by a competent person once in every period of 12 months. Any defects found by such examinations or test shall be rectified forthwith.

INDEX

(2) A register in Form No. 20-A containing particulars of such examination and tests and the state of the plant and the repairs or alternations (if any) found to be necessary shall be kept and shall be available for inspection by an Inspector.

6. **Segregation in case of certain process.–** work places where the use of abestos may result in the release of asbestos dust into the air shall be separated from the general working environment in order to avoid possible exposure of other workers to asbestos.

7. **Storage and distribution of loose asbestos.**

(1) All loose asbestos shall, while not in use, be kept in suitable closed receptacles which prevent the escape of asbestos dust therefrom. Such asbestos shall not be distributed within a factory except in such receptacles or in a totally enclosed system of conveyance.

8. **Abestos sacks.-** (1) All sacks used as receptacles for the purpose of transport of asbestos within the factory shall be constructed of impermeable materials and shall be kept in good repair.

(2) A sack which has contained asbestos shall not be cleaned by hand-beating but by a machine, complying with paragraph 3 (1).

(3) Occupier shall dispose of waste containing asbestos in a manner that dose not pose a health risk to the workers concerned, including those handling asbestos waste, or to the population in the vicinity of the enterprise.

9. **Maintenance of floors and workplaces.-** (1) In every room in which any of the requirements of this schedule apply—

(a) the floor, work-benches, machinery and plant shall be kept in a clean state and free from asbestos debris and suitable arrangements shall be made for the storage of asbestos not immediately required for use; and

(b) the floors shall be kept free from any materials, plant or other article not immediately required for the work carried on in the room, which would obstruct the proper cleaning of the floor.

(2) The cleaning as mentioned in sub-rule (1) shall, so far as is practicable, be carried out by means of vacuum cleaning equipment so designed and constructed and so used that asbestos dust neither escapes nor is discharged into the air of any work-place.

(3) When the cleaning is done by any method other than that mentioned in sub-paragraph (2), the person doing cleaning work and any other person employed in that room shall be provided with respiratory protective equipment and protective clothing.

(4) The cleaning equipment used in accordance with provisions of sub-paragraph (2), shall be properly maintained and after each cleaning operation, its surfaces kept in a clean state and free from asbestos waste and dust.

(5) Asbestos waste shall not be permitted to remain on the floors or other surface at the work place at the end of the working shift and shall be transferred without delay to suitable receptacles. Any spillage of asbestos waste occurring during the course of the work at any time shall be removed and transferred to the receptacles maintained for the purpose without delay.

INDEX

10. **Breathing Apparatus and Protective clothing.-**

(1) An approved breathing apparatus and protective clothing shall be provided and maintained in good conditions for use of every person employed. -

(a) in chambers containing loose asbestos;

(b) in cleaning, dust settling or filtering chambers or apparatus ;

(c) in cleaning the cylinders, including the deffer cylinders, or other parts of a carding machine by means of hand strickles, and

(d) in filling, beating or levelling in the manufacture or repair of insulating mattresses, and

(e) in any other operation of circumstances in which it is impracticable to adopt technical means to control asbestos dust in the work enviroment within the permissible limit.

(2) Suitable accommodation in conveniently accessible position shall be provided for the use of persons when putting on or taking off breathing apparatus and protective clothing provided in accordance with this rule and for the storage of such apparatus and clothing when not in use.

(3) All breathing apparatus and protective clothing when not in use shall be stored in the accommodation provided in accordance with sub-rule (2) above.

(4) All protective clothing in use shall be dedusted under an efficient exhaught draught or by vacuum cleanig and shall be washed at suitable intervals. The cleaning schedule and procedure shall be such as to ensure the efficiency in protecting the weater.

(5) All breathing apparatus shall be cleaned and disinfected at suitable intervals and thoroughly inspected once every month by a responsible person.

(6) A record of the cleaning and maintenance and of the condition of the breathing apparatus shall be maintained in a register provided for that purpose which shall be readily available for inspection by an Inspector.

(7) No person shall be employed to perform any work specified in sub-paragraph (1) for which breathing apparatus is necessary to be provided under that sub-paragraph unless he has been fully instructed in the proper use of that equipment.

(8) No breathing apparatus provided in pursuance of sub-paragraph (1) which has been worn by a oerson shall be worn by another person unless it has been thoroughly cleaned and disinfected since last being worn and the person has been fuily instructed in the proper use of that equipment.

11. Separate accommodation for personal clothing.- A separate accommodation shall be provided in a conveniently accessible position for all persons employed in operations to which this Schedule applies for storing of personal clothing .This should be separated from the accommodation provided under sub-paragraph (2) to prevent contamination of personal clothing.

12. Washing and bathing facilities.- (1) There shall be provided and maintained in a clean state and in good repair, for the use of all workers employed in the processes covered by the schedule, adequate washing and bathing places having a constant supply of water under cover at the rate of one such place for every 15 persons employed.

INDEX

(2) The washing places shall have stand pipes placed at intervals of not less than one meter.

(3) Not less than one half of the total number of washing places shall be provided with bathrooms.

(4) Sufficient supply of clean towels made of suitable material shall be provided :

Provided that such towels shall be supplied individually for each worker if so ordered by the Inspector.

(5) Sufficient supply of soap and nail brushes shall be provided.

(6) At least thirty minutes time shall be allowed, within working hours, for changing showering or washing after the work shift.

13. **Messroom.**-(1) There shall be provided and maintained for the use of all workers employed in the factory covered by this schedule, remaining on the premises during the rest intervals, a suitable messroom which shall be furnished with :-

(a) sufficient tables and benches with back rest, and

(b) adequate means for warming food.

(2) The messroom shall be placed under the charge of a responsible person and shall be kept clean.

14. Prohibition of employment of young persons.- No young person shall be employed in any of the processes covered by this Schedule.

15. Prohibition relating to smoking.- No person shall smoke in any area where processes covered by this schedule are carried on . A notice in the language understood by majority of the workers shall be posted in the plant prohibiting smoking at such areas.

16. Cautionary Notice.- (A) Cautionary notice shall be displayed at the approaches and along the parameter of every asbestos processing area to warn all persons regarding.-

(a) hazards to health from asbestos dust.

(b) need to use appropriate equipment.

(c) prohibition of entry to unauthorised persons, or authorised persons but without protective equipment.

(B) **Information from occupier.**- The following information shall be sent by the occupier of the factory :-

(a) the type and quantity of asbestos used;
(b) the activities and processes carried out;
(c) the products manufactured;
(d) the number of workers exposed and the level and frequency of their exposure;
(e) the preventive and protective measures taken;
(f) any other information necessary to safeguard the worker's health.

(C) Such notices shall be in the language understood by the majority of the workers;

INDEX

(D) (1) Labelling.- The labelling shall be printed in the language or languages in common use in the State indicating that the container or product contains asbestos, the inhalation of asbestos dust carries a health risk-and appropriate protective measures shall be taken.

(2) The occupier of the factory shall provide a data-sheet listing the asbestos, content, health hazards and appropriate protective measures for the material or product to consumers.

(E) Occupier shall provide workers with adequate information in an appropriate form on the health hazards to their families or others which could result from taking home clothing contaminated by abestos dust.

17. **Air Monitoring.**-(1) To ensure the effectiveness of the control measures, monitoring of asbestos fiber in air shall be carried out once at least in every shift and measured or calculated in terms of time-weighted average concentration and the record of the results so obtained shall be entered in a register specially maintained for the purpose by qualified person Memberance Filter Technique (MFT) shall be used for the measurement of the air borne asbestos tiber dust.

(2) The records of the monitoring of the working environment shall be kept for a period of not less than 30 years.

18. **Medical facilities and records of medical examinations and tests.-** (1) The occupier of every factory or part of the factory to which the schedule applies, shall. -

(a) employ a qualified medical practitioner for medical surveillance of the workers covered by this schedule whose employment shall be subject to the approval of the Chief Inspector of Factories :

(b) provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a).

(2) The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate register approved by the Chief-Inspector of Factories, which shall be kept readily available for ispection by the Inspector.

19. Medical examination by Certifying Surgeon. -

(1) Every worker employed in the processes specified in paragraph 1 shall be examined by a Certifying Surgeon within 15 days of his first employment. Such examiation shall include pulmonary function tests, tests for detecting asbestos fibers in sputum and chest X-ray. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.

(2) Every worker employed in the processes referred to in sub- paragraph (1) shall be re-examined by a Certifying Surgeon atleast once in every twelve calendar months. Such examinations shall, wherever, the Certifying Surgeon considers appropriate, include all the tests specified in sub-paragraph (1) except chest X-ray which shall be carried out once in 3 years.

(3) The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form 27-A. The record of exxamination and re-examination carried out shall be entered in the certificate and the certificate shall be kept in the custody of the manager of the factory. The record of reach examination carried out under sub-paragraph (1) and (2), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form 20.

INDEX

(4) The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.

(5) If at any time the Certifying Surgeon is of the opnion that a worker is no longer fit for employment in the said processe on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit to work in the said processe

(6) No person who has been found unfit to work as said in sub- paragraph (5), shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

20. (1) Appropriate medical examination shall continue to be available to workers after termination of an assignment involving exposure to asbestos.

(2) The medical examinations, tests and investigations provided in this schedule shall be carried out as far as possible in working hours and shall entail no cost to the worker.

(3) The results of medical examination shall be used to determine health status with regard to exposure to asbestos and shall not be used to discriminate against the worker.

(4) Workers shall be informed in an adequate and appropriate manner, of the results of the medical examinations and receive individual advice concerming their health in relation to their work.

(5) When continued assignment to work involving exposure to asbestos is found to be medically inadvisable, every effort shall be made to provide the workers concerned with other means of maintaining their income.

(6) Records of the monitoring of exposure of workers as well as the sections of their medical files relevant to health hazards due to exposure to asbestos and chest radiographs shall be kept for a period of not less than 30 years following termination of an assignment involving exposure to asbestos.

(7) In case of closure of the factory or after termination of the assignment of a worker, records and information kept in accordance with paragraph 20 (6) above shall be deposited in the office of the Chief Inspector of Factories, Gujarat State.

21. In Schedule XViii-, (1) In clause 3, for the words ''table 2 appended to rule 123-A", the words " the second schedule under section 21-1 of the Act" shall be substituted;

22. In Clause 7(30), for the word and figures " Form 28" and " Form 29", the words and figures " Form 33" and "Form 32" shall respectively be substituted.

23. After schedule XVIII, the following schedule shall be inserted, namely :-

SCHEDULE - XIX

Chemical Works

PART - I

1. Application. - This Schedule shall apply to all manufactures and processes incidental thereto carried on in chemical works.

2. Definitions. - For the purpose of this Schedule.-

(a) "Chemical Works" means any factory or such parts of any factory where any process or activity in relation to the industries is specified in the First Schedule of the Act;

INDEX

(b) "efficient exhaust draught" means localised ventilation effected by mechanical or other means for the removal of gas, vapour, fume or dust to prevent it from escaping into the air or any place in which work is carried on.

(c) "bleaching powder" means the bleaching powder commonly called chloride of time;

(d) "chlorate" means chlorate or perchlorate;

(e) "caustic" means hydroxide of potassium or sodium;

(f) "chrome process" means the manufacture of chromate or bichromate of potassium or sodium, or the manipulation, movement or other treatment of these substances.

(g) "nitro or amino process" means the manufacture or nitro of amino derivatives of phenol and of benezene or its homologues, and the makig of explosives with the use of any of these substances:

(h) the term 'permit to work ' system means the compliance with the procedures laid down under para 20 of Part II;

(i) "toxic substances" means all those substances which when they enter into the human body, through inhalation or ingestion or absorption through skin, in sufficient quantities, cause fatality or exert serious affiction of health, or chronic harmful effects on the health of persons exposed to it due to its inherent chemical effects. In respect of substances whose Threshold limit Value (TLV) is specified in the second schedule of the Act, exceeding the concentration specified therein would make the substance toxic;

(j) "emergency'' means a situation leading to a circumstance or set of circumstances in which there is danger to the life or health of persons or which could result in big fire or explosion or pollution to the work and outside environment, affecting the workers or beighbourhood in a serious manner, demanding immediate action;

(k) "dangerous chemical reactions" means high speed reactions, run-away reactions, delayed reactions, etc. and are characterized by evolution of large quantities of heat,intense release of toxic or flammable gases or vapours, sudde pressure build-up etc ;

(l) "manipulation" means mixing, blending filling, emptying, grinding, sieving, drying packing, sweeping handling using etc.;

(m) "approved personal protective equipment" means items of personal protective equipment conforming to the relevant Indian Standard Institute specifications (ISI) or in the absence of it, personal protective equipment approved by the Chief Inspector of Factories;

(n) "appropriate personal protective eqipment" means that when the protective equipment is used by the worker, he shall have no risk to his life or health or body; and

(o) "confined space" means any space by reason of its construction as well as in relation to the nature of the work carried therein and where hazards to the persons entering into working inside exist or are likely to develop during working.

PART II

General Requirement

Applying to all the works in the First Schedule of the Act.

1. Housekeeping. - (1) Any spillage of materials shall be cleaned up before further processing.

(2) Floors, platforms, stairways, passages and gangways shall be kept free of any obstructions.

(3) There shall be provided easy means of access to all parts of the plat to facilitate cleaning.

2. Improper use of chemicals. - No chemicals or solvents or empty containers containing chemicals or solvents shall be permitted to be used by workers for any purposes other than in the processes for which they are supplied.

3. Prohibition on the use of food, etc. - No food, drink, tobacco, pan or any edible item shall be stored or heated or consumed in or near any part of the plant or equipment.

INDEX

4. Cautionary Notices and instructions. - (1) Cautionary notice in a language understood by the majority of workers shall be prominently displayed in all hazardous areas drawing the attention of all workers about the hazards to health, hazards involving fire and explosion and any other hazard such as consequences of testing of material or substances used in the process or using any contaminated container for drinking or eating, to which the workers' attention shall be drawn for ensuring their safety and health.

(2) In addition to the above cautionary notice, arrangement shall be made to instruct and educate all the workers including illiterate workers about the hazards in the process including the specific hazards to which they may be exposed to, in the normal course of their work. Such instructions and education shall also deal with the hazards involved in unauthorised and unsafe practices including, the properties of substances used in the process under normal conditions as well as abnormal conditions and the precautions to be observed against each and every hazard. Further, an undertaking from the workers shall be obtained within 1 month of their employment and for old workers employed within one month of coming into operation of these rules, to the the effect that they have read the contents of the cautionary notices and instructions, understood them and would abide by them. The training and instructions to all workers and all supervisory personel shall include the significance of different types of symbols and colours used on the lables stuck or painted on the various types of containers and pipe-lines.

5. Evaluation and provision of safeguards before the commencement of process. - (1) Before commencing any process or any experimental work, or any new manufacture covered under first Schedule of the Act, the occupuier shall take all possible steps to ascertain definitely all the hazards involved both from the actual operations and the chemical reactions including the dangerous chemical reactions. The properties of the raw materials used, the final products to be made and any by-products derived during manufacture, shall be carefully studied and provisions shall be made for dealing with any hazards including effects on workers may occur during manufacture.

(2) Information in writing giving details of the process, its hazards and the steps taken or proposed to be taken from the design stage to disposal stage for ensuring the safety as in sub- para (1) above shall be sent to the Chief Inspector at the earliest but in no case less than 15 days before commencing manufacture, handling, or storage of any of the items covered under first Schedule of the Act whether on experimental basis, or as pilot plant or as trial production or as large scale manufacture.

(3) The design, construction, installation, operation, maintenance and disposal of the buildings, plant and facilities shall take into consideration effective sateguards against all the safety and health hazards so evaluated.

(4) The requirements under the sub-para (1) to (3) shall not act in lieu of or in derogation to, any other provisions contained in any other Act governing the work.

6. Authorised entry. - Authorised persons only shall be permitted enter any section of the factory of plant on or where dangerous chemical reactions are taking place or where hazardous Chemicals are stored.

7. Examination of instruments and safety devices.- (1) All instruments and safety devices used in the process shall be tested before taking into use and after carryingout any repair to them and examined once in a month by a competent person, records of such tests and examinations shall be maintained in a register.

(2) All Instruments and safety devices used in the process shall be operated daily or as often as it is necessary. to ensure its effective and efficient working at all times.

8. Electrical installations. - All electrical Installations used in the process covered in the first Schedule of the Act, shall be of an appropriate type to ensure safety against the hazard prevalent in that area such as suitability

INDEX

against dust, dampness, corssion fiammability and explosiuity etc. and shall conform to the relevant Indian Standard Institute (ISI) specifications governing their construction and use for that area.

9. Handling and storage of chemicals. - (1) The containers for handling and storage of chemicals shall be of adequate strength taking into consideration the hazardous nature of the contents. They shall also be provided with adequate labeling and colour-coding arrangements to enable identification of the containers and their contents indicating the hazards and safe handling methods and shall conform to the respective Indian Standard Institute (ISI) standards. The instructions given in the label shall be strictly adhered to. Damaged containers shall be handled only under supervision of a knowledgeable and responsible person and spillage shall be rendered innocuous in a safe manner using appropriate means.

(2) The arrangements for the storage of chemicals including charging of chemicals in reaction vessels containers shall be such as to prevent any risk of fire or explosion or formation of toxic concentration of substances above the limits specified in second schedule of the Act.

(3) Without prejudice to the generality of the requirements in sub-para (2) above, the arrangements shall have suitable ventilation facilities and shall enable the maintenance of safe levels in vessels and containers. Such arrangements shall also take into consideration, the type of flooring and the capacity of flooring and the compatibility requirements of substances with other chemicals store nearby.

(4) (a) Storage of chemicals and intermediate products, which are highly unstable or reactive or explosive shall be limited to the quantities required for two months use.

(b) Whenever the quantities laid down in the above clause (a) are to be exceeded, the permission of the Chief Inspector shall be obtained.

(c) Notwithstanding anything contained in clause (a) and (b) above, the Chief Inspector of Factories may direct any factory carrying out processes covered in the first schedule of the Act, to further limit the storage of hazardous substances to quantities less than two months in considerations of safety.

(5) Standby arrangements equal to the biggest container shall always be available to transfer the toxic substances quickly into the stand by storage facility if any defect developss in any of the container resulting in the release of toxic substances.

(6) Any storage facility constructed using non-metallic material such as Fiber glass Reinforced Plastics (FRP) all glass vessels etc. shall have adequate astrength to withstand the stress. If any, exterted by the contents and shall be properly anchored, working platforms, access ladders, pipe lines etc. used in such storage facility shall not have any support on the structure of the storage facility and shall be independently supported.

10. Facility for isolation. - The plant and equipment shall be so constructed and maintained as to enable quick isolation of plant or part of plant or equipment, with appropriate indication. One copy of the layout plan indicating the isolation facilities shall always be available with the security, the maintenance and the health and safety personnel, and these isolation facilities shall be checked for its effectiveness once in a month.

11. Personal protective equipment.- (1) All workers to the hazards in the processes covered by the Schedule shall be provided with appropriate and approved type of personal protective equipment. Such equipment shall be in a clean, sterile and hygienic condition before issue.

(2) The occupier shall arrange to inform, educate and supervise all the workers in the use of personal protective equipment while carrying out the job.

(3) As regards any doubt regarding the appropriateness of any personal protective equipment, the decision of the Chief Inspector shall be final.

12. Alarm systems.- (1) Suitable and effective alarm systems giving audiable and visible indications, shall be installed at the control-room as well as in all strategic locations where process-control arrangements are available so as to enable corrective action to be taken before the operational parameters exceed the predetermined safe levels or lead to conditions conducive for an outbreak of fire or explosion to occur;

INDEX

Such alarm system shall be checked daily and tested every month at least once to ensure its performance efficiency at all times.

(2) The Chief Inspector of Factories may direct such system to be installed in case of plants or processes where toxic materials are being used and spillage or leakage of which may cause wide spread poisoning in or around the plant.

13. Control of escape of substances into the work atmosphere.- (1) Effective arrangements such as, enclosure, or by-pass, or efficient exhaust draught maintenance of negative pressure etc.,shall be provided in all plants, containers, vessels. sewers, drains, flues, ducts, culverts, and burried pipes and equipment, to control the escape and spread of substances which are likely to give rise to fire or explosion or toxic hazards during normal working and in the event of accident or emergency.

(2) In the event of the failure of the arrangements for control resulting in the escape of substances in the work atmosphere, immediate steps shall be taken to control the process in such a manner, that further escape is brought down to the safe level.

(3) The substances that would have escaped into the work atmosphere before immediate steps as required in sub-para (2), shall be rendered innocuous by diluting with air or water or any other suitable agent or by suitably treating the substances.

14. Conduct of dangerous chemical reactions : Suitable provision, such as automatic and/or remote control arrangements, shall be made for controlling the effects of 'dangerous chemical reactions'. In the event of faliure of control arrangements automatic flooding or blanketing or other effective arrangements shall come into operation.

15. Testing examination and repair of plant and equipment.

(1) All parts of plant, equipment and machinery used in the process which in the likely event of their failure may give rise to an emergent situation shall be tested by a competent person before commencing process and retested at an interval of two years or after carrying out reapirs to it. The competent person shall identify the parts of the plant, equipment and machinery required to be tested as aforesaid and evolve a suitable testing procedure. in carrying out the test as mentioned above in respect of pressure vessels or reaction vessels the following precautions shall be observed, namely. -

(a) before the test is carried out, each vessel shall be thoroughly cleaned and examined externally, and as far as practicable, internally also for surface defects, corrossion, and foreign matter. During the process of cleanig and removal of studge, if any, all due precautions shall be taken against fire or explosion, if such sludge is of pyropheric nature or contains spontaneously combustible chemicals;

(b) as soon as the test is completed, the vessel shall be thoroughly dried intermaily and shall be clearly stamped with the marks and figures indicating the person by whom testing has been done and the date of test; and

(c) any vessel which fails to pass the test or which for any other reason is found to be unsafe for use shall be destroyed or rendered unusable under intimation to the Chief Inspector.

(2) All parts of plants, equipment, machinery which in the likely event of failure may give rise to an emergent situation shall be examined once in a month by the competent person.

(3) Records of testing and examination referred to in paragraphs (1) and (2) shall be maintained as long as that part of the plant, equipment, and machinery are in use.

(4) All repair work including alteration, modification and addition to be carried out to the plant, equipment and machinery shall be done under the supervision of a responsible person who shall evolve a procedure to ensure safety and health of persons doing the work. When repairs or modification is done on pipeline, and joints are required to be welded, butt welding of joints shall be preferred. Wherever, the responsible person shall regulate the aforesaid work through a 'permit to work system.'

INDEX

16. Staging.- (1) All staging that is erected for the purpose of maintenance work or repair work or for work connected with entry into confined spaces and used in the processes included in first schedule of the Act, shall be state, rigid and constructed out of substantial material of adequate strength, such staging shall confirm to the respective indian Standard specifications.

(2) Staging shall not be erected over any closed or open vessel unless the vessel in so constructed and ventilated to prevent exposure of persos working on the stages.

(3) All the staging constructed for the purpose of this para shall have appropriate access which are safe and shall be fitted with proper hand-rails to a height of one metre and toe board.

17. Seating arrangements. - The seating arrangements provided for the operating personnel working in processes covered in the first schedule shall be located in a safe manner as to prevent the risk of exposure to toxic, flammable as to prevent the risk of exposure to toxic, flammable and explosive substances evolved in the work environment in the course of manufacture or repair or maintenance, either due to failure of plant and equipment or due to the substances which are under pressure, escaping into the atmosphere.

18. Entry into or work in confined spaces. - (1) The occupier of every factory to which the provisions of this schedule apply, shall ensure the observance of the following precautions before permitting any person to enter or work inside the confined spaces.-

(a) To identify all confined spaces and the nature of hazards that are encountered in such spaces, normally or abnomally, and arrange to develop the most appropriate safeguards for the safety and health of persons entering into or working inside, the confined spaces;

(b) To regulate the entry or work inside the confined spaces a 'permit to work system' which shall include the safeguards so developed as required under sub-clause (a) above.

(c) To render the place safebefore testing the confined space for entry into or work by washing or cleaning with neutralizing agents; or purging with steam or inert gases and making adequate forced ventilation arrangements.

(d) To arrange to carry out such tests as are necessary for the purpose by a competent person and ensure that the confined space is safe for the persons to enter or work Such testing shall be carried out as often as is necessary during the course of work to ensure its continued safety;

(e) To arrange to educate and train the personnel who would be required to work in confined spaces about the hazards involved in the work. He shall also keep in readlines the approprate and approved personal protective equipment including arrangements for rescue, ressurection and first aid, and shall arrange supervision of the work at all times by a responsible and knowldgeable person.

(2) The manager shall maintain a log book of every entry into or work in, confined spaces and such record shall contain the details of persons assigned for the work, the location of the work and such other details that would have a bearing on the safety and health of the persons assigned for this work The log book so maintained shall be retained as long as the concened workers are in service and produced to the Inspector when demanded.

19. Maintenance work etc.- (1) All the work connected with the maintenance of plants and equipment including cleaning of empty containers which have held hazardous substances used in the processes covered in this schedule, shall be carried out under 'permit to work system' employing-trained personnel and under the supervision of responsible person, having knowldge of the hazards and precautions required to deal with them.

(2) Maintenance work shall be carried out in such a manner that there is no risk to persons in the vicinity or to persons who pass by. If necessary, the place of such work shall be cordoned off or the presence of unconnected persons effectively controlled.

20. Permit to work system.- The permit to work system shall inter-alia include the observance of the following precautions while carrying out any specified work to be subjected to the permit to work system-

INDEX

(a) all work subject to the permit to work system shall be carried out under the supervision of a knowledgeable and responsible person;

(b) all parts of plant or machinery or equipment on which permit to work system is carried out, shall remain isolated from other parts throughout the period of permit to work and the place of work including the parts of plant, machinery shall be rendered safe by cleaning, purging, washing, etc.;

(c) all work subject to the permit to work system shall have pre- determined work procedure which integrate safety with the work. Such procedures shall be reviewed whenever any change occurs in material or equipment so that continued safety is ensured;

(d) persons who are assigned to carry out the permit to work system shall be physically fit in all respects taking into consideration the demands and nature of the work before entering into the confined space. Such person shall be adequately informed about the correct work procedure as well as the precautions to be observed while carrying out the permit to work system;

(e) adequate rescue arrangements wherever considered necessary and adequate first aid, rescue and resurrection arrangements shall be available in good working condition near the place of work while carrying out the permit to work system, for use in emergency;

(f) appointed and approved protective equipment shall be used while carrying out the 'permit to work system';

(g) after completion of work subject to the 'permit to work system' the person responsible shall remove all the equipment and tools and restore to the original condition so as to prevent any danger while carrying out regular process.

21. Safety sampling personnel.- The occupier shall ensure the safety of persons assigned for collecting samples by instructing them on the safe procedures. Such personnel shall be provided with proper and approved personal protective equipment, if required.

22. Ventilation. - Adequate ventilation arrangements shall be provided and maintained at all times in the process area where dangerous or toxic or flammable or explosive substances could be evolved. These arrangements shall ensure that concentrations, which are either harmful or could result in explosion, are not permitted to be built up in the work environment.

23. Procedure for meeting emergencies.- (1) The occupier of every factory carrying out the works covered in the first schedule of the Act, shall arrange to identify all types of possible emergencies that could occur in the processes during the course of work or while carrying out maintenance work or repair work. The emergencies so identified shall be reviewed year;

(2) The occupier shall formulate a detailed plan to meet all such identified emergencies including arrangements for summoning out side help for rescue and fire fighting and arrangements for making available urgent medical facilities.

(3) The occupier shall send the list of emergencies and the details of procedures and plans formulated to meet the emergencies, to the Chief Inspector of Factories.

(4) The occupier shall arrange to install distinctive and recognizable warning arrangements to caution all persons inside the plant as well as the neighbouring community, if necessary, to enable evacuation of persons and to enable the observance of emergency procedures by the persons who are assigned emergency duties. All concerned must be well informed about the warning arrangements and their meaning .The arrangements must be checked for its effectiveness every month.

(5) Alternate power supply arrangements shall be made and inter-locked with the normal power supply system so as to ensure constant supply of power to the facilities and equipment meant for compliance with requirements of paragraph 10, 11, 12, 13, 14, 18, 22, and this paragraph of part -II, Part -III, Part - IV and Part - V of this schedule.

(6) The occupier shall arrange to suspend the further process work in a place where emergency is established and shall forthwith evacuate all persons in that area except workers who have been assigned emergency duties.

INDEX

(7) All the employees of the factory shall be trained about the action to be taken by them including evacuation procedure during emergencies.

(8) All emergency procedures must be rehearsed every three months and deficiencies, if any, in the achievement of the objectives shall suitably be corrected.

(9) The occupier shall arrange to have ten percent of the workers trained in the use of First Aid, fire-fighting appliances and in therendering of specific First Aid measures taking into consideration the special hazards of the particular process.

(10) The occupier shall furnish immediately, on request the specific chemical identity of the hazardous substance to be treating physician when the information is needed to administer proper emergency or first-aid treatment to exposed person.

24. Danger due to effluents .- (1) Adequate precautions shall be taken to prevent the mixing of effluents from different processes and operations which may cause dangerous or poisonous gases to be evolved.

(2) Effluents which contain or give rise in the presence of other effluents to poisonous gases shall be provided with independent drainage systems to ensure that they may be traooed and rendered safe.

PART -III

FIRE AND EXPLOSIONS RISKS

1. No internal combustion engine and no electric motor or other electrical equipment, and fittings and fixtures capable of generating sparks or otherwise causing combustion or any other source of ignition or any naked light shall be installed or permitted to be used in the process area where there could be fire and explosion hazards.

(2) All hot exhaust pipes shall be installed out side a building and other hot pipes or hot surface or surface likely to become hot shall be suitably protected.

(3) the Classification of work area in terms of its hazard potential and the selection of electrical equipment or other equipment that could constitute a source of ignition shall be in accordance wit respective Indian Standard.

(4) Where a flammable almospher may be prevalent or could occur, the soles of footwear worm by workers shall have no metal on them, and the wheels of trucks or conveyors shall be ned conductive type.

(5) All tools and appliances used for work in this area shall be of non-sparking type.

(6) Smoking in process area whose there are risks of fire and expiosion shall be prohibited, and warning notice in the language understood by majority of workers shall be posted in the factory prohibiting smoking into specified areas.

2 **Static Electricity.** - (1) All machinery and plant, particularly, pipe lines and belt drives, on which static charge is likely to accumulate, shall be effectively earthed. Receptacles for flammable liquids shall have metallic connections to the earthed supply tanks to prevent static sparking here necessary, humidity shall be regulated.

(2) Mobils tanker wagons shall be earthed during filling and discharge, and precautions shall be taken to ensure that earthing is effective before such filling or discharge, takes place.

3. **Lightning protection.-** Lightning protection arrangement shall be fitted where necessary, and shall be maintained.

4, **Process heating.-** The method of providing heat for a process likely to result in fire and explosion shall be as safe as possible and where the use of naked flame is necessary, the plant shall be so constructed as to prevent any escaping flammable gas, vapor, or dust coming into contact with the flame, or exhaust gases, or other sources likely to cause ignition. Wherever possible, the heating arrangement shall be automatically controlled at a pre-determined temperature below the danger temperature.

5. **Leakage of flammable liquids.-** (1) Provision shall be made to confine by means of bund walls, dykes, sumps etc. possible leakages from storage vessels containing flammable liquids.

INDEX

(2) Waste material in contact with flammable substances shall be disposed off suitably under the supervision of knowledgeable and responsible person.

(3) Adequate and suitable fire-fighting appliances shall be installed in the vicinity of such vessels.

6. Safety valves.- Every still and every closed vessel in which gas is evolved or into which gas is passed, and in which the pressure is liable to rise above the atmospheric pressure, shall have attached to it a pressure gauge, and a proper safety valve or other equally efficient means to relieve the pressure. These appliances shall be maintained in good condition.

7. Installation of pipe line etc.- All pipelines carrying flammable or explosive substances shall be protected from mechanical damage and shall be examined by a responsible person once in a week to defect any deterioration or defects, for accumulation of flammable or explosive substances, and record kept of any defects found and repairs made.

8. Fire-fighting systems.- (1) Every factory employing 500 or more persons and carrying out processes listed in the First Schedule of the Act, shall Provide -

(a) Trained and responsible fire-fighting squad so as to effectively handle the fire-fighting and life-saving equipment in the event of fire or other emergency. Number of persons in this squad shall necessarily depend upon the size of risk involved, but in no case shall be less than 8 such trained persons to be available at any time. The squad shall consists of watch and ward personnel, fire pump man and departmental supervisors and operators trained in the operation of fire and emergency services..

(b) squad leaders shall preferably betrained in a recognised Government institution and their usefulness enhanced by providing residence on the premises.

(c) Squad personnel shall be provided with clothing and equipment including helmets, boots and belts.

(2) A muster roll showing the duties allocated to each member of the squad shall be prepared and copies supplied to each such leader as well as displayed in prominent places so as to be easily available for reference in case of emergency.

(3) The pump mab shall be thoroughly conversant with the location of all appliances. He shall be responsible for maintaining all fire fighting equipment in proper woking order. Any defect coming to his notice shall be immediately be brought to the notice of squad leader.

(4) As far as is practicable, the fire pump room and the main gate(s) of the factory be connected to all manufacturing or storing areas through telephone interinked and placed in a convenient location near such areas.

PART-IV

Risks of Toxic Substances

1. **Leakage.-** (1) All plants shall be so designed and contsructed as to prevent the escape of toxic substance. Where necessary, separate building, rooms, or protective structures shall be used for the dangerous stages of the process and the building shall be so designed as to localise and escape of toxic substances.

(2) Catch bund walls, dykes, or other suitable safeguards shall be provided to restrict the serious effects of such leakage. Catch pits shall be places below joints in pipelines where there is danger involved to maintenance and other workers from such leakage.

2. Drainage.-Adequate drainage shall be provided and shall lead to collection tanks specifically provided for this purpose wherein deleterious material shall be neutralised treated or otherwise rendered safe before it is discharged into public drains or sewers.

3. Covering of vessels.- (1) Every fixed or structure containing any toxic substance and not so covered as to eliminate all reasonable risk of accidental contant of any portion of the body of a woker, shall be so constructed as to avoid physicalcontant.

(2) Such vessel shall, unless its edge is atleast 90 centimeters above the adjoining ground or platform, be securely fenced to a height of atleast 90 centimeters above such adjoining ground or platform.

INDEX

(3) Where such vessels adjoin and the space between them, clear of any surrounding brick or other work is either less than 45 centimeters in width or in 45 or more centimeters in width,but is not securely fenced on both to a height of atleast 90 centimeters, secure barriers shall be so placed as to prevent passage between them :

Provided that sub-paragraph (2) of this paragraph shall not apply to

(a) staurators used in the manufacture of sulphate of ammonia;and
(b) that part of the sides of brine evaporating pans which require raking, drawing or filling.

4. Continuous exhaust arrangement. - (1) Any process evolving toxic vapor, gas gume and substance shall have efficient continuous exhaust draught. Such arrangement shall be interlocked in the process control wherever possible,

(2) In the event of failure of continuous exhaust arrangement means shall be provided to automatically stop the process.

5. Work Bench.- All the work benches used in processes involving the manipulation of toxic substances shall be graded properly and shall be made of smooth impervious surface which shall be washed daily after the completion of work.

6. Waste disposal.- (1) There shall be provided a suitable receptacle made of non-absorbable material with a tightly fitting cover for depositing waste material soiled with toxic substances and the contents of such receptacle shall be destroyed by burning or using other suitable method under the supervision of a esponsible person.

(2) During the course of manufacture, whenever any batch or intermediate products having toxicity is rejected on considerations of quality, sufficient precautions shall be taken to render them innocuous or otherwise treat them or inactive them, before disposal.

(3) The empty containers of toxic substances shall be cleaned thoroughly before disposal under the supervision of a responsible person.

PART - V

Special Provisions

1. Special precautions for Nitro or Amino Processes.-
   (1) Unless the crystallised nitro or amino substances or any of its liquor is broken or agitated in a completely enclosed process so as not to give rise to dust or fume, such process shall be carried on under an efficient exhaust draught or by adopting any other suitable means in such a manner as to prevent the escape of dust or fume in the working atmosphere.
   (2) No part of the piant or aquipment or implements which was in contact with nitro or amino compounds shall be repaired, or handled unless they have been emptied and thoroughly cleaned and decontaminated.
   (3) Filling of containers with nitro or amino compounds shall be done only by using a suitable scope to avoid physical contact and the drying of the containers in the stove shall be done in such aa manner that the hot and contaminated air from the stove is not drawn into the work room.
   (4) Processes involving the steaming into or around any vessel containing nitro or amino compounds or its raw materials shall be carried out i , such a manner that the steam or vapor is effectively prevented to be blown back into the working atmosphere.
   (5) Suitable antidotes such as methylene blue injections shall always be available at designated places of work, for use during emergency involving the poisoning with nitro or amino compounds.
2. Special precautions for "chrome processes".- (1) Grinding and sleving of raw materials in chrome processes shall be carried on in such a manner and under such condition as to secure effective separation from any other processes and under an efficient exhaust draught.

INDEX

(2) There shall be washing facilities located very near to places where wet chrome processes such as leaching acidification, sulphate setting, evaporation, crystallisation, centnrifugation or packing are carried, out, to enable quick washing of affected parts of body with running water.

(3) Weekly inspection of hand and feet of all persons employed in chrome process shall be done by a qualified nurse and record of such inspections shall be maintained in a form approved by the Chief Inspector of Factories.

(4) There shall be always available at designated places of work suitable ointment such as giycerine. veceline, etc. and water proof plaster in a separated box readily accessible to the workers so as toprotect against perforation of nasal septum.

3. Special precautions for Processes carried out in all glass vessels. - (1) Processes and chemical reactions such as manufacture of binyl chloride, benzyl chloride etc. which are required to be carried out in all glass vessels shall have suitable means like substantial wiremesh covering to protect persons working nearby in the event of breakage of glass vessel.

(2) Any spilage or emission of vapor from the glass vessel due to breakage, shall be immediately inactivated or rendered innocuous by suitable means such as dilution with water or suitable solvents so as to avoid the risks of fire or expiosion or health hazards.

4. Special precautions for processes involving chlorate manufacture. (1) Crystallisation, grinding or packing of chiorate shall not be done in a place used fir any other purpose and such piaces shall have hard, smooth and impervious surface made of non-combustible material .The place shall be thoroughly cleaned daily.

(2) The personal protective equipment like overall, etc. provided for the chiorated workers shall not be taken from the place of work and they shall not be taken from the place of work and they shall be thoroughly cleaned daily.

(3) Adequate quantity of water shall be available near the place process for use during the emergency.

(4) Wooden vessels shall not be used for the cryatallisation of chlorate or to contain crystallised ground chlorate.

5. Special precaution in the use of plant and equipments made from reinforced piastics.- (1) All plant and equipments shall conform to appropriate indian or any other National Standard.

(2) Care shall be taken during storage, transport, handling and installation of plant and equipments to avoid accidental damage.

(3) All Plant and equipment shall be installed in such a way as to ensure that loads are distributed as intended in design or as per the recommendations of the manufacturers.

(4) All pipe-work shall be supported so that total laons local to the branches on the vessel or ttank do not exceed their design values.

(5) After erection, all plant and equipments shall be subjected to a pressure test followed by a thorough examination by a competent person. The test and examination shall be as per relevant standard. A certificate of set and examination by competent person shall be obtained and kept available at site.

(6) All plant and equipments shall be subjected to periodical tests and examination and record maintained as per Paragraph 15 in Part ii of this Schedule.

(7) Plant and equipments during their use shall not be subjected to over filling or over loading beyond rated capacity.

PART - VI

Additional Welfare Amenities

1. Washing facilities.- (1) There shall be provided and maintained in every factory for the use of all the workers taps for washing, at the rate of one tap for every 15 persons including liquid soap in a container with tilting arrangements and nail brushes or other suitable means for effective cleaning Such facilities shall be conveniently accessible and shall be kept in a clean and hygienic condition.

INDEX

(2) if washing facilities as required above are provided for women, such facilities shall be separate for them and adequate privacy at all times shall been ensured in such facilities.

2. Mess-room facilities.- (1) The occupier of all the factories carrying out processes covered in the First Schedule of the Act and employing 50 workers or more. shall provide for all the workers working in a shift, mess room facilities which are well ventilated and provided with tables and sitting facilities along with the provision of cold and hygienic drinking water facilities.

(2) Such facilities shall include suitable arrangements for cleaning and washing and shall be maintained in a clean and hygienic condition.

3. Clockroom facilities.- (1) The occupier of every factory carrying out any process covered in the First Schedule of the Act shall provide for all the workers employed in the process clock room facilities with lockers. Each worker shall be provided with two lockers, one for work clothing and another separately for personal clothing and the lockers shall be such as to enable the keeping of the clothing in a hanging position.

(2) The clock-room facilities so provided in pursuance of sub- para (1) shall be located as far as possible near to the facilities provided for washing in pursuance of para 1 (1p.) if it is not possibleto locate the washig facilities, the clock room facilities shall have adequate and suitable arrangements for cleaning and washing.

4. Special bathing facilities.- (1) The occúpier of any factory carrying out the process covered under appendix shall provide special bathing facilities for all the workers employed and such facilities shall be provided at the rate of 1 for 25 workers and part thereof, and shall be maintained in a clean and hygienic condition.

(2) The occupier shall insist all the workers employed in the process covered in appendix to take bath after the completion of the day's or shift or shift work using the bathing facilities so provided and shall also affectively prevent such of those workers taking bath in any place other than the bathing facilities.

(3) Notwithstanding anything contained in sub-para (1) above, the Chief Inspector may require in writing the occupier of any factory carrying out any other process for which in his opnion bathing facilities are essential from the health point of view, to provide special bathing facilities.

PART - VII

1. Duties of workers,- (1) Every worker employed in the processes covered in the First Schedule of the Act and Appendix shall not make any safety device or appliance or any guarding or fencing arrangement. inoperative or defective and shall report the defective condition of the aforesaid arrangements as soon as he is aware of any such defect.

(2) Before commencing any work, all workers employed in processes covered in the First Schedule of the Act shall check their work place as well as the machinery, equipment or appliance used in the processes and report any malfunction or defect immediately to the supervisor or any responsible person of the management.

(3) All workers shall co-operate in all respects with the management while carrying out any work or any emergency duty assigned to them in pursuance of this schedule and shall always use all the personal protective equipments issued to them in a careful manner,

(4) All workers employed in the processes covered in the First Schedule of the Act or appendix shall not smoke in the process area or storage area .If special facilities are provided by the management only such facilities shall be used.

(5) All workers employed in the process covered in the First Schedule of the Act shall not remain in unauthorised place or carry out unauthorised work or improvise any arrangements or adopt short out method or misuse any of the facilities provided in pursuance of this Schedule. in such a manner as to cause risk to themselves as well as to others employed.

(6) The workers shall not refuse undergoing medical examination as required under these rules.

INDEX

PART - VIII

(Restrictions on the employment of young persons under 18 years of age and women)

(1) The Chief Inspector of Factories may by an order in writing restrict or prohibit theemployment of women and young persons under the age of 18, in any of the processes covered in First schedule of the Act on consideration of health and safety of women and young persons.

(2) Such persons who are restricted or prohibited from working in the process due to the order issued in pursuannce of sub-para (1) above shall be provided with alternate work which is not deterimental to their health or safety.

Appendix

(Conc ning special bathing accommodation in pursuance of para 4 of part VI.)

1. Nitro or amino processes
2. All chrome process.
3. processes of distilling gas or coal tar or processes of chemical manufacture in which tar is used.
4. processes involving manufacture, manipulation, handling or recovery of cyanogen compound, cyanide compound, cynate compounds.
5. Processes involving manufacture of bleaching powder or production of chlorine gas in chioro-alkali plants.
6. Manufacture, manipulation or recovery of nickel and its compounds.
7. all processes involving the manufacture, manipulation or recovery of aliphatic or aromatic compounds or their deriva tives or substituted derivatives.

26. In Schedule-XX:-

(1) in the heading for the figures and words "20. Manufacture and use of benzene or its allied products" the following shall be substituted, namely :-

"20. Manufacture, handling and usage of benzene and substances containing benzene";

(2) For item 1, the following shall be substituted, namely :-

"this schedule shall apply in respect of factories or parts thereof in which benzene or substances containing benzene are manufactured, handled, stored, packed, or used."

(3) in definition, in item 2 (a), after the word "exceeds" the figure, bracate and word "1 (one)" shall be added;

(4) in item 3, in the heading, for the words "Manner of using benezene or its substitute", the following shall be namely :-
"Prohibition and substitution":

(5) after item 13, the following item shall be added, namely :-
"14. Prohibition of use of Benzene._
Use of benzene and substances containing benezene is prohibited in the following processes .

(a) Manufacture of Varnishes, Plants and thiners:
(b) Cleaning and degressing operatios."

27. After schedule XX, the following schedule shall be inserted, namely :-

INDEX

"SCHEDULE - XXI

Process of extracting Oils and fats from vegetables and animal sources in solvent extraction plants.

1. Definition.-For the purposes of this Schedule._

(a) "solvent extraction plant" means a plant in which the process of extracting oils and fats from vegetable and animal sources by use of solvents is carried on.

(b) "Solvent" means a flammable liquid such as pentane, hexane, heptane used for the recovery of vegetable oils;

(c) "Flame Proof enclosure" as applied to electric machinery or apparatus menas an "enclosure that will withstand, when covers or other access doors are properly secured, an internal explosion of the flammable gas or vapour which may enter or which may originate inside the enclosure without suffering damage and without communication internal inflammation or explosion the external flammable gas or vapour);

(d) "competent person" for the purpose of this schedule shall be at least a Member of the Institution of Engineers (India) or an Associate member of the said Institution with 10 years experience in a responsible position as may be approved by the chief Inspector:

Provided that a graduate in Mechanical engineering or chemical technology with specialized knowledge of oils and fats with a minimum experience of 5 years in a solvent extraction plant shall also be considered to be a competent person :

Provided further that the State Government may accept any other qualifications if in its opnion they are equivalent to the qualification aforesaid,

2. Location and Layout.- (1) No solvent extraction plant shall be permitted to be constructed or extended to within a distance of 30 meters form the nearest residential locality.

(2) A 1.5 meter high continuous wire-fencing shall be provided around the solvent extraction plant upto a minimum distance of 15 meters from the plant.

(3) No person shall be allowed to carry any matches or an open flame or fire inside the area bound by the fencing.

(4) Boiler houses and other buildings where open flame processes are carried on shall be located at least 30 meters away from the solvent extraction plant.

(5) If godowns and preparatory processes are at a distance of less than 30 meters from the solvent extraction plant, these shall be at least 15 meters distance away from the plant, and continuous barrier wall of non-combustible material 1.5 meters high shall be erected at a distance of not less than 15 meters from the solvent extraction plant so that it extends to at least 30 meters of vapour travel around its ends from the plant to the possible sources of ignition.

3. Electrical installations.- (1) All electrical motors and wiring and other electrical equipment installed or housed in solvent extraction plant shall be of flame-proof construction.

(2) All metal parts of the plant and building including various tanks and containers where solvents are stored or are present and all parts of electrical equipment not required to be energised shall be properly bonded together and connected to earth so as to avoid accidental rise in the electrical potential of such parts above the earth potential.

4. Restriction on smoking.- Smoking shall be strictly prohibited within 15 meters distance from solvent extraction plant. For this purpose, "No Smoking" signs shall be permanently displayed in the area.

INDEX

5. Precautions against friction.- (i) All tools and equipments including ladders, chains and other lifting tackle required to be used in solvent extraction plant shall be of non-sparking type.

(ii) No machinery or equipment in any solvent extraction plant shall be belt driven, unless the belt used is of such a type that it does not permit accumulation of static electricity to a dangerous level,

(iii) No person shall be allowed to enter and work in the solvent extraction plant if wearing clothes made of nylon or such other fibre that can generate static electrical charge, or wearing footwear which is likely to cause sparks by friction.

6. Fire-fighting apparatus.- (i) Adequate number of portable fire extinguishers, suitable for use against flammable liquid fires shall be provided in the solvent extraction plant.

(ii) An automatic water spray sprinkler system on a wet or open- head deluge system with sufficient supply of storage water shall be provided over solvent extraction plant and throughout the building housing such plant.

7. Precaution against power failure.- Provision shall be made for the automatic cutting off of steam in the event of power failure and also for emergency overhead water supply for feeding water by gravity to condensers which shall come into play automatically with the power failure.

8. Magnatic separators.- Oil cake shall be fed to the extractor by a conveyor through a hopper and a megnatic separator shall be provided to remove any pieces of iron during its transfer.

9. Venting.- (i) Tanks containing solvents shall be protected with emergency venting to relieve excessive internal pressure in the event of fire.

(ii) All emergency relief vents shall terminate at least 6 meters above the ground and be so located that vapours shall not re- enter the building in which solvent extraction plant is located.

10. Waste water.- Process waste water shall be passed through a flash evaporator to remove an solvent before it is discharged into a sump which should be located within the fenced area but not closer than 8 meters to the fence.

11. Ventilation .- The solvent extraction plant shall be well ventilated and if the plant is housed in a building,. the building shall be provided with mechanical ventilation with provision for at least six air changes per hour.

12. Housekeeping.- (i) Solvents shall not be stored in an area covered by solvent extraction plant except in small quantities which shall be stored in approved safety cans.

(ii) Waste materials such as oily rags, other wastes and absorbents used to wipe off solvent and paints and oils shall be deposited in approved containers and removed from the premises at least once a day.

(iii) Space within the solvent extraction plant and within 15 meters from the plant shall be kept from any combustible materials any spills of oil or solvent, shall be cleaned up immediately.

13. Examination and repairs.- (i) The solvent extraction plant shall be examined by the competent person to determine any weakness or corrosion and wear.once in every 12 months. Report of such examination shall be supplied to the Inspector with his observation.as to whether or not the plant is in safe condition to work.

(ii) No repairs shall be carried out to the machinery or plant except under the direct supervision of the competent person.

(iii) Facility shall be provided for purging the plant with inert gas or steam before opening for cleaning or repairs and before introducing solvent after repairs.

INDEX

14. Operating personnel. The operation of the plant and machinery in the solvent extraction plant shall be in the charge of such duly qualified and trained persons as are certified by the competent person to be fit for the purpose and no other person shall be allowed to operate the plant and machinery.

15. Employment of women and young persons.- No women or young person shall be employed in the solvent extraction plant.

16. Vapour detection.- A suitable type of flame-proof and portable combustible gas indicator shall be provided and maintained in good working order and a schedule of routine sampling of atmosphere at various locations as approved by the Chief Inspector shall be drawn out and entered in a register maintained for the purpose.

17. Examination. - if in respect of any factory, the Chief Inspector is satisfied that owing to the exceptional circumstances or infrequeny of the processes or for any other reasons, all or any of the provisions of this schedule is not necessary for the protection of the workers in the factory, the Chief Inspector may by a certificate in writing (which he may in his discretion revoke at any time) exempt such factory from all or any of such provision subject to conditions, if any, as he may specify therein.

SCHEDULE - XXII

Manufacturing process or operations in Carbon Disulphide plants.

1. Application.- This schedule shall apply to all electric furnaces in which carbon disulphide is generated and all other plants where carbon disulphide after generation is, condensed, refined and stored. This schedule is in addition to and not in derogation of any of the provisions of the Act and rules made thereunder.

2. Construction, installation and operation.- (1) The buildings in which electric furnaces are installed and carbon disulphide after generation is condensed and refined shall be segregated from other parts of the factory and shall be of open type to ensure optimum ventilation and the plant layout shall be such that only a minimum number of workers are exposed to the risk of any fire or explosion at any one time.

(2) Every electric furnace and every plant in which carbon disulphide is condensed, refined and stored with all their fittings and attachments shall be of good construction, sound material and of adequate strength to sustain the internal pressure to which the furnance or the plant may be subjected to and shall be designed that carbon disulphide liquid and gas are in closed system during their normal working.

(3) The electric furnace supports shall be firmly grounded about 60 centimeters in concrete or by other effective means.

(4) Every electric furnace shall be installed and operated according to manufactuer's instructions and these instructions shall be clearly imparted to the personnel incharge of construction and operation.

(5) The instructions regarding observance of correct furnace temperature, sulpher dose, admissible current or power consumption and periodical checking of charcoal level shall be strictly complied with.

3. Electrodes.- (1) Where upper ring electrodes made of steel are used in the electric furnace, they shall be of seamless tube construction and shall have arrangement for being connected to cooling water system through a siphon built in the electrodes or through a positive pressure water-pump.

INDEX

(2) The arrangement for cooling water referred to in sub- paragraph (1) shall be connected with automatic alarm system which shall actuate in the event of interruption of cooling water in the electrodes and give visible and audible alarm signals in the control room and simultaneously stop power supply for the furnace operation & to stop the further supply of water. The alarm system and the actuating device shall be checked every day.

4. Maintenance of charcoal level.- When any electric furnace is in operation, it shall be ensured that the electrodes are kept covered with charcoal bed.

5. Charcoal separator.- A cyclone type of charcoal separator shall be fitted on the off-take pipe between the electric furnace and sulphur separator to prevent entry of pieces of charcoal into the condensors and piping.

6. Rupture discs and safety seal. (1) At least two rupture discs of adequate size which shall blow off at a presure twice the maximum operating pressure shall be provided on each furnace and shall either be mounted directly on the top of the furnace or each through an independent pipe as close as possible to the furnace.

(2) A safety water seal shall be provided and tapped form a point between the charcoal separator and the sulphur separator.

7. Pyrometer and manometers.- (1) Each electric furnace shall be fitted with adequate number of pyrometers to give an indication of the temperature as correctly as reasonably practicable at various points in the furnace. The dials for reading the temperatures shall be located in the control room.

(2) Manometers or any other suitable devices shall be provided for indicating pressure.-

(a) in the offtake pipe before and after the sulphur separator; and

(b) in primary and secondary condensers.

8. Check valves.- All piping carrying carbon disulphide shall be fitted with check valves at suitable positions so as to prevent gas from flowing back into any electric furnace in the event of its shutdown.

9. Inspection and maintenance of electric furnaces. -

(1) Every electric furnace shall be inspected internally by a competent person—

(a) before being placed in service after installation.

(b) before being placed in-service after reconstruction or repairs; and

(c) periodically every time the furnace is opened for cleaning or de-ashing or for replacing electrodes.

(2) When an electric furnace is shut down for cleaning or de-ashing. -

(a) the brick lining shall be checked for continuity and any part found defective shall be removed.

(b) after removal of any part of the lining referred to in (a) the condition of the shell shall be closely inspected; and

(c) any plates forming shell found corroded to the extent that safety of the furnace is endangered shall be replaced.

INDEX

10. Maintenance of records.- The following hourly records shall be maintained in a log book :
(a) manometer readings at the points specified in sub-paragraph 7 (2):
(b) gas temperature indicated by pyrometers and all other vital points near the sulphur separator and primary and secondary condensers;
(c) water temperature and flow of water through the siphon in the electrodes, and
(d) primary and secondary voltages and current and energy consumed.

11. Electrical apparatus, wiring and fittings.- All buildings in which carbon disulphide is refined or stored shall be provided with electrical apprartus, wiring and fittings which shall afford adequate protection from fire and explosion.

12. Prohibition relating to smoking.- No person shhall smoke or carry matches, fire or naked light or other means of producing a naked light or spark in buildings in which carbon disulphide is refined or store, and a notice in the language understood by a majority of the workers shall be posted in the plant prohibiting smoking and carrying of matches, fire or naked light or other means of producing naked light or spark into such rooms.

13. Means of escape.- Adequate means of escape shall be provided and maintained to enable persons to move to a safe place as quickly as possible in case of an emergency. At least two independent staircases of adequate width shall be provided in every building housing the furnace at reasonable intervals at opposite ends. These shall always be kept clear of all obstructions and so designed as to afford easy passage.

14. Warning in case of fire.- There shall be adequate arrangements a for giving warnings in case of fire or explosion which shall operate on electricity and in case of failure of electricity by some mechancial means.

15. Fire-fighting equipment. - (1) Adequate number of suitable fire extinguishers or other fire fighting-equipments shall be kept in constant readiness for dealing with risks involved and depending on the amount and nature of materials stored.

(2) Clear instruction as to how the extinguishers or other equipment shall be used printed in the language which the majority of the workers employed understand, shall be affixed to each extinguisher or other equipment and the personnel trained in their use.

16. Bulk.- (1) Open or semi-enclosed spaces for storage of bulk sulphur shall be sited with due regard to the dangers which may arise from sparks given off by nearby locomotives etc., and precautions shall be taken to see that flames. smoking and matches and other sources of ignition do not come in contact with the clouds of dust arising during handling of bulk sulphur.
(2)All enclosures for bulk sulphur shall be of non-combustible construction, adequately ventilated and so designed as to provide a minimum of ledges on which dust may lodge.
(3) The bulk sulphur in the enclosures shall be handled in such a manner as to minimise the formation of dust clouds and no flame, smoking and matches or other sources of ignition shall be employed during handling and non-sparking tools shall be used whenever sulphur is shovelled or otherwise removed by hand.
(4) No repairs involving flames, heat or use of hand or power tools shall be made in the enclosure where bulk sulphur is stored.

17. Liquid Sulphur.- Open flames, electric sparks and other sources of ignition, including smoking and matches, shall be excluded from the vicinity of molten sulphur.

INDEX

18. Training and supervision. (1) All electric furnaces and all plants in which carbon disulphide is condensed, refined or stored shall be under adequate supervision at all times while the furnaces and plant are in operation.

(2) Workers in charge of operation and maintenance of electric furnaces and the plants shall be properly qualified and adequately trained.

19. Washing facilities.- (1) The occupier shall provide and maintain, in a clean state and in good repair, for the use of all persons employed, a washing place under cover with at least one tap or stand-pipe, having a constant supply of clean water for every five such persons, the taps or stand-pipes being spaced not less that 120 centimeters apart with a sufficient supply of soap and clean towels, provided that towel shall be supplied individually to each worker if so ordered by the Inspector,

(2) All the workers employed in the sulphur storage and melting operations shall be provided with a nail brush.

20. Personal protective equipment.- (1) Suitable goggles and protective clothing consisting of overalls (without pockets); gloves and foot wear shall be provided for the use of operatives—
(a) when operating valves or cocks controlling fluids etc.,
(b) drawing off of molten sulphur from sulphur pots; and
(c) harnding charcoal or sulphur.
(2) Suitable respiratory protective equipment shall be provided and stored in the appropriate place for use during abnormal conditions or in an emergency.
(3) Arrangements shall be made for proper and efficient cleaning of all such protective equipments.

21. Cloakrooms.- There shall be provided and maintained for the use of all persons employed in the processes, a suitable clockroom for clothing put off during work hours and a suitable place separate from the cloakroom for the storage or overalls or working clothes. The accommodation so provided shall be placed in the charge of a responsible person and shall be kept clean.

22. Unauthorised persons.- Only maintenance and repair personnel, persons directly connected with the plant operation and those accompanied by authorised persons shall be admitted into the plant.

SCHEDULE - XXIII

Operations involving High Noise levels.

1. Application. - This schedule shall apply to all operations in any manufacturing process having high noise level.

2. Definitions - For the purpose of this schedule. -

(a) "Noise" means any unwanted sound.

(b) "High noise level" means any noise level measure on the A— weighted scale is 90 decibel or above.

(c) "Decibel" means one-tenth of "Bel" which is the fundamental division of a logarithmic scale used to express the ratio of two specified or implied quantities, the number of "Bels" denoting such a ratio being the logarithm to the base of 10 of this ratio. The noise level (or the soung pressure levl) corresponds to a reference pressure of 20 x 10-6 newtons per square meter or 0.0002 dynes per square centimeter which is the threshold of bearing,, that is, the lowest sound pressure level necessary to produce the sensation of hearting in average healthy listeners. The decibel in abbreviated form is dB.

INDEX

(d) "Frequency" is the rate of pressure variations expressed in cycles per second or hertz.

(e) "dBA" refers to sound level in decibels as measured on a sound evel meter operating on the A-weighting net work with slow meter response.

(f) "A-weighting" means making graded adjustments in the intensities of sound of various frequencies for the purposes of noise measurement, so that the sound pressure level measured by an instrument reflects the actual response of the human ear to the sound measured.

3. Protection against noise.- In every factory, suitable engineering control or administrative measures shall be taken to ensure , so far as is reasonably practicable, that no worker is exposed to high noise level.

4. Where it is not possible to reduce the noise exposure to the levels specified in paragraph-3 by reasonably practicable engineering control or administrative measure, the noise exposure shall be reduced to the greatest extent feasible by such control measures and each worker so exposed shall be provided with suitable ear protectors so as to reduce the exposure below high noise level.

5. Every worker employed in areas where the noise exceeds high noise level shall be subjected to an auditory examination by a registered Medical Practitioner having qualification of M.B.B.S or equivalent within 14 days of his first employment and thereafter, shall be re-examined at least once in every 12 months. Such initial and periodical examinations shall include tests which the said Doctor may consider appropriate."

SCHEDULE - XXV

Manufacture of pottery

1. Application :- These provisions shall apply to all factories engaged in manufacture of pottery except a factory in which any of the following articles are made :

(a) Unglazed or salt- glazed bricks and tiles; and

(b) architectural terra-cotta made from plastic clay and either unglazed or glazed with a leadless glaze only.

2. Definitions. — For the purpose of this schedule-

(a) "pottery" includes earthenware, stoneware, prorcelain, china clay, and any other articles made from such clay or from a mixture containing clay and other materials such as quartz. flint, felspar, and gypsum;

(b) "efficient exhaust draught" means localised ventilation effected by mechanical or other means for removal of dust or fume so as to prevent it from escaping into air of any place in which work is carried on- No draught shall be deemed efficient which fails to remove effectively dust or fume generated at the point where dust or fume originates;

(c) "fetting" includes scalloping, lowing, sand papering sand sticking, brushing or any other process of cleaning of potteryware in which dust is given off;

(d) "leadless glaze" means a glaze which does not contain more than one percent of its dry weight of lead compound calculated as lead monoxide;

(e) "low solubility glaze means a glaze which does not yield to dilute hydrochloric acid more than five percent of its dry weight of a soluble lead compound calculated as lead monoxide when determined in the manner described below:

A weighed quantity of the material which has been dried at 100 degrees centigrade and thoroughly mixed shall be continuously shaken for one hour at the common temperature, with 1000 times its weight of an aqueous solution of hydrochloric acid containing 0.25 percent by weight of hydrogen chloride. This solution shall thereafter be allowed to stand for one hour and then filtered .The lead salt contained in the clear filtrate shall then be precipitated as lead sulphide and weighed as lead sulphate;

(f) "ground or powdered flint or quartz" does not include natural sands; and

(g) "potter's shop" includes all places where pottery is formed by pressing or by any other process and all places where shaping, fettling or other treatment of pottery articles prior to placing for the biscuit fire is carried on.

3. Effi. ent exhaust draught.- The following processes shall not be carried on without the use of an efficient exhaust draught :

(a) all processes involving the manipulation or use of a dry and unfritted lead compound;

(b) fettling operatios of any kind, whether on greenware or biscuit, provided that this shall not apply to the wet fetting, and to the occasional finishing of pottery articles without the aid of mechanical power;

(c) shifting of clay dust or any other material of making tiles or other articles by pressure, except where.-

(i) this is done in a machine so enclosed as to effectually prevent the escape of dust;or

(ii) the material to be shifted is so damp that no dust can be given off;

(d) pressing of tiles from clay dust, an exhaust opening being connected with each press, and pressing from clay dust of articles other than tiles unless the material is so damp that no dust is given off;

(e) fettling of tiles made from clay dust by pressure, except where the fettling is done wholly on, or with, damp material, and fetting of other articles made from clay dust, unless the material is so damp that no dust is given off;

(f) process of loading an unloading of saggars where handling and manipulation of ground and powdered fint, quartz, alumina or other materials are involved;

(g) brushing of earthenware biscuit, unless the process is carried on in a room provided with efficient general mechanical ventilation or other ventilation which is certified by the Inspector of Factories as adequate having regard to all the circumstances of the case.

(h) fettling of biscuitware which has been fired in powdered lint or quatz except where this is done in machines so enclosed as to effectually prevent the escape of dust;

(i) Where cleaning after the application of glaze by dipping or other process;

(j) crushing and dry grinding of materials for pottery bodies and saggars, unless camied on in machines so enclosed as to effectively prevent the escape of dust or is so damp that no dust can be given off;

(k) sieving or manipulation of powdered flint, quartz clay greg or mixure of those materials unless it is so damp that no dust can be given off;

(l) grinding of tile on a power- driven wheel unless an efficient water spray is used on that wheel;

(m) lifting and conveying of materials by elevators and conveyors unless they are effectively enclosed and so arranged as to prevent escape of dust into the air in or near to any place in which persons are employed;

INDEX

(n) preparation or weighing out of flow material, lawning of dry colours, colour dusting and colour blowing;

(o) mould making unless the bins or simillar receptacles used for holding plaster of parts are provided with suitable covers; and

(p) manipulation of calcined material unless the material has been made and remain so wet that no dust is given off.

4. Separation of processes.- Each of the following processes shall be carried on in such a manner and under such conditions as to secure effectual separation from one another, and from other wet processes :

(a) Crushing and dry grinding or sieving of materials, fetting, pressing of tiles, drying of clay and greenware, loading and unloading of saggars;and
(b) all processes involving the use of dry load compound.

5. Prohibition on use of glaze.- No glaze which is not a lead less glaze or a low solubility glaze shall be used in a factory in which pottery is manufactured.

6. Prohibition relating to women and young persons._
No women or young person shall be employed or permitted to work in any of the operations specified in paragraph 4, or at any place where such operations are carried on.

7. Provision of screen to potter's wheel.- The potter's wheel (Jolly and Jigger) shall be provided with screens or so constructed as to prevent clay scrapings being thrown off beyond the wheel.

8 Control of dust during cleaning.- (1) All practical measures shall be taken by damping or otherwise to prevent dust arising during cleaning of floors.

(2) Damp saw-dust or other suitable material shall be used to render the moist method effective in preventing dust rising into the air during the cleaning process which shall be carried out after work has ceased.

9. Floor of certain wo kroom.- The floor of potter's shops, slip houses dipping houses, and ware - cleaning rooms shall be hard, smooth and impervious and shall be thoroughly cleaned daily by an adult male using a moist method.

10. Protective equipment.- (i) The occupier shall provide and maintain suitable overalls and head- coverings for all persons employed in process included under paragraph 3.

(ii) The occupier shall provide and maintain suitable aprons of a water-proof or similar material, which can be sponged daily, for the use of a dippers, dippers assistants, throwers, jolly workers, caster, mould maker and filter press and pug mill workers.

(iii) Aprons provided in pursuance of paragraph 10(2) shall be thoroughly cleaned daily by the wearers by sponging or other wet process. All overalls and head-covering shall be washed, cleaned and mended at least once a week, and this washing cleaning or mending shall be provided for, by the occupier.

(iv) No person shall be allowed to work in emptying sacks of dusty materials, weighing out and mixing of dusty materials and charging of ball-mills and plungers without wearing a suitable and efficient dust respirator.

INDEX

11. Washing facilities, - The occupier shall provide and maintain, in a clean state and in good repair for the use of all persons employed in any of the processes specified in paragraph 3. -

(a) a wash-place under cover with either. -

(i) a trough with smooth impervious surface fitted with a wase- pipe without plug, and of sufficient length to allow at least 60 centimeters for every five such persons employed at any one time, and having a constant supply of clean water from taps or jets above the trough at intervals of not more than 60 centimeters; or

(ii) at least one tap or stand-pipe for every five such persons employed at any one time and having a constant supply of clean water, the tap or stand-pipe being spaced not less than 120 centimeters apart; and

(b) a sufficient supply of clean towels made of suitable material changed daily, with sufficient supply of nail brushes and soap.

12. Time allowed for washing.- Before each meal and before the end of the day's work shall be allowed for washing to each person empioyed in any of the processes mentioned in paragraph3.

13. Messroom.- (1) There shall be provided and maintained for use of all persons remaining within the premises during the rest intervals, a suitable messroom providing accommodation of 0.93 square per head and furnished with.-

(a) a sufficient number of tables and chairs or benches with back rest;
(b) arrangements for washing utensils;
(c) adequate means for warming food; and
(d) adequate quantity of drinking water.

(2) The room shall be adequetely ventilated by the circulation of fresh air and placed under the charge of a responsible person and shall be kept clean.

14. Food, Drinks, etc, prohibited in workrooms.- No food, drink, pan and supari or tobacco shall be brought into, or consumed by any worker in any workroom in which any of the processes mentioned in paragraph 3 are carried on and no person shall remain in any such room during intervals for meals or rest.

15. Clockroom etc.- There shall be provided and maintained for the use of all persons employed in any of the processes maintained in paragraph 3.-

(a) a clockroom for clothing put off during working hours and such accommodation shall be separate from any meassroom; and
(b) separate and suitable arrangements for the storage of protective equipments provided under paragraph 10.

16. Medical examination. - 1. All persons employed in any process included under paragraph 3 shall be examined by the Certifying Surgeon within 7 days preceeding or following the date of their first employment in such process; thereafter all persons employed in any process included under sub-paragraph 3 (a) and (n) shall be examined by the Certifying surgeon once in every three calender months and those employed in any process included in sub-paragraph 3 (b) to (m) and (o) and (p) of paragraph 3 once in every twelve months by the Certifying Surgeon Records of such examination shall be entered by the Certifying Surgeon in the Health register and certificate of fitness granted to him under paragraph 17.

INDEX

(2) if at any time the certifing Surgeon is of opnion that any person employed in any process included in paragraph 3 is no longer fit foremployment on the ground that continuance therein would involve damage to his health, he shall cancel the certificate of fitness granted to that person.

(3) No person whose certificate of fitness has been cancelled shall be re-employed unless the Certifying Surgeon after examination, again certificate him to be fit for employment.

17. Certificate of fitness.- A person medically examined under paragraph 16 and found fit for employment shall be granted, by the Certifying surgeon, a certificate of fitness in Form No. 30 and such Certificate shall be in the custody of the manager of the factory. The certificate shall be kept readily available for inspection by any inspector and the person granted such a certificate shall carry it with him while at work a taken giving reference to such certificate.

SCHEDULE - XXVI

Operations in Foundries.

1. Application. - Provisions of this Schedule shall apply to all parts of factories where any of the following operations or processes are carried on :

(a) the Production of iron casting or, as the case may be, steel casting by castings in moulds made of sand, loam, moulding composition or other mixture of materials or by shall moulding, or by centrifugal casting and any process incidental to such production;

(b) the production of non-ferrous casting by casting metal in moulds made of sand, loam, metal, moulding, composition or other material or mixture of materials, or by shall moulding, die, casting (including pressure die-casting,) centrifugal casting or continuous casting and any process incidental to such production, and

(c) the melting and casting of non-ferrous metal for the production of ingots, billets, siabs or other similar products and the stripping thereof;

but shall not apply with respect to _

(a) any process with respect to the melting and manufacture of lead and the Electric Accumulators;

(b) any process for the purpose of a printing works;or

(c) any smelting process, in which metal is obtained by a reducing operation incidental to such operations;or

(d) the production of steel in the form of ingots; or

(e) any process in the course of the manufacture or solder or any process incidental to such manufacture;or

(f) the melting and casting of lead or any lead-based alloy for the production of ingots, billets slabs or other similar products or the stripping thereof, or any process incidental to such melting casting or stripping,

2. Definitions : For the purpose of this schedule -

(a) "approved respirator" means a respirator of a type approved by the Chief Inspector of Factories.
(b) "cupola or furnace including a receiver associated therewith;

INDEX

(c) "dressing or fetting operator" includes stripping and other removal of adherent sand, cores, runners, risers, flash and other surplus metal from a casting and the production or reasonably clean and smooth surface but does not include (a) the removal of metal from a casting when performed incidentally in connection with the machining or assembling of casting after they have been dressed or fettled or (b) any operation which is a knock-out operation within the meaning of this schedule;

(d) "foundry" means those parts of a factory in which the production of iron or steel or non-ferrous casting (not being the production of pig-iron or the productions of steel in the form of ingots) is carried on by casting in moulds made of sand, loam, ,oulding,composition or other mixture of materials, or by shall moulding or any centrifugal casting in metal moulds lined with sand, or die casting including pressure diecasting together with any part of the factory in which any of the ollowing processes are carried on an incidental processes in connection with any such productio namely. the preparation and mixing of materials used in foundry process, the preparation of moulds and cores knockout operations and dressing or fetting operations;

(e) "Knock-out operation" means all methods of removing casatings from moulds and the following operations, when done in connection therewith namely stripping coring-out and the removal of runners and risers;

(f) "pouring aisle means on aqlsle leading from a main gangway or directly from a cupola or furnance to where metal is poured into moulds.

3. Prohibition of use of certain materials as parting materials (1) A material shall not be used as a parting material, if it is a material containing compounds of sllicon calculated s sillica to the extent more than 5 per cent by weight of the dry material;

Provided that this prohibition shall not prevent the following being used as a parting if the material does not centain an admixture of any other silica._

(a) Zirconlum silicate (Zircon)
(b) Calcined china clay
(c) Calcined aluminous fireclay
(d) Sillimanite
(e) Calcined or fused alumina
(f) Clivine
(g) Natural sand

(2) Dust or other matter deposited from a ferttling or blasting process shall not be used as a parting material or as a constituent in a parting material.

4. Arrangment and storage. - For the purpose of promoting safety and ccleanlines in workrooms the following requirements shall be observed :

(a) moulding boxes, loam plates, ladles, patters, plates, frames, boards box weights and other heavy articles shall be so arranged and placed as to enable work to be carried on without unnecessary risk;

(b) suitable and conveniently accessible racks, bins or other receptacles shall be provided and used for the storage of other gear and tools;

(c) Where there is bulk storage of sand, fuel, mmetal scrap or other materials or residuces, suitable bins, bunkers or other receptacles shall be provided for the purpose of such storage.

INDEX

5. Construction of floors. -(1) Floor of indoor work places in which the processes are carried on, other than parts which are of sand, shall have an even surface of hard material.

(2) No part of the floor of any such indoor workplace shall be of sand except where this is necessary by-reason of the work done.

(3) All parts of the surface of the floor of any such indoor workplace which are of sand shall so far as practicable be maintained in an even and firm condition.

6. Cleanlines of indoor workplaces.- (1) All accessible parts of the walls of every indoor workplace in which the processes are carried on and everything affixed to these walls shall be effectively cleaned by a suitable method to a height of not less than 4.2 metres from the floor at least once in every period of fourteen months. A record of the carrying out of every such effective cleaning in pursuance of this paragraph including the date (which shall be not less than five months more than nine months after the last immediately proceding washing, cleaning or other treatment) shall be maintained.

(2) Effective cleaning by a suitable method shall be carried out at least once every working day of all accessible parts of the floor of every indoor workplace in which the processes are carried on, other than parts which are of sand; and the parts which are of sand shall be kept in good order.

7. Manual operations involving molton metal.- (1) There shall be provided and maintained for all persons employed on manual operations involving molten metal with which they are liable to be splashed, a working space for that operation.-

(a) which is adequate for the safe perforamance of the work and
(b) which so far as reasonably practicable, is kept free from obstruction.

(2) Any operation involving the carrying by hand of a container holding molton shall be performed on a floor all parts of which where any person walks while engaged in the operations shall be on the same level;

provided that, where necessary to enable the operation to be performed without undue risk, nothing in this paragraph shall prevent the occassional or exceptional use of a working space on a different level from the floor, being a space provided with a safe means of access from the floor for any person while engaged in the operation,

8. Gangways and pouring aisels.- (1) In every workroom to which this paragraph applies constructed, reconstructed or converted for use as such after coming into force of these rules and so, so far as reasonably practicable, in every other workroom to which this paragraph applies, sufficient and clear main gangways shall be provided and properly maintained which.

(a) shall have an even surface of hard material and shall, in particular, not be of sand or have on them more sand than in necessary to avoid risk of flying metal from accidental spillage,
(b) shall be kept, so far as reasonably practicable, free from obstruction;
(c) if not used for carring molten metal, shall be at least 920 millimetres in width;
(d) if used for carrying molton metal shall be

(i) where truck ladles are used exclusively, at least 600 millimeter vidder than the overall width of the ladle;

(ii) Where hand, shanks are carried by not more than two men, at least 920 millimetres in width;

INDEX

(iii) where hand shanks are carried by more than two men, at least 1.2 metres in width; and

(iv) where used for simulataneous travel in both directions by men carring hand shanks, at least 1.8 metres in width.

(2) In workroom (to which this paragraph applies) constructed, reconstructed or converted for use as such after coming into force of these rules, sufficient and clearly defined pouring aisles shall be provided and properly maintained which.-

(i) shall have an even surface of hand material and shall, in particular, not be of sand or have on-them more sand than is necessary to avoid risk of flying metal from accidental spillage;

(ii) shall be kept as far as reasonably practicable free from obstruction;

(iii) if molton metal is carried in hand landless or bull ladles by net more than two men per ladle, shall be at least 460 millimetres wide, but where any moulds alongside the aiste are more than 510 millimetres above the floor of the asile, the aisle shall be not less than 600 millimetres wide;

(iv) if molton metal is carried in hand-ladless or bull-ladles by more than two men per ladle shall be at least 760 millimetres wide;

(v) if molton metal is carried in crane, trolley of truck ladles, shall be of a width adequate for the safe petromance of the work.

(3) Provisions of sub-paragraph (1) and (2) shall not apply to any workroom or part of a workroom if, by reason of the nature of the work done therein, the floor or that workroom or as the case may be, that part of a workroom has to be of sand.

(4) In this paragraph, "workroom to which this paragraph applies " means a part of a ferrous or non-ferrous foundry in which molton metal is transport or used, and a workroom to which this paragraph applies shall be deemed for the purpose of this paragraph to have been constructed, reconstructed or converted for use as such after the making of this schedule if the construction, reconstruction or conversion thereof was begun after the coming into force of these rules.

9. Work near cupolas and furnances.- No person shall carryout any work within a distance of 4 metres from a vertical line passing through the delivery end of any spout of a cupola or furnance. being a spout used for delivering melton metal, or within a distance or 2.4 metres from a vertical line passing through the nearest part of any ladle which is in position at the end of such a spout, except, in either case, where it is necessary for the proper use of maintanance of a cupola or furnece that work should be carried out within that distance or that work is being carried out at such a time and under such conditions that there is no danger to the person carrying it, out from molton metal which is being obtained from the cupola or furnace or is in a ladle in position at the end of the spout.

10. Dust and fumes.- (1) Open coal, coke or wood fires shall not be used for heating or drying ladles inside a workroom unless adequate measures are taken to prevent, so far as practicable fumes or other impurities from entering into or remaining in the atmospere of the workroom.

(2) No open coal, coke or wood fires shall be used for drying moulds except in circumstances in which the use of such fires is unavoidable.

(3) Mould stoves, core stove and annealling furnaces shall be so designed constructed, maintained and worked as to prevent, so far as practicable, effensive or injurious fumes from; entering into any workroom during any period when a person is employed therein.

INDEX

(4) All knock-out operations shall be carried out.-

(a) in a separate part of foundry suitably partitioned off, being a room or part in which, so far as reasonably practicable and suitable local exhaust ventilation and a high standard of general ventilation are provided; or

(b) in an area of foundry in which, so fas as reasonably practicable effective and suitable local exhaust ventilation is provided or where compliance with this requirement is not reasonably practicable a high standard of general ventilation is provided.

5. All dressing or fetting operation shall be carried out. -

(a) in a separate room or in a separate part of the foundry suitably partitioned off; or
(b) in an area of the foundry set apart for the purpose;

and shall, so far as reasonably practicable be carried out with effective and suitable local exhaust ventilation or other equally effective means of supressing dust, operating as near as possible to the point of origin of the dust.

11. Maintenance and examination of exhaust plant-

(1) All ventilation plant used for the purpose of extracting suppressing or controlling dust or fumes shall be properly maintained.

(2) All ventiation plant used for the purpose of extracting, suppressing or controlling dust or fumes shall be exmained and inspected once every week by a responsible person. It shall be thoroughly examined and tested by a competent person at least once in every period of twelve months; and particulars of the results of every such examination and test shall be entered in and approved in Form-26-A which shall be available for inspection by an Inspector. Any defect found on any such examination and test shall be immediately reported in writing by the person carrying out the examination and test to the occupier or manager of the factory.

12. Protective Equipments. (1) The occupier shall provide and maintain suitable protective equipment specified for the protection of workers.

(a) suitable gloves or other protection for the hands for workers engaged in handling any hot material likely too cause damage to the hands by burn, scald or sear, or in handling pig, iron, rough castings or other articles likely to cause damage to the hands by cut or abrasion;
(b) approved respirators for workers carrying out any operationns creating a heavy dust concentration which can not be dispelled quickly and effectively by the existing ventilation arrangements.

(2) No respirator for the purpose of clause 1(b) has been worn by a person shall be worn by another person if it has not since been thoroughly cleaned and disinfected.

(3) Persons who for any of their time-

(a) work at aspout of or attend to, a cupola or furnace in such circumstances that material therefrom may come into contact with the body, being material at such a temperature that its contact with the body would cause a burn; or
(b) are engaged in, or in assisting; with, the pouring of molten metal; or
(c) carry by hand or move by manual power any indle or would containing molton metal;

INDEX

(d) are engaged in inocking-out operation involving material at such a temperature that its contact with the body would cause a bum;

shall be provided with suitable footwear and gaiters which if worn by them prevent, so far as reasonably practicable risk or burns to their feet and ankles.

(4) Where appropriate, suitable screens shall be provided for protection against flying material (including splashes of molton metal and sparks and chios thrown off in the course of any process.)

(5) The occupier shall provide and maintain suitable accommodation for the storage and make adequate arrangements for clearing and maintaining of the protective equipment supplied in pursuance of this paragraph.

13. Washing and bathing facilities.- (1) There shall be provided and maintained in clean state and good repair for the use of all workers employed in the foundary.-

(a) a wash place under cover with either.-

(i) a through with impervious surface fitted with a waste pipe without plug, and of sufficient length to allow at least 60 centimetres for every 10 such persons employed at any one time and having a constant supply of clean water from taps or jets above the through at intervals of not more than 60 centimetres or

(ii) at least one tap or stand pipe for every to such persons employed at any time, and having a constant supply of clean water, the tap or stand pipe being spaced not less than 1.2 metres apart; and

(b) not less than one half of the total number of washing places provided under clause (a) shall be in the form of bath- rooms.

(c) a sufficient supply of clean towels made of suitable material charged daily, with sufficient supply of nail brushes and soap.

(2) The facilities provided for the purposes of sub.- paragraph (1) shall be placed in change of a responsile person or persons and maintained in a clean and orderly condition.

14. Disposed of waste.- Appropriate measures shall be taken for the disposed of all waste products from shell moulding (including waste burnt-sand) as soon as reasonably practicable after the castings have been knocked - out.

15. Disposal of dress and skimmings.- Dress and skimmings removed from motten or taken from a furnace shall be placed forthwith in suitable receptacles.

16. Material and equipment left out of doors.- All material and equipment left out of doors (including material and equipment so left only temperarily or occassionally) shall be so arranged and placed as to avoid unnecessary risk. There shall be safe means of access to all such material and equipment and, so far as reasonably practicable, such access shall be by roadways or pathways which shall be properly maintained. Such roadways or pathways shall have a firm and even surface and shall, so far as reasonably practicable, be kept free from observation.

17. Medical facilities and records of examinations and tests.-

INDEX

(1) The occupier of every factory to which this schedule applies shall -

(a) employ a qualified medical practioner for medical surveilance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories; and

(b) provide to the said medical prasctitioner all the necessary facilities for the purpose referred to in clause (a).

(2) The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate register approved by the Chief Inspector of Factories, which shall be kept readily available for inspection by the Inspector.

18. Medical examination by Certifying Surgeon.- (1) Every worker employed in a foundry shall be examined by Certifying surgeon within 15 days of his employment Such medical examination shall include pulmonary function tests and chest -ray No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying surgeon.

(2) Every worker employed in the said processes shall be re- examined by a Certifying Surgeon at least once in every twelve months. Such examination shall, wherever the Certifying Surgeon considers appropriate include all the tests as specified in sub- paragraph (1) except chest X-ray which shall be done once in 3 years.

(3) The certifying Surgeon after examing a worker, shall issue a certificate of Fitness in form 27-A. The record of examination and re-examinations carried out shall be entered in the certificate and the certificate shall be kept in the custody of the manager of the Factory The record of each examination carried out under sub-paragraph (1) and (2) including the nature and the surgeon in a health in form 20.

(4) The Certificate of fitness and the health register shall be kept readily available for inspection by the Inspector.

(5) if at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of his findings in the said certificate and the health register, The entry of his findings in those documents shall also include the period for which he considers that said person is unfit for work in the said processes.

(6) o person who has been found unfit to work as provided in sub-paragraph 5 above shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes"

(l) In Form No 20-A, for the existing heading the following heading shall be substituted, namely:-

"Prescribed under paragraph 7 of schedule V, paragraph 4 of Schedule VIII and paragraph 5(2) of schedule XVII under rule 102 (1)".

26. In the said rules, for rule 103, the following shall be substituted namely :-

103. Notification of accidents and dangerous occurences.

(1) When any accident which results in the death of any person or which results in such bodily injury to any person as is likely to cause his death, or any dangerous occurrence specified in the schedule annexed hereto takes place in a factory, the manager of the factory shall forthwith send a notice thereof by telephone, special messenger or telegram to the Inspector and the Chief Inspector.

INDEX

(2) When any accident or any dangerous occurrence specified in the schedule annexed hereto, which results in such bodily injury to any person as is likely to cause his death, takes place in a factory, notice as mentioned in sub-rule (1) shall be sent also to ;

(a) the District Magistrate or sub-divisional officer;
(b) the officer in charge of the nearest police station; and
(c) the nearest relatives of the injured or deceased person.

(3) Any notice given as required under sub-rule (1) and (2) shall be confirmed by the manager of the factory to the authorities mentioned in those sub-rules within 12 hours of the accident or the dangerous occurrence by sending them a written report in Form No. 21 in the case of an accident or dangerous occurrence causing death and bodily injury to any person and in Form No. 21A in the case of a dangerous occurrence which has not resulted in any bodily injury to any person.

(4) When any accident or dangerous occurrence specified in the schedule takes place in a factory and it causes such bodily injury to any person as prevents the person injured from working for a period of 48 hours or more immediately following the accident or the dagerous occurrence, as the case may be, the manager of the factory shall send a report thereof to the Inspector in Form No. 21 within 24 hours after the expiry of 48 hours from the time of the accident or the dangerous occurrence :

Provided that if in the case of an accident or dangerous occurrence death occurs of any person injured by such accident or dangerous occurrence after the notices and reports referred to in sub-rules (1), (2), (3) or (4) as the case may be, have sent, the messanger of the factory shall forthwith send a notice thereof by telephone, special manager or telegram to the authorities and persons mentioned in sub-rules (1) and (2) and also have this information confirmed in writing within 12 hours of the death :

Provided further that if the period of disability from working for 48 hours or more referred to in sub-rule (4) does not occur immediately following the accident, or the dangerous occurrence, but later, or occurs in more than one spell, the report referred to shall be sent to the Inspector in the prescribed Form No. 21 within 24 hours immediately following the hours when the actual total period of disability from working resulting from the accident or the dagerous occurreneer beomes 48 hours.

SCHEDULE

The following classes of dangerous occurrences, whether or not they are attended by personal injury or disablement ;

1. Bursting of a plant used for containing or supplying steam under pressure greater than atmospheric pressure.

2. Collapse or failure of a crane, derrick, winch, hoist or other appliances used in raising or lowering persons or goods, or any part thereof, or the overturning of a crane.

3. Explosion, fire, bursting out, leakage, or escape of any molten metal, or hot liquor or gas causing bodily injury to any person or damage to any room or place in which persons are employed or fire in rooms of cotton pressing factories, where a cotton opener is in use.

4. Explosion of a receiver or, container used for the storage at a pressure greater than atmospheric pressure of any gas or gasses (including air) or any liquid or solid resulting from the compression of gas.

INDEX

5. Collapse or subsidence of any floor, gallery, roof, bridge, tunnel, chimney, wall, building or any other syructure.

28. In the said rules --

1. For form numbers 1, 1A, 2, 3, 3-A, 4, 5, 6, 7, 8, 9, 10, 11, 11A, 13, 14, 15, 16, 17, 18, 21, 22, 24, 25, 28, 29 and 35, the following Forms shall be respectively substituted namely--

Form 1
Form 1-A
Form 2
Form 3
Form 3-A
Form 4
Form 5
Form 6
Form 7

2. After form numbers 1A, 4, 21, 25, 31 and 36 the following new forms shall respectively be inserted namely--

Form 1-A
Form 4-A
Form 21-A
Form 26
Form 27
Form 32
Form 33
Form 37

FORM NO. 1

(Prescribed under Rule 3)

Application for permission to construct, extend or take into use any building as a factory.

1. Aplication for--

   a. Constructing new building ☐

   b. extending an existing building ☐

   c. taking into use any building as a factory (Tick one or more as applcable) ☐

2. Applicant's name and address :
   (In block letters)

3. Full name and postal address :
   of factory

   a. Name

   b. Address
   (Town or village/Dist./Pin Code No.0

4. Please indicate also following dewtails--

   a. Nearest Police station--distance
   b. Nearest Railway Station--or steamer Ghat--
   c. Nearest Public Hospital

5. a. Whether already registered as factory : Yes/No

   b. If yes,
      1. Registration No.
      2. Licence No.
      3. date of renewal of Licence

   c. Does it fall in hazardous category under section 2(cb) ? Yes/No
   d. If so, has site been approved u/s 41A ? Yes/No
   e. If so, date of approval.

6. Particulars of plant to be installed

   * To be enclosed only if the site has not been appraised in terms of Section 41A.

7. Enclosures

   a. Flow chart of the manufacturing process Yes/No

   b. Brief description of the process in its various stages Yes/No

INDEX

c. Plan, In duplicate drawn to scale showing-

i. the site of the factory and immediate surroundings including adjacent buildings and other structures, roades drains, etc. Yes\No

ii. the plan, elevation and necessary cross-sections of the varios building indicating all relevent details relating to natural lighting, ventilation and means of escape in case of fire, The plans shall also clearly indicate the position of the plant and machinery, aisles and passage - ways. Yes\No

d. Such other particulars as required by the Chief Inspector at the time of submission of the application.

Signature of applicant.

Name of applicant

(In block letters)

Date : Telephone number

FORM NO. 1-A

(Prescribed under Rule 3-C)

CERTIFICATE OF STABILITY

1. Name of the Factory

2. Village, town and district in which the factory is situated.

3. Full postal address of the factory.

4. Name of the Occupier of the factory.

5. Nature of manufacturing process to be carried on in the factory.

6. Number of floors on which workers will be employed.

I certify that, I have inspected the premises, the plans of which have been approved by the Chief Inspector by his letter No. .....dated.....and examined the various parts including the foundations with special reference to the machinery, plant etc. that have been installed. I am of the opinion that all the works of engineering construction in the premises is/are structurally sound and that its/their stability will not be endangered by its/their use as a factory/part of a factory for the manufacture of..... for which the machinery plant etc. installed are intended.

FROM NO. 1-B

(Prescribed under Rule 68-1)

FORMAT OF APPLICATION TO THE SITE APPRAISAL COMMITEE

1. Name and address of the applicant

2. Site ownership data

2.1 Revenue details of site such as Survey No.
Plot No. etc.

2.2 Whether the site is classified as forest and if so, whether approval of the Central Government under section 5 of the Indian Forest Act, 1927 has been taken.

2.3 Whether the proposed site attracts the provision of section 3(2)(v) of the Environment (Protection) Act, 1989. E.P.Act, 1989 and if so, the nature of the restrictions.

2.4 Local authority under whose jurisdication the site is located.

3. Site plan.

3.1 Site plan with clear indentification of boundaries and total area proposed to be occupied and showing the following details near by the proposed site.

a. Historical monument if any, in the vicinity.
b. Names of neighbouring manufacturing units and human habitate, educational and training institutions, petrol installations, storage of liquid Petroliyam Gas (L.P.G.) and other hazardous substances in the vicinity and their distances from the proposed unit.
c. Water sourses (rivers, streams, canals, dams, water filtration plants etc.) in the vicinity.
d. Nearest hospitals, fire-stations, civil defence stations and police station and their distances.
e. High tension electrical transmission lines, pipe-lines for water, oil, gas or sewage, railway-lines, roads, stations, jatties and other, similar installations.

3.2 Details of soil conditions and depth at which hard strata obtained.

3.3 Counter map of area showing nearby hillocks and difference in levels.

3.4 Plot plan of the factory showing the entry and exit points, roads within, water drains, etc.

4. Project Report :

4.1 Asummary of the salient features of the project.

4.2 Status of the organisation (Government, Semi-Government, Public or private etc.)

4.3 Maximum number of persons likely to be working in the factory.

4.4 Maximam amount of power and water requirements and source of their supply.

4.5 Block diagram of the building and installation, in the proposed supply.

4.6 Details of housing colony, hospitals, schools and other infrastructural facilities proposed.

INDEX

5. Organisation structure of the proposed manufacturing unit/factory.

5.1 Organisation dliagrarms of

— proposed enterprise in general
— Health, safety and environment protection departments and their linkage to operation and techni cal departments.

5.2 Proposed Health and Safety Policy.

5.3 Area allocated for treatment of wastes and affluents.

5.4 Percentage outlay on safety, health and environment protection messures.

6. Materological data relating to the site :

6.1 Average minimum and maximum of
— Temperature
— Humidity
— Wind valocities during the previous ten years

6.2 Seasonal variations of wind direction

6.3 Highest water-level reached during the floods in the area recorded so far

6.4 Lightening and adimic dataof the area

7. Communication Links

7.1 Availability of telephone/telex-wireless and other communication facilities for outside communication.

7.2 Internal communication facilities proposed

8. Manufacturing process information

8.1 Process flow diagram

8.2 Brief Write up on process and technology

8.3 Critical process parameters such as pressure build-up temperature rise and run-away reactions.

8.4 Other external effects critical to be having safety implication, such as ingress of moisture of water, contact with incompatiable substances, sudden power failure

8.5 Highlights of the build-in safety/pollution control devices or measures/incorporatorated in the manufacturing technology.

9. Information of Hazandous Materials

9.1 Raw materials, intermediates, products and by—products and their quantities (Enclose Material Safty Data Sheet in respect of each hazardous substance.)

INDEX

9.2 Main and intermediate storages proposed for rawmaterial/intermediates/products/by-products (maximum quantities to be stored at any time)

9.3 Transportation methods to be used for matereals inflow, their quantities and likely rootes to be followed

9.4 Safty measures proposed for :

— handling of materials;
— internal and external transportation and
— disposal (packing and forwarding of finished products)

10. Information on Disposal/Disposal of weastes and pollutants

10.1 Major pollutants (gas, liquid, solid) their charcteristics and quantities (average snd at peak loads)

10.2 Quality and qyantity of solide weastes generated, method of their treatment and disposal.

10.3 Air, water and soil pollution problems anticipated and the proposed measure to control the same, including treatment and disposal of offluents.

11. Process Hazards information

11.1 Enclose a copy of report on environmental impact assessment.

11.2 Enclose a copy of the report on risk assessment study.

11.3 Published (open or classified)reports, if any, on accident situtaions/occuptional health hazards or similar plants elsewhere (within or outside the country)

12. Information of proposed safety and occupational health measures :

12.1 Details of fire fighting facilities and minimum quantity of water, co2 and or other firefighting measures needed to meet the emergencies.

12.2 Details of in-house medical facilities proposed.

13. Information on Emergency prepardness.

13.1 Proposed arrangements, if any, for mutual aid scheme with the group of neighbouring factories.

14. Any other relevant information

I certify that the information furnished above is correct to the best of my knowledge and nothing of importance has been concealed while furnishing it.

Name and signature of the applicant.

FORM NO.2

(Prescribed under Rule 4)

Application for registration and grant or Amendment of licence andnotice of occupation.
(To be submitted in triplicate)

1. application for
   a. Registration, grant of licence and notice of occupation — Yes/No.
   b. Amendment of licence — Yes/No.

2. a. Applicant's name :
   b. i. Whether factory already registerd — Yes/No.
      ii. If yes, registration No.
      iii. licence No.

3. Full name and postal addres of the factory :
   a. name of the factory :
   b. Address :

   (Town/village/distret/Pin code no.)

4. Please indicate following details also

   a. Nearest Police Station-Distance-
   b. Nearest Raliway station-distance-
   c. Nearest Publice Hospital-distance-

5. Full name and residential address of the person who shall be the manager of the factory for the purpose of the act.

6. Full name and residental address of the occupier and his deslgnation.
   e.g. Director, Partner, Proprietor
   or
   Any other (specify)

7. Full name and address of the owener of the premisesor building (inccluding the precints there of) referred to in section-93.

8. Please furnish reference numbers(s) and date(s) of approval (s)of the plans site and building and for disposal of trade waste and effuents by the concerned authorities.

Authority	Details
i. StateGovt.....	
ii. Local Authority.....	
iii. Chief Inspector of Factories.....	
iv. pollution Control Board.....	
v. Other concerned authority (specify).....	

INDEX

9. a. Nature of Manufacture processes to be carried out in the factory — List of processes

b. in case of application for amendment, indicate manufacturing processes carried out previously. — List of Processes

10. Name and quantities of raw materials used, intermediate products and principal finished products during the last twelve months (in case of factories already in existence).

Name	Quantity (Vol./Wt/No.)

11. Number of workers employed in the factory—

	Employed in the last 12 months	Proposed to be employed in next 12 months.
a. Maximum number		
b. number ordinarily employed		

12. Nature and total amount of power (In H.P.)
a. Installed
b. Proposed to be installed.

Report of examination or test of pressure vessel or plant.

Registration number :
Licence number :
* NIC Code number :
(as given in the licence)

1. Occupier (or owner) of premises :

2. Address :

3. Name, description and distinctive number of pressure vessel or plant. :

4. Name and address of manufacture :

5. Nature of process (including temperature and pressure parameters). :

6. Particulars of pressure vessel or plant--

   (a) Date of construction :

   (b) Thickness of walls.

   (c) Date on which it was first taken into use.

   (d) Safe working pressure recommended by the manufacture :

7. Date of--

   (a) Last external examination :

   (b) Last internal examination :

   (c) Last hydraulic examination :

   (D) Last ultra-sonic or other non-destructive test :

8. Whether lagging was removed for purposes of examination. :

INDEX

9. Description of examinations carried out and findings :
   (a) External examination (give reason if it is not carried out six monthly) :
   (b) Internal examination (give reasons if it is not carried out annually) :
   (c) Hydraulic test : (give reasons if this is not carried out at an interval of 2 years or 4 years)
   (d) Ultra-sonic or other non-destructive test :

10. Condition of pressure plants--

   (a) Vessel :

   (b) Piping :

11. Conditions of fittings and appliances--

   (a) Pressure gauges :

   (b) Safty valve :

   (c) Stope valve :

   (d) Reducing valve (give reasons if not necessary) :

   (e) Additional safety valve (required in case reducing valve is necessary)

   (f) Other devices (please specify particularly in case of jacketted vassels) :

12. Safe working pressure recommended after examination (specify the allowances made for conditions of working such as heat, corrison, etc). :

13. (a) Repairs (if any) rewuired :
   (b) period within which the reapirs should be executed :
   (c) Any other condition which the person making the examination thinks it necessary for securing safe working :

INDEX

14. Specify reduced working pressure pending repairs. :

15. Safe working pressure calculated as per methods given in sub-rule 8 for thin walled pressure vessel or plant. :

16. Other observations

I certify that on (date).....the pressure vessel or plant described above was thoroughly cleaned and (so far as its construction permits) made accessible for thorough examination and for such tests as were necessary for thorough examination and that on the said date, I thoroughly examined this pressure vessel or plant, including its fittings and that the above is a true report of my examinatin.

Report of Examination of Water-sealed gasholder

Ragistration number :
Licence number :
* NIC Code number :
(As given in the licence)

1. Occupier (or owner of permises :

2. Address :

3. Name, description, distinguishing number or letter and type of gasholder :

4. Name and address of the msnufacturer :

5. (a) Number of lists :

   (b) maximum capacity in cubic meters :

   (c) Pressur within the gasholder when full of gas :

6. Name of gas to be stored in the holder :

7. Whether the Examination was internal or external :

8. Parts of the gas-holders examination by electronic or other accurate devices or by cutting sample dises and results of :

9. Particulars as to the condition of-

   (a) Crown :

   (b) side sheeting, including, grips and cups :

   (c) guiding mechanism (Rollar-carriages, rollers, pines, guide rails or ropes) :

   (d) Tank and :

INDEX

(e) Other structure, if any (columns, framing and bracing) :

10. Particulars as to the position of the lift at the time of examination :

11. Particulars as to whether the tank and lists were found sufficiently level for safe Working and if not, the steps taken to remedy the defect. :

12. Date of examination and by whom it was carried out. :

13. (a) Are all fittings and appliances properly maintained and in good condition ? :

(b) Repairs, if any, required and period within which they should be executed :

(c) Any other condition which the person making the examination thinks it necessary for securing safe working

14. Other observations

I certify that on (date).....the gasholder described above was thoroughly examined and such of the tests as were necessary made on the same day and that the above is a true report of my examination.

* Notice of poisoning or disease

Extract from the Factories Act, 1948 (section 89)

Where any worker in a factory contracts any disease specified in the Schedule, the manager of the factory shall send a notice thereof to such authorities and in such form and within such time, as may be prescribed.

SCHEDULE

LIST OF NOTIFIABLE DISEASES

1. Lead poisoning, including poisoning by any preparation of lead or their sequelae.
2. Lead tetra-ethyl poisoning.
3. Phosphorous poisoning or its sequelae.
4. Mercury poisoning or its sequelae.
5. Managanese poisoning or its sequelae.
6. Arsenic poisoning or its sequelae.
7. poisoning by nitrous fumes.
8. Carbon disulphide poisoning.
9. Benzene poisoning, including, poisoning by any of its homologue, their nitro or amide derivatives or its sequelae.
10. Chome ulceration or its sequelae.
11. Anthrax.
12. Silicosis.
13. poisoning by halogens or halogen derivatives of the hydrocar bons of the aliphatice series.
14. Pathological manifestation due to--
    (a) redium or other radio-active substances; and
    (b) x-rays.
15. Primaray epithelionatous cancer of skin.
16. Toxic aneamia.
17. Toxic jaundice due to poisoning substances.
18. Oil acne or dermatitis due to minaeral oils and compounds containing mineral oil base.
19. Byssinosis.
20. Asbestosis.
21. Occupational or contact dermatitis caaused by direct contact with chemicals and paints. Theseare of two types that is, pri mary irritants and allergic sensitizers.
22. Noise induced hearing loss (exposure to high noise levels).
23. Beriyllium poisoning.
24. Carbon monoxide.
25. Cole miners phnoumoconiosis.
26. Phosgene poisoning.
27. Occupational cancer.
28. Isocynates poisoning.
29. Toxic nephritis.

		(ii) Girls	:
		Total	:

INDEX

11. Total number of man-hours worked including overtime but excluding rest interval
(See explanatory note 'E')

(a)	Adults	(i) Men	:
		(ii) Women	:
(b)	Young persons	(i) Male	:
		(ii) Female	:
		Total	:

12. Average number of hours worked per week

i.e. Total manhours worked

(Avrage daily employment) X (Number of week the factory worked)

(see explanatory nate 'F')

(a)	Adults	(i) Men	:
		(ii) Women	:
(b)	Young persons	(i) Male	:
		(ii) Female	:
		Total	:

13. In respect of factories carrying on processes or operation declared dangerous under section 87, furnish the following information. (See explanatory note 'G')

Name of the dangerous process or operation carried on (See explanatory Note 'G')	Average number of persons employed daily in each of the process or operation given (See explanatory nite 'D')	Number of persons			
		medically examine		declared unfit	
		Male	Female	Male	Female
1	2	3	4	5	6
(i) (ii) (iii) etc.					

INDEX

14. In respect of factories carrying on 'hazardous process' as defined in section 2(cb) furnish the following information (See explanatory note 'H')

Name of the Industry as per First Schedule :

Name of the hazardous process (See explanatory note 'I')	Average number of person employed daily in each of the processes given in the column 1 (See explanatory note 'D')	Number of persons			
		medically examine		declared unfit	
		Male	Female	Male	Female
1	2	3	4	5	6
(i) (ii) (iii) etc.					

Leave with wages

15. Total number of workers employed during the year (See explanatory note 'J') :

(a) Adults
(i) Men :
(ii) Women :

(b) Young persons
(i) Male :
(ii) Female :

Total :

16. Number of workers who were entitled to annual leave with wages during the year. :

(a) Adults
(i) Men :
(ii) Women :

(b) Young person
(i) Male :
(ii) Female :

Total :

17. Number of workers were granted 'leave' during the year (See the explanatory note 'K')

(a) Adults
(i) Men :
(ii) Women :

(b) Young person (i) Male :
(ii) Female :

Total :

18. (a) Total number of workers discharged/dismissed from the service/quit employment/superannuated/died while in service during the year. :

(b) Number of workers in respect of whom wages in lieu of leave were paid

Safty Officers

(See explanatory note 'L')

19. (a) Is the factory notified for appointment of Safety officers under section 40-B (1)(i). _____Yes_____No

(b) Is the factory notified for appointment of Safty officers under section 40-B (1) (ii) (for the factories other than those in (a) above.) _____Yes_____No

(c) Number of Safety officers appointed :

Health and Safty Policy

Information to be furnished only by--

(a) Factories covered under section 2(cb) of section 87 of the Act, and

(b) Factories other than (a). But employ ordinarily, in case of factories registered under--

(i) Section 2(M) (i), 50 or more workers; and

(ii) Section 2(M)(ii), 100 or more workers.

20. Has the factory formulated Health and Safety Policy ? **If yes enclose a copy thereof.** : _____Yes_____No

INDEX

Saftety Committee

(Information to be furnished only by (i) factories carrying on hazardous process or dangerous operations, and (ii) other factories employing 250 or more workers).

21.Is safe'v committee appointed ?
if more than one committee, :
give numbers. _____Yes_____No

Emergency Plan

(Information to be furnished by factories covered under 2(cb). (See explanatory note 'M')

22. (a) Has the factory got on-site emergency planed ? Yes No.

Has it been revised ? Yes No.

if so, when was it last revised ?

(b) if an off-site emergency plan is required to be prepared and has it been prepared ? Yes No.

Medical Facilities

23. Information to be furnished only by—

(a) Factories employing 200 or less persons covered under section 2(cb) or 87 :—

(i) Number of Factory Medical Officers (appointed on retainer-ship basis or part-time basis) :

(ii) Number of ambulance vans available with factory directly or through arrangement :

(b) Factory employing above 200 workers coverd under section 2(cb) or 87 :--

(i) Number of factory Medical Officer (appointed on retainer-ship basis or part-time basis) :

(ii) Number of ambulance vans : available :

(c) All factories employing 500 or more workes :-

(i) Number of full-time Factory Medical Officers :

(ii) Number of ambulance vans :

(iii) Number of ambulance rooms provided :

INDEX

Competent Supervisors

(See explanatory note 'N')

(Information to be furnished only by factories covered under section 2(cb).

24. (a) Number of competent supervisors appointed. :

(b) Number of competent supervisors who have received safety training as required under Rule 68-S :

Industrial Hygienists

(See explanatory note 'O')

25. Number of industrial hygienists employed to monitor work environment as required under section 7-A, Section 112. :

Canteens

26. (a) Is there a canteen provided in the factory as required under section 46 (i.e.only those factories will furnish information wherein more than 250 workers are ordinarily employed ? : Yes_____No._____

(b) Is the canteen provided, managed/run.

(i) Departmentally, or Yes_____No._____

(ii) Through a contractor Yes_____No._____

Shelter or Rest Rooms and Lunch Rooms

(Only those factories will furnish information wherein 150 or more workers are ordinarily employed)

27. As required under section 47—

(a) Are there adequate and suitable shelters or rest rooms provided in the factory ? : Yes_____No._____

(b) Are there adequate and suitable lunch rooms provided in the factory (any canteen maintained in compliance with section 46 will be accepted here also.) : Yes_____No._____

Creches

28. Is there a creche provided in the factory as required under section 48 (i.e. only those factories will furnish information wherein more than 30 women workers are ordinarily employed) ? : Yes_____No._____

INDEX

Welfare Officers

29. (a) Number of Welfare officers to be appointed as required under section 49 (i.e. only those factories will furnish information wherein 500 or more workers are ordinarily employed) ? :

(b) Number of Welfare officers actually appointed :

30. Accidents and Dangerous Occurrences (See explanatory note (p) (1)).

(a) Total number

(bb) Mandays lost due to injuries (This should be the total mandays lost during the previous year as well as in the current year) :

(d) Non-fatal injuries (workers injured occuring in the year in which injured workers did not return to work during the year to which this return relates.

(aa) Number of injuries :

(bb) Mandays lost due to injuries :

PART--B

(Under the Payment of wages Act, 1936)

32. i) Number of Mandays worked (i.e. aggregate number of attendance) during the year for person earing less than Rs. 1600/- per month (See explanatory note 'C').

(a) Adults :

(b) Young Person :

Total :

ii) Average number of workers employed daily (i.e. mandays worked divided by number of days worked) for person earning less than Rs. 1600/-per month (See explanatory note 'D')

(a) Adults :

(b) Young Person :

Total :

33. 'Total Wages paid' including 'Deductions' under Section 7(2) of the Payment of Wages Act, 1936 for persons getting less than Rs. 1600/-per month on the following accounts.

(a) Basic wages only Rs.

(b) Dearness Allowances Rs.

(c) Composite wagw (i.e. if combined basic wage and Dearness allowance paid) Rs.

(d) Overtime wages Rs.

(e) Non-profit sharing Bonus Rs.

(f) Any other bonus (other than profit sharing bonus and non-profit sharing bonus) forming part of wages as defined under the Act. Rs.

INDEX

(g) Any other amount paid in cash which may form part of wages as defined under the Act (Please specify) Rs.

(h) Arrears of Pay in respect of previous year paid during the year. Rs.

(i) Total wages paid (total of (a+b) or (c)+d+e+f+g+h) Rs.

34. 'Gross amount paid' as remuneration to person getting less than Rs. 1600/- per mounth including 'deduction' under section 7(2) of the Act on the following accounts :

(a) 'Total wages paid' (item 33) during the year Rs.

(b) 'Bonus paid' during the year (include arrears also, if paid during the year. This is statutory sharing Bonus). Rs.

(c) 'Amount of Money Value of commission' given during the year (See explanatory note (Q) Rs.

35. Deductions--number of cases and amount realised.

	Persons earning less than Rs. 1600/-per month	
	No. of Cases.	Amount realised Rs.
a) Fines		
b) Deductions for damage or loss.		
c) Deduction for breach of contract.

Part — C

MATERNITY BENEEFIT ACT, 1961 & E.S.I.C. ACT, 1948

37. a) Name of Medical officer, if any, attached to the establishment.
    b) Qualification of Medical Officer attached to the establishment.

    c) Is he resident at the establishment ?

    d) If a part-time employee, how often does he pay visit to the establishment.

38. a) Is there any hospital attached to the establishment ?
    b) If so, how many beds are provided for women employees ?

    c) Is there a Lady doctor ?

    d) If so, what are her qualifications ?

    e) Is there a qualified Midwife ?

    f) Has any Creche been provided ?

39. 1) Aggregate number of women permanently or temporarily employed during the year.
    2) Number of women who worked for a period of not less than one hundred and sixty days in the twelve months immediately preceding the date of delivery.

    3) Number of women who gave notice under section 6.

    4) Number or women who were granted permission to be absent on receipt of notice of confinement.

    5) Number of claims for maternity benefit paid.

    6) Number of claims for maternity benefit rejected.

    7) Number of cases where per-natal confinement and postnatal care was provided by the management free of charge (Section 8)

    8) Number of claims for medical bonus paid (Section 8)

    9) Number of claims for medical bonus rejected.

40. 1) Number of cases in which leave for miscarriage was granted.
    2) Number of cases in which leave for miscarriage was applied for but was rejected.

    3) Number of cases in which additional leave for illness under Section 10 was granted.

    4) Number of cases in which additional leave for illness under Section 10 was applied for but was rejected.

41. 1) Number of women who died.
        a) before delivery.

        b) after delivery.

    2) Number of cases in which payment was made to persons other than the women concerned.

    3) Number of women discharged or dismissed while working.

4) Number of women deprived of maternity benefit and/or medical bonus under provison to sub-section (2) of Section 12.

5) Number of cases in wich payment was made on the order of the Competent Authority or Inspector.

6) Remarks.

42. Full particulars of such case and reasons for the action taken under serials 39(6), 39(9), 40(2), 40(4), 41(3), 41(4), should be given in the appendix below.

Details of payment made during the year ending 31st December.....
Establishment.

Explanatory Notes

A. Establishment in 'public Sector' means an establishment owned, controlled or managed by (i) The Government or the Department of the Government, or (ii) a Government Company as defined in section 617 of the Companies Act, 1956, or (iii) a Corporation established or under Central, Provincial or State Act, Which is owned, controlled or managed by the Government or (iv) a Local Authority.

Establishment in 'Joint Sector' means an establishment managed jointly by the Government and Private Enterpreneur.

Establishment in 'Cooperative Sector' means an establishment managed by Cooperative Society Registered under the Cooperative Societies Act, 1912.

Establishment in 'Private Sector' means an establishment which is not an establishment in Public Sector or Cooperative Sector.

AA. **Major Accident Hazard Factory** is one having an industrial activity using, producing or storing hazardous substance in such quantity that possess the potential to cause substantial damage and to kill or injure a person within or outside the factory boundary.

B. 1. Working day should be taken to be a day on which the establishment actually worked and manufacturing process was carried on including the day on which although no manufacturing process (precee ding the date under consideration) were deployed on maintenance and repair work, etc. on closed days. Days on which the factory was closed for whatever cause and days on which no manufacturing process was carried on should not be treated as working days.

2. For seasonal factories* information about working season and off-season should be given separately.

BB. Major Accident Haradous substance means a substance presenting Major accident hazard and included in the list already circulated and which have been classified into five groups.

*Section 2(12) of Employees State Insurance Act, 1948 defines 'Seasonal factory' as follows :

'Seasonal Factory' means a factory which is exclusively engaged in one more of the following manufacturing processes, namely, cotton ginning, jute or cotton pressing, decorlition of ground- nuts, the manufacture of coffee, indigo, lac, rubber, suger (including gur) or tea or any manufacturing process which is incidental to or connected with any of the aforesaid processes and includes a factory which is engaged for a period of not exceeding seven months in a year—

(a) in any process blending, packing or repacking of tea or coffee; or

(b) in such other manufacturing process as the Cental Government may, by notification in the Official Gazette, specify :

The expression 'Manufacturing process' and 'power' shall have meanings respectively assigned to them in the Factories Act, 1948 (63 of 1948).

C. Mandays worked should be the aggregate number of attendance of all the workers, covered under the Act, in all the working days. In reckoning attendance, attendance by the temporary as well as permanent employed should be counted, and all employees should be included, whether they are employed directly or under contractors (Apprentices, who are not covered under the Apprentices Act, 1961, are also to be included). Attendance on separate shifts (e.g. night and day shifts) should be counted separately. Partial attendance for less than half a shift on a working day should be ignored while attendance for half a shift or more on such day should be treated as full attendance.

INDEX

D. The average number of workers employed daily should be calculated by dividing the figures of 'Mandays worked' by Number of Days worked' in the year. For seasonal factories*, the average number of workers employed daily during the working season and off-season should be given separately. (Refer note B.2).

E. The 'Total Number of Manhours worked' should be the TOTAL ACTUAL HOURS WORKED by all the workers during the year excluding Rest intervals but including Overtime worked. The term 'young person' shall included ' Adolescents' also who have not been certified to work as adults.

F. The 'Average Number of Hours Worked per week' should be calculated by dividing the 'otal Number of Manhours Worked' by the product of 'Average Number of Workers Employed Daily' in the factory during the years (Item 10) and 52 (i.e. number of weeks during the year). In other words, item 11 + (item 10 X 25) = item 12. Incase the factory has not worked for the whole year, the number of weeks during which the factory worked should be used in place of figure 52. for seasonal factories, the 'Average Number of Hours Worked per week' during the working season and off- season should be given separately.

G. All such 'Dangerous Processes or Operations' as specified and declared in the Rules framed under section 87 of the Factories Act, 1948 should be checked. If the factory or even a part of the factory submitting returns falls under this Section, the fact should be mentioned against this item and requisite information furnished accordingly.

H. All such 'Hazardous Processes' in relation to the industries specified in the First Schedule to the Factories Act and defined under Section 2(cb) of the Act should be checked. If a factory, or even a part of the factory submitting returns falls under this Section, the fact should be mentioned against this item and requisite information furnished accordingly.

I. There may be a number of 'hazardous processes' being carried on in any one industry specified in the First Schedule to the Act, all such processes should be given individually in this table.

J. All persons, who have been on roll even for a single day during the year should be taken into account. Care should be taken that a particular worker is counted once only.

K At particular worker is to be counted once only even if the same worker has been granted leave more than once during the year.

L. In every factory, wherein 100 or more workers are ordinarily employed and the factory has been notified under section 40-B(1)(i), or wherein the factory is carrying on any hazardous process defined in section 2(cb) or dangerous operations as defindded in section 87, and the factory has been notified under section 40-B(1)(ii), the occupier shall employ the required number of safety officers with prescribed qualifications. The term 'ordinarily employed' would mean the total numbr of workers working in all the shifts and the employment should be for over 50% of the working days of the establishment in the year.

M. The occupier of every factory where a 'hazardous process' takes place or where hazardous substances are used or handled shall with the approval of Chief Inspector of Factories draw-up an on-site emergency plan for this factory and make known to the workers employed therein thesafety measures required to be taken in the event of an accident taking place. The occupier shall prepare off-site emergency plan based on events which could affect people and the environment outside the work permises. The District/local authority will prepare disaster plan for the area based on off-site plans of individual units.

N. All persons who are required to supervise the handling of 'hazardous substances' shall possess :—

(a) Degree in Chemistry or diploma in Engineering or Technology with five years of experience or

(b) Master's Degree in Chemistry or a degree in Chemical Engineering or Technology with 2 years experience.

INDEX

Note :—The experience stipulated above shall be in process operation and maintenance in Chemical Industry.

O. The occupier shall appoint Industrial Hyginist possessing—

(a) Master of science degree in Chemistry with 2 years analytical experience in Chemical laboratory of repute; or

(b) Master of Science degree in Chemistry with 2 years experiance in conducting survey in industrial hygiene.

P. (1). Dengerous occurrence-The following classes of occurrence are dangerous occurrences--

1. Bursting of a plant used for containing or supplying steam under pressure greater than atmospherice pressure.

2. Collapse or failure of a crane, derrick, winch, hoist or other appliances used in raising or lowering persons or goods, or any part thereof, or the overturning of a crane.

3. Explosion, fire bursting out, leakage or escape of any molten metal, or hot liquor or gas causing bodily injury to any person or damage to any room or place in which persons are employed, or fire in rooms of cotton pressing factories where a cotton opener is in use.

4. Explosion of a receiver or container used for the storage at a pressure greater than atmospheric pressure of any gas or gases (including air) or any liquid or solid resulting from the compression of gas.

5. Collapse or subsidence of any floor, gallery, roof bridge, tunnel, chimney, wall, building, or any other structure.

(2) Only such injuries which prevented workers from working for 48 hours or more immediately following the accident should be reported as non-fatal injuries.

(3) A major accident is a sudden, unexpected, unplanned event, resulting from uncontrolled developments during an industrial activity, which causes, or has the potential to cause, serious adverse effects immediate or delayed (death, injuries, poisoning or hospitalization) to a number of people inside the installation and/or to persons outside the establishment.

Q. The 'Money Value of concession' is the cost of value or the net cost of the concession,as the case may be, in respect of all supplies made and all services rendered individually free of cost. In case of concessional sale of essential commodities to the employees, the difference between the purchase price paid by the employer and the actual price paid by the employees is to be taken as the basis for computing the 'Money Value of Concession'.

R. 'Cash Value of Wages paid in kind' and of 'Concession' in respect of essential commodities at concessional rate authorised under sub-section (2) and (3) of section 11 of the Minimum Wages Act, 1948 shall be estimated in the manner prescribed by the Appropriate Government. In so far as the Central Government is concerned as laid down under Rule 20 of the Minimum Wages (Central) Rules, 1950 the prices at the retail price at the nearest market shall be taken into account in computing the Cash Value of Wages paid in kind. This computation shall be made in accordance with directions as may be issued by the Central Government fromtime to time. The cash value of the concession should be obtained by taking the difference between the cost price paid for supplies of essential commodities given at the concessional rates.

INDEX

S. Include all employees (covered under the Workmen's Compensation Act, 1923) whether permanent or temporary who would, in the case of accidents, be eligible for compensation under the Act and for whom a return is required to be furnished. Number of employed should be shown even if there are no payment of compensation to report.

T. Include for each occupation only those cases in which the final payment of compensation was made during the year. A deposit with the Commissioner should be treated as a payment by the employer.

U. 1. Include all compensation paid in respect of the cases mentioned in explanatory note 'T', whether such compensation was paid during the year or previos to its commencement.Exclude all payments in cases in which the final payment had not been made by the end of the year to which the return reates.

2. Where the benefit actually showed (e.g. hospital leave on full pay) is in excess of the compensation admissible under the Workmen's Compensation Act, 1923, only the amount of the compensation so admissible should be entered in the return.

V. Only such disablements as last for more than three days should be shown (Section 4(1) of the Workmen's Compensation Act, 1923).

W. Check up with the 'List of Occupational Diseases' as laid down in schedule III appended to the Workmen's Compensation Act,1923. In case of those 'Occupational Diseases' only, which resulted in cases, in respect of which compensation was paid, the information is to be furnished.

X. Enter for, each occupation separately each of the 'Diseases' referred to in explanatory note 'W', which resulted in cases in respect of which compensation was paid.

INDEX

Explanatory Notes :—

1. Mention what is actually manufactured, including repairs of all types, following the NIC Code at the four digit level.

2. Establishment in 'public Sector' means an establishment owned, controlled or managed by (i) The Government or the Department, or (ii) a Government Company as defined in Section 617 of the Companies Act, 1956, or (iii) a Corporation established by or under Central, Provincial or State Act, which is owned, controlled or managed by the Government or (iv) a Local Authority.
Establishment in 'Joint Sector' means an establishment managed by the Government and Private Entrepreneur.
Establishment in 'Cooperative Sector' means an establishment managed bya Cooperative Society registered under the Cooperative Societies Act, 1912.

3. (i) Working day should be taken to be day on which the establishmet actually worked and manufacturing process was carried on including the day on which although no manufacturing orocess was carried on but more than 50% of the workers (preceding the date under consideration) were deployed on maintenance and repair work, etc. on closed days. Days on which the factory was closed for whatever cause and days on which nomanufacturing process was carried on should not be treated as working days.

(ii) for seasonal factories* information about working season and off-season should be given separately.

4. Mandays worked should be the aggregate number of attendance of all the workers, covered under the Act, in all shifts on all the working days. In reckoning attendance, should be counted,and all employees should be included, whether they are employed directly or under contractors (Apprentices, who are not covered under the Apprentices Act, 1961, are also to be included). Attendendance on separate shifts (e.g. night and days shifts) should be counted separately. Partialattendance for less than half a shift on a working days should be ignored while attendance for a half a shift or more on such day should be treated as full attendance.

5. The average daily number should be calculated by dividing the aggregate number of attendance (mandays worked) on working days by the number of working days during the half year.

---

* Section 2(12) of E.S.I. Act, 1948 defines 'Seasonal Factory' as follows :--

'Seasonal Factory' means a factory which is exclusively engaged in one or more of the following manufacturing processes, namely cotton gining, cotton or jute pressing, decertication of groundnuts, the manufacture of coffee, indigo, lac, rubber, suger (including gur) or tea or any manufacturing process which is engaged for a period of not exceeding seven months in a year—

(a) in any process of blending, packing or re-packing of tea or coffee; or

(b) in such other manufacturing process as the Central Government may, by notification in the Official Gazette, specify;

The expression 'manufacturing process' and 'power' shall have the meaning respectively assigned to them in the Factories Act, 1948, (63 of 1948).

Rules and Orders (other than those published in Parts I, I-A and I-L) made by the Government of Gujarat under the Central Acts.

ENERGY AND PETROCHEMICALS DEPARTMENT

Notification

Sachivalaya, Gandhinagar, 17th February, 1995.

CONSTITUTION OF INDIA.

No. GU-95-8-REC-4191-403-B.—In exercise of the powers conferred by the proviso to article 309 of the Constitution of India, the Governor of Gujarat hereby makes the following rules to provide for regulating recruitment to the post of Electricity Duty Officer, Class-II, State Service in the Office of the Collector of Electricity Duty, Namely :

1. These rules may be called the Electricity Duty Officer, (in the Office of the Collector of Electricity Duty) Recruitment Rules, 1994.

2. Appointment to the post of Electricity Duty Officer, Class-II State Service in the Office of the Collector of Electricity Duty shall be made either :—

(a) by promotion of a person of provicd merit and efficiency from amongst the persons who have worked for not less than seven years in the cadre of Electricity Duty Inspector in the Office of the Collector of Electricity Duty.

INDEX

Provided that where an appointing authority is satisfied that a person having experience specified above is not available for promotion and that it is necessary in the public interest to fill up the post by promotion even of a person having lesser experience, it may, for reasons to be recorded in writing, promote such person who has experience for a period of not less than two thirds of the period specified above, or

(b) by direct Selection.

3. To be eligible for appointment by direct selection to the post mentioned in rule 2, a candidate shall—

(a) not be more than 35 years of age;

(b) possess a degree in Arts, Commerce, Law or Science of a recognised university or a degree or diploma in Electrical or Mechanical Engineering of a recognised University or an Institution recognised by the Government of Gujarat;

(c) have continuous experience of atleast seven years after acquiring the requisite qualification, in the audit work of commercial accounts or work releted to power tariff or taxation or with the administration of the Indian Electricity Act and Rules thereunder in any Electrical Undertaking or Government Organisation related with matters pertaining to electricity.

Provided that the upper age limit may be relaxed in favour of a candidate possessing exceptionally good qualification or experience or both :

Provided further that the upper age limit may also be relaxed in favour of a candidate who is already in the service of the Government of Gujarat in accordance with the provisions of the Gujarat Civil Services Classification and Recruitment (General) Rules, 1967, as amended from time to time.

4. A candidate appointed by direct selection shall on probation for a period of two years.

5. The candidate appointed by direct seleetion shall, be required to undergo training and pass the post-training examination in accordance with the Gazetted Officers (Pre-Service Training and Examination) Rules, 1970 as amended from time to time.

6. The candidate appointed by direct selection shall be required to pass an Examination in Hindi or Gujarati or both in accordance with the rules prescribed by the Government in that behalf from time to time.

7. A candidate appointed by direct selection shall be required to furnish a security and surity bond for such amount for such period and in such form as may be prescribed by the Government from time to time.

By order and in the name of the Governor of Gujarat,

A. G. SHAIKH,
Under Secretary to Government.

INDEX

2. The specified areas have been selected with a view to provide different target area on different days, in order both to achieve veriety in training and at the same time to avoid evacution of any particular village or a group of villages continuously for the whole specified period. In the specified areas only such villages and areas as may be found to be a danger zone in respect of a particular practice will be evacuated for such days may be necessary for the practice and the notice of what constitutes the danger zone in question will be given by the Revenue Officer in-charge in the area concerned. In no case will all the villages in the specified area be evacuated simultaneously for the whole specifed period.

3. A summary of the main provisions of the Act and Rules framed thereunder showing the rights and obligation of the residents in the area is appended hereto for general information.

Summary of the main provisions of the Act and Rules thereunder :

Field firing and artillery practice :

1. Notice of the intention of execution of military field firing and/or artillery practice takes place over any specified area, there will first be published a notice in the Gujarat Government Gazette notifying the intention of Government to issue a notification specifying the area over which and the period during which the field firing and/or artillery practice shall take place. The Publication of this notice shall be as vide as possible and shall be given (1) by publication the principal newspapers of the area (2) beat of drum, (3) by affixing copies of the notice in the language of the locality in a prominent and public place in the area (4) by sending copies of the notice to selected non official bodies and associations (5) by distributing copies of the notice at the weekely bazar places, agricultural, religious or other fairs, etc., or if/any Hold before the date fixed for the practice (6) in such other manner as the Collector of the District may deem necessary.

2. **Publication of the Notification.**—The notification authorising the field firing and/or artillery practice shall not be issued until, the expiry of two months from the date of the first publication of the notice in the Gujarat Government Gazette.

3. A fresh notice shall be published one week as nearly as may be before the commencement of the period of each period specified in the notification and the notice by beat of drum shall be given and two days as nearly as may be before the commencement for field firing and artillery practice in the areas, concerned.

4. Special provisions as regards the area declared to be danger zone :—

Such notified area, there will be some area which will be declared as danger zone by commanding officer. This danger zone area will be marked in hold red in one copy of the map previously.

5. The danger zone area shall be guarded by sing-hears pickets and so far as Public Security as aspects concerned full security measures should be taken by the military authority every firing range area.

6. It should be remambered that all persons and domestic animals are bound to vacate the danger zone area during the specified period and they are not to enter the area during the specified period. the District Superintendent of Police or any other Officer deputed by him shall arrange for evacuation under the supervision of the Revenue Officer deputed under section 6 of the Act.

7. If there are dwelling houses in the danger zone occupied by women, entry will be made after giving adequate warning through a local, inhabitant and in the presence of 2 respectable inhabitants of the locality to ensure the exclusion of persons and domestic animals from the danger zone area.

8. The compensation payable for exclusion or removal of any person or cattle from any place declared to be a danger zone shall be paid before the evacuation is enforced it shall include compensation for any loss of or employment resulting from any such removal or exclusion.

The Revenue Officer will usually disburse the amount of compensation before the evacuation but in ratio cases may grant suitable advances in money to any person requiring them for expenditure on transport accommodation. Food, fodder, etc. which shall be set off against the amount of compensation.

INDEX

10. **Offence punishable.**—It should be remembered that within the notified area and during the specified period no person should (a) willfully obstruct or interfere with the carrying out of field firing of artillery practice or (b) without the authority to enter or remain in any camps or (c) without due authority enter or remain in any area declared to be a danger zone at a time when entry there to is prohibited or (d) without due authority interfere with any flag or mark. or target or any appear stusued for the purpose of the practice, and if does so he will be punishable with fine which may extend to ten rupees.

11. Provision as regard compensation, right of appeal etc. The provisions as regard clain for compensation method of assisting the compensation award of compensation or refusal of the claims right of appeal etc. mentioned above in the case of military manceuvre, apply in the case of field firing and artillery practice also.

12. Provisions as regard the claims and award of compensation to persons suffering losser damage compensation for any damage caused by military field firing and artillery proctice to person or previleged in any camp or for interference with right of privileges including expenses reasonable incurred in protecting persons, property, rights and privilleges during the military field firing and artillery practice shall be paid by military compensation officer in a presence of the Revenue Officer deputed by the Collector.

13. All claims to compensation should be made to Revenue Officer by the person affected by or his agent within 72 hours from the announcement made by the Revenue Officer that all such claims should be presented to him.

14. It shall be the duty of the Revenue Officer deputed to consider all claims for compensation and determine the amount of compensation to be awarded by investigation on the spot and after hearing the claimants and to disburse, the amount to the claimants. In assessing the amount of compensation due care shall be taken to ascertain the amount of damage caused and the amount that will be required to remedy or repair that damaged.

15. **Right of Appeal.**—Any claimants who is dissatisfied with the order of the Revenue Officer refusing to ward him any compensation or with the amount of compensation awarded to him may, within fifteen days from the communication of the decision to him, given notice to the Revenue Officer of his intention to appeal against the decision.

16. All appeals, shall be decided by a commssion constituted by the Collector consisitng of himself as Chairman a person nominated by the Officer, Commanding and two persons nominated by the Officer, Commanding and two persons nominated by the District Board. The decision of the Commission shall be final and no suit shall lie in any civil court in respect of any matter decid ed by the Commission.

By order and in the name of the Governor of Gujarat,

B. C. YADAV,
Deputy Secretary to Government.

No. G/G/95/120/MVR/1539/4966(ii)/Kh.—The following draft of a notification which it is proposed to be issued under sections 28, 38, 96, 111, 206 and 207 of the Motor Vehicles Act, 1988 (59 of 1988) is published as required by sub-section (*1*) of section 212 of the said Act, for information of all persons likely to be affected thereby and notice is hereby given that the said draft will be taken in to consideration by the Government of Gujarat on or after the expiry of thrity days from the date of publication of this notification in the Official Gazette.

2. Any objections or suggestions which may be received by the Secretary to the Government of Gujarat, Home Department, Sachivalaya, Gandhinagar from any person with respect to the said draft before the expiry of the aforesaid period will be considered by the Government.

DRAFT NOTIFICATION

No. G/G/95/120/MVR/1539/4966(ii)Kh.—In exercise of the powers conferred by sections 28, 38, 96, 111, 206 and 207 of the Motor Vehicles Act, 1988 (59 of 1988), the Government of Gujarat hereby makes the following rules further to amend the Gujarat Motor Vehicles Rules, 1989, namely :—

INDEX

1. These rules may be called the Gujarat Motor Vehicles (Amendment) Rules, 1995.

2. In the Gujarat Motor Vehicles Rules, 1989, (here in after referred to as "the said rules") in rule 2,—

(a) in clause (i), the following words shall be added at the end namely :—

"and includes an Assistant Regional Transport Officer appointed by the State Government".

(b) in clause (n) the following words shall be added at the end, namely :—Gujarat Narmada Auto Limited, Narmadanagar District Bharuch.

3. In the said rules, in rule 4 for sub-rule (*1*), the following shall be substituted, namely :—

"(1) Any Officer of the Motor Vehicles Department of and above the rank of an Assistant Inspector of Motor Vehicles shall be the authority to conduct a test under Sub-section (*5*) of section 8 and any officer of and above the rank of an Inspector of Motor Vehicles shall be the authority to conduct a test under sub-section (*3*) of section 9:

Provided that it shall be competent for the licensing authority or for any person nominated by it in that behalf, to have more than one test.

4. In the said rules, in rule 6,—

for clause (iii) the following shall be substituted, namely :—

" (iii) (a) in respect of a duplicate driving licence in Form 6 under rule 13, twenty rupees; and (b) in respect of a duplicate driving licence in Form 7 under rule 13 forty five rupees."

5. In the said rules, in rule 18 in sub-rule (*4*) after clause (c) the following shall be inserted namely :—

"(d) a driving certificate in Form 5 prescribed under the Central Motor Vehicles Rules, 1989 in the case of holder of a driving licence authorising him to drive other than transport vehicles."

6. In the said rules, in rule 30, for sub-rule (*3*) the following shall be substituted, namely :—

"(3) Any Officer of the Motor Vehicles Department of and above the rank of an Assistant Inspector of Motor Vehicles shall be the authority to conduct a test for the grant of conductor's licence :

Provided that it shall be competent for the licensing authority or for any person nominated by it in that behalf to have more than one test."

7. In the said rules, in rule 71, for clause (iv) the following shall be substituted, namely :—

"(iv) in respect of any other permit for each motor vehicle, one hundred twenty five rupees.".

8. In the said rules, for rule 75, the following shall be substituted, namely :—

"75 Entry of registration mark on permit:—

(1) No permit shall be issued untill the registration mark and other particulars of the vehicle in which it relates has been entered therein.

(2) The applicant shall within one month of the sanction of the application for a permit or such longer period as the Transport Authority may specify produce before that authority the certificate of registration of the vehicle registered in his name and in the event of the applicant failing to produce the certificate of registration within the specified period the Transport Authority may withdrawn its sanction of the application for the permit."

9. In the said rules, in rule 100, in sub-rule (*2*), the following proviso shall be inserted nemely :

"Provided that the licensing authority may vary the said requirements in respect of an establishment or branch office, to be established within any municipal or cantonment area 2.

INDEX

10. In the said rules, in rule 152,

(1) In sub-rule (2),–

(a) for the figure "400", the figure "381" shall be substituted;

(b) in clause (1), for the figure "1370" the figure "1372" shall be substituted;

(c) for clause (ii), the following shall be substistuted, namely :–

(ii) where seats are placed across the vehicle and are facing in the same direction there shall be a space of not less than 660 mm between the back of the front seat and the front of the rear seat when measured at the top most point of the upholstery;

(d) for clause (iii), the following shall be substituted, namely;

"(iii) when seats are placed across the vehicle and are facing each other, there shall be a space of not less than 1271 mm between the backs of the facking seats when measured from the top most point of the upholstery."

(2) in sub-rule (3), for the Figure "500" the figure "406" shall be substituted.

11. In the said rules, in rule 155, in sub-rule (3), for clause (b), the following shall be substituted namely :–

"(b) such door shall have a clear opening of not less than 540 mm x 660 mm on the vehicle registered on or after the date of commencement of the Gujarat Motor Vehicles (Amendment) Rules, 1995.

12. In the said rules, for rule 166, the following shall be substituted, namely:—

"166. Approval of locally manufactured trailer and sami-trailer (1) No. locally manufactutred trailer or semi-trailer, intended to be used as a transport vehicle within the State, shall be registered as a transport vehicle, unless the design of such trailer or semi-trailer is approved:

Provided that this rule shall not apply to trailers or semi-trailers manufactured outside the India.

(2) No trailor or semi-trailer, the design of which is approved, shall be altered so that it does not comply with the approved design.

(3) An application for the approval of a design of a trailer or semi-trailer or semi-trailer shall be made to the Commissioner of Transport or Director of Transport as the case may be alongwith the report of verification of design and recommendation of maximum laden weight and axle weight in respect of the trailer or semi-trailer obtained from the testing institute, and a fee of two hundred rupees.

(4) An application for obtaining a report of verification of design and recommendations of maximum laden weight and axle weights in respect of a trailer or semi-trailer shall be made to the testing institute, in triplicate. Such application shall be accompanied by three copies of each of the following documents duly certified by a Chartered Mechanical Engineer or by a mechanical engineer having a minimum qaualification of bachelor's degree in mechanical engineering of a recognised University, namely:—

(i) Full Specifications

(ii) Drawing giving all dimensions and detains, and

(iii) Set of design calculations of—

INDEX

(a) axles and their supports

(b) springs and their supports

(c) long bearers,

(d) cross bearers,

(e) platform, tank or anything that may be carried on the cross bearers and their supports,

(f) low bar or king pin,

(g) turn table or any other scribbling device for the front axle, if provided.

(h) brakers and braking arrangement.

(i) any other items such as shock absorbers, tipping device etc, if included.

(j) wheels and tyres.

(5) The testing institute shall, uppon the receipt of such application scrutinise the design and calculations and if the design is found satisfactory, it shall certify what would be in its opinion maximum gross vehicles weight and axle weights in respect of the trailer of semi-trailer which is compatible with reasoinable safety.

(6) The testing institute may call upon the appicant to furnish further details, if required.

(7) In case the design is not found satisfactory the testing institute may reject the design.

(8) When a design is found satisfactory, the tasting institute shall forward one copy of the approved design, specifications and calculations with its recommendations as to the maximum gross vehicle weight and axle weight to the Commissioner of Transport or Direcor of Transport and one copy to the applicant.

(9) The applicant on approval of the design, shall supply the Commissioner of Transport or Director of Transport with as many extra copies of the approved design as may be required by him for sending them to different registering authorities for their record.

(10) Notwithstanding anything contained in this rule, the approval of the design of a trailer or semi trailer manufactured in India, by a competent authority, in any other State in India shall be deemed to be an approval according to these rules, provided that there is in force in that other State, rules conforming to or containing substentially the same provisions as in this rule."

13. In the said rules, after rule 235, the following shall be inserted, namely:—

"235A. Authority under section 206 (1) and (2) and section 207--Any Officer of the Police Department of and above the rank of a Sub-Inspector shall exercise the powers under the provisions of sub-section (*1*) and (*2*) of section 206 and sub-section (*1*) of section 207."

14. In the said rules, in rule 239, after the figures, brackets and word "158 (1) and (4)" the Figure "202" shall be inserted.

REVENUE DEPARTMENT

Order

Sachivalaya, Gandhinagar, 21st August, 1995.

INDIAN REGISTRATION ACT, 1908.

No. GHM-95/40/M/S-30/91/3202/H-1.—Shri Shantilal Jagubhai Patel of Surat (hereinafter referred to as "the said Party") had presented a sale Deed bearing non-Judicial Stamps and Registration Fees amounting to Rs. 600/- to the Office of the Sub Registrar, Surat on 3rd September, 1975 for Registration.

The said Sale-Deed was accepted and allotted Registration No. 4406 by the Sub-Registrar, Surat and kept pending for want of Certificate required to be produced by the said party under Section 230-A of the Income Tax Act, 1961.

The said party has produced the Certificate required under Section-230, pending could not be traced and is considered to be lost in the office of the Sub-Registrar, Surat. The circumstances under which the said document was lost are being investigated.

Now, the said Party has applied for return of the original document duly registred.

The Stamp Duty and Registration Fees has been paid by the said Party on the earlier execution of the same Sale-Deed, so the Government has examined, the matter carefully and decided to grant the permission for re-execution of the said document without levying stamp duty since the duty on the original document has already been paid by the said Party.

ORDER

Therefore, in exercise of the powers conferred by Section 78 of the Indian Registration Act, 1908, (Bom. XVI of 1908) in its application to the State of Gujarat, the Government of Gujarat hereby prescribes that no registration fee shall be levied on the re-execution of the Sale Deed for replacing the earlier Sale-Deed bearing No. 4406 presented by the said Party on 3rd September, 1975 to the Sub-Registrar.

By order and in the name of the Governor of Gujarat,

S. N. DAVE,
Deputy Secretary to the Government.

Separate paging is given to this Part in order that may be filed as a Separate Compilation.

PART IV-A

Rules and Orders (other than those published in Parts I, I-A and I-L) made by the Government of Gujarat under the Central Acts.

ગૃહ વિભાગ (વિશેષ)

સચિવાલય, ગાંધીનગર, ૧૧મી ઓક્ટોબર, ૧૯૯૫.

ફોજદારી કાર્યરીતી અધિનિયમ, ૧૯૭૩.

ક્રમાંક : જીજી-૯૫-૧૭૯ વિશેષ-૨-ક્રમપ-૨૪૮૦-૨૭૫૧ (ભાગ--૧)--સિદ્ધપુરના એકઝીકયુટીવ મેજીસ્ટ્રેટ ફોજદારી કાર્યરીતી અધિનિયમ, ૧૯૭૩ (સને ૧૯૭૪ના બીજા અધિનિયમ)ની કલમ-૧૪૪ હેઠળ કરેલા અને આ સાથેની અનુસૂચિમાં ફરી જણાવેલ તારીખ ૯મી જાન્યુઆરી, ૧૯૯૫ના હુકમ ક્રમાંક : પીઓએલ/પ્રતિબંધ જેનો આમાં હવે પછી સદરહુ હુકમ તરીકે ઉલ્લેખ કર્યો છે. તેમાં નિર્દિષ્ટ કરેલા વિસ્તારોમાં હુલ્લડ અને બખેડો અટકાવવા માટે ગુજરાત સરકારે તેમ કરવું જરૂરી જણાય છે. તેથી, હવે સદરહુ અધિનિયમની કલમ-૧૪૪ની પેટા કલમ (૪)ના પરંતુકથી મળેલ સત્તાની રુએ, ગુજરાત સરકાર આથી આદેશ કરે છે કે, સને ૧૯૯૫ના જાન્યુઆરી મહિનાની ચોથી તારીખે સદરહુ હુકમ જેની મુદત આ જાહેરનામું ન હોત તો પુરી થઈ ગઈ હોત, તે સને ૧૯૯૫ના ઓગષ્ટ મહિનાની ચોથા તારીખે અને તે તારીખથી વધુ છ મહિનાની મુદત માટે અમલમાં રહેશે.

અનુસૂચિ

નં. પીઓએલ--પ્રતિબંધ.

સિદ્ધપુરમાં ઐતિહાસિક સ્થળ રુદ્રમહાલય આવેલ છે. તેની બાજુમાં એક મસ્જિદ આવેલ છે. જે જુમા મસ્જીદ તરીકે ઓળખાય છે અને તે મિલ્કતો ભારત સરકારના પુરાતત્વ ખાતા તરફથી રક્ષીત ઈમારત તરીકે જાહેર કરાયેલ છે અને તે ઈમારતોના ઉપયોગ સારું હિન્દ તથા મુસલમાન કોમો વચ્ચે સિદ્ધપુરમાં ઘણી ભારે તંગ પરિસ્થિતિ પેદા થાય છે અને તે હાલ પ્રવર્તે છે. આ બાબતે નામ. ગુજરાત સરકારે અગાઉ પ્રતિબંધ વિસ્તાર તરીકે બહાર પાડેલ જાહેરનામાની મુદત પુરી થાય છે. તેથી બન્ને કોમો તરફથી રુદ્રમહાલય અને જુમ્મા મસ્જીદમાં પાક કરવા અને નમાઝ પઢવા જાય તેમ માનવાને કારણ છે. હાઈકોર્ટમાં કેસો ચાલે છે. તેનો હજુ નિકાલ આવેલ નથી. બન્ને કોમો વચ્ચે ફરીથી તંગદીલી ઉભી થવા સંભવ છે. જેથી જાહેર સુલેહ શાંતિનો ભંગ થતો અટકાવવાનું ઈષ્ટ જણાય છે અને તેમ થતું તાત્કાલિક અટકાવવા તથા ઝડપી ઉપાય યોજવાનું ઈચ્છનીય છે.

INDEX

તેથી, હું એન. ડી. પટેલ, એકઝીકયુટીવ મેજીસ્ટ્રેટ, સિદ્ધપુર મને મળેલ ખાસ સત્તાની રુએ ફરમાવું છું કે, નીચે અનુસૂચિમાં જણાવેલ મિલ્કતોમાં તારીખ ૪થી જુન, ૧૯૯૫ના રોજથી ૬૦ દિવસ સુધી સદર મિલ્કતોના અગર તેની અંદર આવેલ કોઈપણ સ્થળે કોઈપણ રીતે ઉપયોગ કરવો નહીં તેવો પ્રતિબંધ ફરમાવું છું.

મિલ્કતોના વિસ્તારની ચતુ:સીમા

પૂર્વ દિશા : ઘર નં. ૧-૧૦-૮૪ની પછી નદીમાં જવાનો રસ્તો તથા ઘર નં. ૧-૧૦-૯૮૫નો કરો.

પશ્ચિમ દિશા : રુદ્રમહાલય તથા મસ્જીદની હદથી રસ્તો દેસાઈના માઢ તરફ જવાનો તથા ત્યાંથી વ્હોરવાડ તરફ જવાનો રસ્તો મુકી ઘર નં. ૧-૧૦-૪૩, ૧-૧૦-૪૪ તથા તા. ૧--૧૦--૪૫ની પછીત તથા બારણું.

ઉત્તર દિશા : રુદ્રમહાલય તથા મહોલ્લામાં ઘર નં. ૧-૧૦-૭૨ થી ૧-૧૦-૭૬ના મકાનની પછીત તથા પશુવાદળની પોળ તરફ જવાનો રસ્તો જે દેસાઈના માઢ તરફ જાય છે તેની બીજી બાજુએ ઘર નં. ૧-૧૧-૯૫ થી ૧--૧૧--૧૦૦ના મકાનોનો આગળનો ભાગ.

દક્ષિણ દિશા : જુની વ્હોરવાડ તથા દેસાઈના માઢ તરફ જવાનો રસ્તો ઓળંગી ઘર નં. ૧--૫--૫ તથા ૧--૫--૬નો આગળનો ભાગ તથા બારણા તથા ત્યારબાદ રસ્તો મુકીને ઘર નં. ૧--૧૦--૪૭ના મકાનના કરાનો ભાગ.

સદરહુ હુકમનો ભંગ કરનાર ભારતના ફોજદારી અધિનિયમની કલમ-૧૮૮ મુજબની શિક્ષાને પાત્ર થશે. આ ગુનો કોગ્નીઝેબલ બીનજામીન લાયક ગુનો છે. આ હુકમ જિલ્લા મેજીસ્ટ્રેટશ્રી, મહેસાણા જિલ્લા પોલીસ વડાશ્રી, પાટણ તથા એકઝીકયુટીવ મેજિસ્ટ્રેટ, સિદ્ધપુર સિવાય આ અર્થે તેમને અધિકૃત કરેલા અધિકારીઓ પાસેથી પરમીટ ધરાવનાર વ્યકિતઓને લાગુ પડશે નહીં અગર ફરજ ઉપર હાજર રહેનાર પુરાતત્વ ખાતાના તથા રાજય સરકારના અધિકારીઓ તથા નોકરોને લાગુ પડશે નહીં.

Mortgage loan of Rs. 44.22 Crores from LIC of India availing by the Gujarat Electricity Board.

ENERGY AND PETROCHEMICALS DEPARTMENT

Notification

Sachivalaya, Gandhinagar, 3rd November, 1995.

No. GU-95(39)/ESA/1395/6035/K.—In exercise of the power conferred under sub-section (*1*) of section-65 of the Electricity (Supply) Act, 1948 (LIV of 1948), the Government of Gujarat hereby accords sanction, to the Gujarat Electricity Board to borrow from Life Insurance Corporation of India a sum of Rs. 44.22 Crores (Rupees Forty Four Crores Twenty two lacs only) for financing the Capital expenditure of Kadana Hydro Electric Project Stage-I, Kadana Hydro Electric Project Extn. stage-II, Lignite Based TPS in Kutch stage-II Unit-III and Sikka TPS stage-I on mortgage charges on assets of 400 KV Asoj sub-station and Kadana Hydro power station and also on further charge of assets already mortgaged by the Gujarat Electricity Board to avail of the earlier twenty eight loans of Rs. 240 lacs, Rs. 100 lacs, Rs. 275 lacs, Rs-400 lacs, Rs.550 lacs, Rs. 600 lacs, Rs.760 lacs, Rs. 730 lacs, Rs.100 lacs, Rs.800 lacs, Rs-120 lacs, Rs-1138 lacs, Rs.1252 lacs, Rs.1129 lacs, Rs.891 lacs, Rs.995 lacs, Rs.1094 lacs, Rs.800 lacs, Rs. 1203 lacs, Rs.1323 lacs, Rs.1455 lacs, Rs.1924, lacs, Rs.2275 lacs, Rs,2502 lacs, Rs.2752 lacs, Rs-2000 lacs, Rs. 3227 lacs and Rs-3583 lacs, from Life Insurance Corporation of India. Thus this loan of Rs-44.22 Crores to be borrowed shall have additional security on assets of 400 KV Asoj sub-station and Hydro Power station and also further charge on the assets of Gujarat Electricity Board with written down value of Rs. 40927.78 lacs already mortgaged with Life Insurance Corporation of India against earlier twenty eight loans.

INDEX

The loan of Rs. 44.22 Crores would be subject to the following terms and conditions :-

(A) *Rate of interest.*—This loan will carry an interest of 14% p. a. payable half yearly on 15th January and 15th July each year. However, interest rate may undergo an upward revision and Board may be required to pay interest at the revised rate on this loan from the date of disbursement thereof.

(B) *Repayment Term of Loan.*—The loan shall be repayable within a maximum period of 15½ years from the date of drawal of the loan by 15 annual equal instalments. The Ist of such instalments of repayment shall, however, fall due on 15th January or 15th July following completion of one year from the date of drawal of the loan.

(C) *Interest Tax.*—(i) GEB shall have to pay the interest tax at the rate of 3% p. a. or such rate as may be decided by the Government of India from time to time on the interest amount in accordance with the provisions of the interest Tax Act, 1974 as amended by Finance (No. 2) Act, 1991 by Government of India.

(ii) In case of default in payment of interest or repayment of loan on the due dates, Gujarat Electricity Board shall be liable to pay compound interest thereon at 1% over the prevailing interest rate being charged with same rests. Any interest for a broken period shall be calculated on a daily basis using 365 days factor for a year.

(D) *Insurance.*—The fixed assets mortgaged to the Life Insurance Corporation of India shall be insured as required by the Life Insurance Corporation of India. Other conditions with regard to place of disbursement, repayment, costs and legal expenses, inspection of mortgaged premises as applicable to the loan drawn by Gujarat Electricity Board on the earlier occasions would apply in the case of the above referred loan as well.

By order and in the name of the Governor of Gujarat,

RAJKUMAR,
Deputy Secretary to Government.

HOME DEPARTMENT

Notification

Sachivalaya, Gandhinagar, 18th November, 1995.

MOTOR VEHICLES ACT, 1988.

No. G/G/95/187/MVR/1589/4966(ii)-KH.-WHEREAS the draft rules further to amend the Gujarat Motor Vehicles Rules, 1989, were published as required by sub-section (*1*) of section 212 of the Motor Vehicles Act, 1988 (59 of 1988) on pages 65.1 to 65.5 of the Gujarat Government Gazette, part IV-A, dated the 29th May, 1995, under Government Notification, Home Department No. G/G/95/120 MVR/1589-4966 (ii) KH, dated the 29th May, 1995 inviting objections or suggestions from all persons likely to be affected thereby till the 29th June, 1995.

AND WHEREAS, the objections and suggestions received on the said draft have been considered by the Government;

AND WHEREAS, the objections and suggestions received on the said draft have been considered by the Government

NOW, THEREFORE, in exercise of the powers conferred by sections 28, 38, 96, 111, 206 and 207 of the Motor Vehicles Act, 1988 (59 of 1988), the Government of Gujarat hereby makes the following rules further to amend the Gujarat Motor Vehicles Rules, 1989, namely–

1. These rules may be called the Gujarat Motor Vehicles (Amendment) Rules, 1995.

2. In the Gujarat Motor Vehicles Rules, 1989 (hereinafter referred to as "the said rules"), in rule 2,–

(a) in clause (i), the following words shall be added at the end, namely:—

"and includes an Assistant Regional Transport Officer appointed by the State Government;".

(b) in clause (n), the following words shall be added at the end, namely :–

–"Gujarat Narmada Auto Limited, Narmadanagar, District Bharuch."

INDEX

3. In the said rules, in rule 4, for sub-rule (*1*), the following shall be subtituted, namely:—

"(*1*) Any Officer of the Motor Vehicles Department of and above the rank of an Assistant Inspector of Motor Vehicles shall be the authority to conduct a test under sub-section (*5*) of section 8 and any officer of and above the rank of an Inspector of Motor Vehicles shall be the authority to conduct a test under sub-section (*3*) of section 9 :.

Provided that it shall be competent for the licensing authority or for any person nominated by it in that behalf, to have more than one test.

4. In the said rules, in rule 6, for clause (*iii*), the following shall be substituted, namely: "(*iii*) (*a*) in respect of a duplicate driving licence in Form 6 under rule 13, twenty rupees; and

(*b*) in respect of a duplicate driving lincence in Form 7 under rule 13-forty five rupees."

5. In the said rules, in rule 18, in sub-rule (*4*), after clause (*c*), the following shall be inserted, namely:—

"(*d*) a driving certificate in Form 5 prescribed under the Central Motor Vehicles Rules, 1989 in the case of holder of a driving licence authorising him to drive other than transport vehicles".

6. in the said rules, in rule 30, for sub-rule (*3*), the following shall be substituted, namely:—

"(*3*) Any Officer of the Motor Vehicles Department of and above the rank of an Assistant inspector of Motor Vehicles shall be the authority to conduct a test for the grant of conductors' licence :

Provided that it shall be competent for the licensing authority or for any person nominated by it in that behalf to have more than one test."

7. In the said rules, in rule 71, for clause (iv), the following shall be substituted, namely:–

"(iv) in respect of any other permit for each motor vehicle, one hundred twenty five rupees."

8. In the said rules, for rule 75, the following shall be substituted, namely:–

"75 Entry of registration mark on permit.

(1) No permit shall be issued until the registration mark and other particulars of the vehicle to which it relates has been entered therein.

(2) The applicant shall within one month of the sanction of the application for a permit or such longer period as the Transport Authority may specify produce before that authority the certificate of registration of the vehicle registered in his name and in the event of the applicant failing to produce the certificate of registration within the specified period the Transport Authority may withdraw its sanction of the application for the permit."

9. In the said rules, in rule 100, in sub-rule (*2*), the following proviso shall be inserted, namely:–

"Provided that the licensing authority may vary the said requirement in respect of an establishment or branch office, to be established within any municipal or cantonment area."

10. In the said rules, in rule 152,–

(1) in sub-rule (2),–

(a) for the figure "400", the figure "381" shall be substituted;

(b) in clause (i), for the figure "1370", the "1372" shall be substituted;

(c) for clause (ii), the following shall be substituted, namely:–

INDEX

(ii) where seats are placed across the vehicle and are facing in the same direction, there shall be a space of not less than 660 mm between the back of the front seat and the front of the rear seat when measured at the top most point of the upholstery;";

(d) for clause (iii), the following shall be substituted, namely:-

"(iii) when seats are placed across the vehicle and are facing each other, there shall be space of not less than 1271 mm between the back of the backing seats when measured from the top most/point of the upholstery."

(2) in sub-rule (*3*), for the figure "500", the figure "406" shall be substituted.

11. In the said rules, in rule 155, in sub-rule (*3*), for clause (b), the following shall be substituted, namely:-

"(b) such door shall have a clear opening of not less than 540 mm × 660 mm on the vehicle registered on or after the date of commencement of the Gujarat Motor Vehicles (Amendment) Rules, 1995."

12. In the said rules, for rule 166, the following shall be substituted, namely:-

"166. Approval of locally-manufactured trailer and semi-trailer. (1) No locally manufactured trailer or semi-trailer, intended to be used as a transport vehicle within the State, shall be registered as a transport vehicle, unless the design of such trailer or semi-trailer is approved:

Provided that this rule shall not apply to trailers or semi-trailers manufactured outside the India.

(2) No trailer or semi-trailer, the design of which is approved, shall be altered so that it does not comply with the approved design.

(3) An application for the approval of a design of a trailer or semi-trailer shall be made to the Commissioner or Transport or Director of Transport, as the case may be, alongwith the report of verification of design and recommendations of maximum laden weight and axle weight in respect of the trailer or semi-trailer obtained from the testing institute, and a fee of two hundred rupees.

(4) An application for obtaining a report of verification of design and recommendations of maximum laden weight and axle weights in respect of a trailer or semi-trailer shall be made to the testing institute in triplicate. Such application shall be accompanied by three copies of each of the following documents duly certified by a Chartered Mechanical Engineer or by a mechanical engineer having a minimum qualification of bachelor's degree in mechanical engineering of a recognised University, namely:—

(i) Full Specifications

(ii) Drawing giving all dimensions and details, and

(iii) Set of design calculations of–

(a) axles and their supports,

(b) springs and their supports,

(c) long bearers,

(d) cross bearers,

(e) platform, tank or anything that may be carried on the cross bearers and their supports,

(f) low bar or king pin,

(g) turn table or any other scribblin device for the front axle, if provided,

INDEX

(h) brackers and braking arrangement,

(i) any other item such as showck absorbers, tipping device etc, if included,

(j) wheels and tyres.

(5) The testing institute shall, upon the receipt of such application scrutinise the design and calculations and if the design is found satisfactory, it shall certify what would be in its opinion maximum gross vehicle weight and axle weights in respect of the trailer or semi-trailer which is compatible with reasonable safety.

(6) The testing institute may call upon the applicant to furnish further details, if required.

(7) In case the design is not found satisfactory, the testing institute may reject the design.

(8) When a design is found satisfactory, the testing institute shall forward one copy of the approved design, specifications and calculations with its recommendations as to the maximum growss vehicle weight and axle weights to the Commissioner of Transport or Director of Transport and one copy to the applicant.

(9) The applicant on approval of the design, shall supply the Commissioner of Transport or Director of Transport with as many extra copies of the approved design as may be required by him for sending them to different registering authorities for their record.

(10) Notwithstanding anything contained in this rule, the approval of the design of a trailer or semi-trailer manufactuerd in India, by a competent authority, in any other State in India shall be deemed to be an approval according to these rules, provided that there is in force in that other State, rules conforming to or containing substantially the same provisions as in this rule."

13. In the said rules, after rule 235, the following shall be inserted, namely :—

"235—A. Authority under section 206(1) and (2) and section 207–Any officer of the Police Department of and above the rank of a Sub-Inspector shall exercise the powers under the provisions of sub-sections (1) and (2) of Section 206 and sub-section (1) of section 207."

14. In the said rules, in rule 239, after the figures, brackets and word "158 (1) and (4)", the Figure "202" shall be inserted.

15. In the said rules, in the First Schedule,—

(a) in Form T.V.A., after item 5, the following shall be inserted, namely,—

"6. I herewith attach driving certificate in Form 5 prescribed under the Central Motor Vehicles Rules, 1989".

(b) in Form P. St. S.A., for item 27, the following shall be substituted, namely :—

"(27) The details of arrangement made to acquire the vehicles."

(c) in Form P.Co.P.A., for item 9, the following shall be substituted, namely :—

ENERGY AND PETROCHEMICALS DEPARTMENT

Notification

Sachivalaya, Block No. 5, 5th floor, Gandhinagar, 14th December 1995.

INDIAN ELECTRICITY ACT, 1910.

No. GU/95/54/IEA-1275/13299-K.—WHEREAS, the Kandla Port Trust was permitted under section 28 of the Indian Electricity Act, 1910, under Government Notification No GU/90/77/IEA-1275/13299-K, dated the 27th November, 1990, to distribute power to the Gopalpuri area which is residential colony of the employees of above said Port and which lies in the area under the administrative control of the Kandla Port Trust, Kandla.

AND WHEREAS, the said Kandla Port Trust Authority under their letter No. EL/GN/1436/97 dated 7th March 1995 has approached the Government of Gujarat for extension of the permission for a further period of 5 years with effect from 9th December, 1995.

AND WHEREAS, the Gujarat Electricity Board, has under its letter No. OM/COM/D/PLE-Kandla/2671 dated 1st December--1995 conveyed its no objection to the extension of the period.

NOW, THEREFORE, in exercise of the powers conferred by Section 28 of the Indian Electricity Act, 1910, the Government of Gujarat hereby permits the Kandla Port Trust, Kandla to distribute power to the Gopalpuri area, subject to the provisions of the Indian Electricity Act, 1910, and the rules made there under and subject to the following further conditions:—

1. The sanction is for a further period of 5 years with effect from 9th December--1995.
2. The Kanda Port Trust will have to enter into necessary agreements with the Gujarat Electricity Board as per rules for the terms and conditions of supply and tariffs.
3. Kandla Port Trust will remit the amount of the electricity duty as per the scale of rates.

By order and in the name of the Governor of Gujarat.

PART IV—A

Rules and Orders (other than those published in Parts I, I-A and I-L) made by the Government of Gujarat under the Central Acts.

HOME DEPARTMENT

Notice

Sachivalaya, Gandhinagar, 5th December, 1995.

No. G/G/195/FAP/1794/4441/M.—Notice is hereby given that in exercise of the powers conferred by sub-section (*3*) of section 9 of the Manoeuvres Field Firing And Artillery Practice Act, 1938 (V of 1938), the State Government proposes to authorise Military Authorities to carry out Field Firing and Artillery Practice with live emmunition in the area specified in the notification No. GG/194/FAP/1794/4441/M, dt. 5th December, 1995 for the period of five years i.e. from 10th September, 1997 to 9th September, 2002.

2. The specified area has been selected with a view to provide different target area on different days in order both to achieve variety in training and at the same time to avoid evacation of any particular village or a ground of villages continuously for the whole specified period. In the specified area only such villages areas as may be found to be in danger zone in respect of a particular practice will be evacuated for such days as may be necessary for the practice and the notice of what constitute the danger zone in question will be given by the Revenue Officer in Charge in the area concerned. In no case will all the villages in the specified area be evacuated simulteneously for the whole specified period.

3. A summary of the main provisions of the Act and Rules thereunder showing the rights and obligation of the residents the area is appended hereto for general information.

4. Any objections or suggestions which may be received by the Deputy Secretary, Home Department Sachivalaya, Gandhinagar, from any persons in respect of this Notice within 2 (two) months from the date of its publication in Government Gazette, will be considered by Government. Summary of the main provisions of the Act and Rules, framed thereunder ;

INDEX

FIELD FIRING AND ARTILLERY PRACTICE :-

1. Notice of the intension of execution of military field firing and/or antillery practice before the execution of field firing and/or artillery practice taken place over any specified area, thereunder will first be published a notice in the Gujarat Government Notifying the intention of Government to issue a notification specifying the area over which and the period during which the field firing and/or artillery practice shall take place. The publication of his notice shall be as vide as possible as shall be given (1) by publication in the Principal New Papers of the area, (2) by beat of drum, (3) by affixing copies of the notice in the language of the locality in all prominent and public places in the area. (4) by sending copies of the notice to selected non official bodies and associations. (5) by distiributing copies of the notice at the weekly bazar places, agricultural, religious or other fairs, etc. or if any held befor the date fixed for the practice, (6) in such other manner as the Collector of the district may deem necessary.

2. Publication of the notification:—The notification authorising the filed firing and/or artillery practice shall not be issued until the expiry of 2 (two) months from the date of the first publication of the notice in the Gujarat Government Gazette.

3. A fresh notice shall be published one week as may before the commencement of the period or of each period specified in the notification and the notice by best of drum shall be given and two days a nearly as may be before the commencement of field firing and artillery practice in the areas concerned.

4. Special provisions as regards the area declared to be danger zone. In such notified areas there will be some area which will be declared as danger zone by Commanding Officer. This danger zone area will be marked in bold red ink one copy of the map previously published with the notice.

5. The danger zone area shall be guarded by signboards bears, pickets etc. on the day of the practice.

6. It should be remembered that all persons and domestic animals are bound to vacate the danger zone area during the specified period and that they are not to enter the area during the specified period. The District Superintendent of Police or any other officer deputed by him shall arrange for evacation under the supervision of the Revenue officer deputed under Section 6 of the Act.

7. If there are dwelling houses in the danger zone occupied by woman, entry will be made after giving adequate warning through a local inhabitant of the locality to ensure the exclusion of persons and domestic animals from the danger zone area.

8. The compensation payable for exclusion or removal of any persons or cattle from any place declared to be a danger zone shall be paid before the evacution is enforced it shall included compensation for any loss or employment resulting from any such removal or exclusion.

9. The Revenue Officer will usually disburse the amount of compensation before the evacuation but in rare cases may grant suitable advances in money to any person requiring them for expenditure on transport, accommodation, Food, etc. which shall be set off against the amount of compensation.

10. Offence punishable:—It should be remembered that within the notified area and during the specified period, no persons should (a) willfully obstruct or interfere with the carrying out of field firing or artillery practice or (b) without the authority to enter or remain any camp or (c) without the authority enter or remain in any area declare to be a danger zone at a time when entry thereto is prohibited or (d) without the due authority, interfere with any flag or mark or target or any apparatus used for the purpose of the practice and if he does so he will be punishable with fine which may extend to ten rupees.

11. Provisions as regards compensation right of appeal etc. the provisions as regards the claim for compensation, method of assessing the compensation, award of compensation or refusal of the claim right of appeal etc. Mentioned above in the cash of military manoeuvers apply in the case of field firing and artillery practice also.

12. Provisions as regards the claim and award of compensation to persons suffering loss of damage:—Compensation for any damage caused by military filed firing and artillery practice to person or prevelege in any camp or for interference with rights or previleges including expense reasonable incurred in protecting person property right and privileges during the military field firing and artillery practice shall be paid by military compensation officer in the presence of the Revenue Officer deputed by the Collector.

INDEX

13. All claims to compensation should be made to the Revenue Officer by the person affected by or his agent within 72 hours from the announcement made by the Revenue Officer that all such claims should be presented to him.

14. It shall be the duty of the Revenue Officer deputed to consider all claims for compensation and determine the amount of compensation to be awarded by investigation on the spot and after hearing, the claims and to disburse the amount to the claiments. In assessing the amount of compensation due care shall be taken to ascertain the amount of damage caused and the amount that will be required to remedy or repair that damage.

15. Right of appeal:—any claimant what is dissatisfied with the order of the Revenue Officer refusing to award him any compensation or with the amount of compensation awarded to him may within, fifteen days from the communication of the decision to him given notice to the Revenue Officer of his intention to appeal against the decision.

16. All appeals shall be decided by commission constituted by the Collector, consistingof himself as Chairman a person nominated by the District officer commanding and two persons nominated by the District Board. The decision of the Commission shall be final and no suit shall lie in any civil court in respect of any matter decided by the Commission.

By order and in the name of the Governor of Gujarat,

B. C. YADAV,
Deputy Secretary to Government.

Notification

Sachivalaya, Gandhinagar 29th December, 1995.

MOTOR VEHICLES ACT, 1988.

No. GG/95/208/MVA-1895/681/KH.–In exercise of the powers conferred by clause (i) of sub-section (*1*) of Section 67 of the Motor Vehicles Act, 1988 (59 of 1988) the Government of Gujarat having regard to the provisions of clauses (*a*) to (*d*) of the said sub-section (1), hereby issues directions to the State Transport Authority and the Regional Transport Authority, Junagadh Region regarding fixing of fares for the stage carriages operated by the Kodinar, Nagar Panchayat plying in the areas as specified in the Schedule appended to this notification with effect on and from the 1st January, 1996 namely:—

Fares (inclusive of the amount of tax on passengers if any, levied or leviable under the Bombay Motor Vechiles (Taxation of Passengers) Act, 1958 (Bom. LXVI of 1958) for the time being in force for stage carriages plying in the areas and on the routes respectively specified against them in column 1 and 2 of the Schedule appended herto shall be subject to such maximum fares as specified against them in column 3 of the said Schedule:

Provided that, in the case of any journey under taken by a Student, if no such tax is leviable to the fares for such journey shall be so adjusted as to exclude therefrom the amount of such tax.

INDEX

SCHEDULE

Area	Routes	Maximum fares inclusive of passenger tax
1	2	3
Municipal or cantonment areas having approved routes where stage carriages (City Passenger bus Services) are operated by the Kodinar Nagar Panchayat, Kodinar.	All Routes	1. One rupee per passenger for the first stage of stage of two (2) Km. or part thereof, and 2. Twenty Five paise more per passenger for a distance beyond first stage, each of Two Km. or part thereof; 3. Provided that, minimum fare shall be Rs. 1-00. 4. Stage = 2 Km. : Provided further that where the place of loading is not a stage point the distance travelled shall be calculated from immediately proceeding stage or sub-stage point and where the place or getting down is not a stage point or sub-stage point the distance travelled shall be calculated upto immediately succeedding stage point or sub-stage point.

EXPLANATION :

In this notification the expression 'Stage Point' or "sub-stage point." means any bus stop approved as such by the regional Transport Authority for the purpose of computing or charging fares on a route.

Note:—In this notification the word "Passenger"shall have the same meaning a assigned to it in clause (*h*) of rule 2 and sub-rule (*i*) of Rule 119 of the Gujarat Motor Vehicle Rules, 1989.

By order and in the name of the Governor of Gujarat,

N. U. GAMIT,
Section Officer.
